

## CONTENTS

Preface .....	v
Measurement of diffusion in microporous solids. D.M. Ruthven .....	1
State-of-the-art in cryogenic air separation. T.F. Fisher .....	27
 I. THERMODYNAMICS AND MODELLING OF SEPARATIONS	
The adsorption of gas mixtures in molecular sieves: The suitability and limitations of the ideal adsorbed solution theory. P. Brückner, L.V.C. Rees .....	39
A mixing model for the calculation of the solubilities of solids and their mixtures in supercritical fluids. P.-C. Chen, M. Tang, Y.-P. Chen .....	49
Theoretical studies of binary adsorption equilibria. J.A. Hampson, L.V.C. Rees .....	59
A detailed model for simulated continuous countercurrent adsorption system. M.M. Hassan, A.K.M.S. Rahman, K.F. Loughlin .....	73
Dynamic modelling of industrial adsorption processes using ADSIM/SU™. F.O. Jegede, P.G. Mahoney .....	81
Mechanism of Ir(III) catalysis in N-bromosuccinimide oxidation of sugars. R.K. Shukla .....	119
The measurement of concentration-dependent hydrogen diffusion coefficients in the solid-solution alloy Pd-Y. P.R. Stonadge, M.J. Benham, D.K. Ross .....	129
Optimized adsorptive gas-desulphurization by mathematical modelling. M. Suckow, W. Lutz .....	143

Effect of packing material in distillation with structured packings. J. Uresti-Meléndez, F.J. Alvarado, J.A. Rocha . . . . .	153
---	-----

## II. SEPARATION TECHNOLOGY AND ULTRAPURIFICATION

### a. using sorbents

Carbon molecular sieves for air separation. J.N. Armor . . . . .	163
Industrial gas separation using PSA. G. V. Baron . . . . .	201
Activated carbon principles. Y. Hamerlinck, D.H. Mertens . . . . .	221
Inorganic porous materials. E.F. Vansant . . . . .	229
Separation by chemical processes. The role of reactor selection. W.P.M. van Swaaij, G.F. Versteeg . . . . .	243
Hydrogen purification by PSA method for gas-chromatography uses. F. Atanasiu, Gh. Mihailescu . . . . .	259
Remarks on the industrial operation of molecular sieves for paraxylene separation. L. Boariu, M. Damian, R. Zamfirache, R. Russu . . . . .	265
Lithium chabazite: synthesis and air separation properties. C.G. Coe, T.R. Gaffney, R. Srinivasan, T. Naheiri . . . . .	267
A pressure and temperature swing adsorption filtration system for the removal of organic vapours from an air stream. R.A. Coombes, B. Hampson, J.A.W. Sykes . . . . .	281
Molecular sieving properties of carbonaceous adsorbents. L. Czepirski, B. Laciak . . . . .	293
Para-xylene adsorption on X-type synthetic zeolites. M. Damian, L. Boariu . . . . .	301
A comparative investigation into the kinetics of the thermal desorption of water vapour from amberlite XAD-4, zeolite 3A and a range of activated carbons. J.E. Darby, A.J. Evans . . . . .	303

Experimental determination of the intrinsic surface diffusivity of hydrocarbons onto activated carbon by means of a differential analysis. D.D. Do, X. Hu, G.N. Rao . . . . .	309
Preparation of carbon molecular sieve air separation adsorbents from microporous carbon via hydrocarbon cracking. T.R. Gaffney, T.A. Braymer, T.S. Farris, A.L. Cabrera, C.G. Coe, J.N. Armor . . . . .	317
Adsorption in systems : active carbon/binary liquid non-electrolyte solution. J.K. Garbacz, D. Ziolkowska, A. Swiatkowski . . . . .	329
Removal of benzene from hexane cut by liquid phase adsorption on activated carbon. A.N. Goswami, S.K. Sharma, Anshu Nanoti, T.S.C.M. Gupta, B.S. Rawat . . . . .	339
Adsorption equilibria for binary mixtures of nonelectrolytes on chemically modified surface of active carbons. J. Goworek, S. Biniak, A. Swiatkowski . . . . .	349
The adsorption properties of Fe-, Fe/Cr- and Fe/Zr-pillared montmorillonite. I. Heylen, N. Maes, A. Molinard, E.F. Vansant . . . . .	355
Multicomponent adsorption, desorption and displacement dynamics of hydrocarbons in activated carbon. X. Hu, G.N. Rao, D.D. Do . . . . .	363
Adsorptive separation of organic acids by the sorbex process. S. Kulprathipanja, S.H. Hobbs, G.F. Maher, D.W. Penner, J.A. Johnson . . . . .	373
A new process for the production of high purity carbon monoxide and hydrogen. R. Kumar, W.C. Kratz, D.E. Guro, T.C. Golden . . . . .	383
Fe <sub>2</sub> O <sub>3</sub> -pillared clays : The interaction of the tri-nuclear Fe(III)-acetato complex with montmorillonite clay. N. Maes, A. Molinard, E.F. Vansant, G. De Roy . . . . .	403
Determination of multicomponent adsorption equilibria of gas mixtures. C. Malara, T. Mencarelli, G. Pierini, I. Ricipito, F. Toci . . . . .	413
Gas adsorption properties of cation modified alumina pillared montmorillonite. A. Molinard, E.F. Vansant . . . . .	423
The influence of the pillar loading on the porosity of alumina pillared montmorillonite. A. Molinard, N. Maes, K.K. Peeters, E.F. Vansant . . . . .	437

Restoring the cation exchange capacity of alumina pillared montmorillonite through modification with ammonium. A. Molinard, K.K. Peeters, N. Maes, E.F. Vansant . . . . .	445
The influence of the butylamine intercalation on the adsorption behaviour of $\alpha$ -zirconium phosphate. K.K. Peeters, A. Molinard, N. Maes, E.F. Vansant . . . . .	455
Near real-time diagnostic analysis of hydrogen isotopes by gas-chromatography. I. Ricapito, C. Malara, G. Pierini, B. Spelta . . . . .	465
Methyl acetophenone separation by adsorption on pillared clay. R. Russu, A. Russu, D. Nita . . . . .	475
Experimental and theoretical investigations of the blowdown step of a PSA process for H <sub>2</sub> -purification. R. Schöllner, M. Wolf, G. Kluge . . . . .	477
A new approach to predict the adsorption breakthrough with bidispersed adsorbents. P. Schweighart, A. Mersmann . . . . .	489
Gas separation by membranes and adsorption technologies. J.C. Tao . . . . .	499
The separation of aromatics on zeolite type structure with middle size pores. A. Visan, E. Popovici, R. Russu . . . . .	519
Adsorption of hydrocarbons and alcohols on silicalite and zeolite 5A. P. Wu, D. Chen . . . . .	523
<b><u>b. using membranes</u></b>	
Micro-porous ceramic membranes for gas separation: synthesis, gas transport and separation properties. R.S.A. De Lange, J.H.A. Hekkink, K. Keizer, A.J. Burggraaf . . . . .	531
Separations using organic membranes. Abstract. N. N. Li . . . . .	535
Application of pervaporation in environmental technology. C. Vandecasteele, C. Dotremont . . . . .	537

Permeate flux enhancement using a baffle in microfiltration with mineral membrane. B.B. Gupta, D. Wu, R.W. Field, J.A. Howell . . . . .	559
Separation of nitrogen and organic vapors by pillared clay-carbon composite membrane. Z.-H. Hu, H.-Y. Zhu, E.F. Vansant . . . . .	567
Polyphenyleneoxides in membrane gas separation. O.M. Ilinitch, V.B. Fenelonov, V.Yu. Gavrilov, L.G. Okkel, K.I. Zamaraev . . . . .	573
Vapour recovery from air with selective membrane absorption. A.E. Jansen, P.H.M. Feron, J.J. Akkerhuis, B.Ph. ter Meulen . . . . .	583
The role of pore plugging in membrane filtration of compact polymer dilute solutions. T.V. Knyaz'kova . . . . .	599
Membrane separation with liquid crystal-systems. H.J. Kosmella, H. Kamusewitz, D. Paul . . . . .	617
Molecular-sieve inorganic membranes: adsorption, permeation, diffusion, and topology. Y.H. Ma, A.G. Dixon, A.B. Shelekhin . . . . .	637
The impact of process optimization on membrane nitrogen production. R. Prasad, P.J. Cook . . . . .	647
Gas separation with zeolite based polyethersulfone membranes. M.G. Sürer, N. Baç, L. Yilmaz, T. Gürkan, A. Sacco Jr. . . . .	661
Production of high purity oxygen from air using aromatic polyamide membrane. A. Tabe Mohammadi, T. Matsuura, S. Sourirajan . . . . .	671
Important considerations in the selection and use of membrane separation processes. C.M. Tam, M.M. Dal-Cin, C.E. Capes, A. Tweddle . . . . .	681
Flue gas desulphurisation by reactive or reversibly sorbent photosynthetic membranes. A comparative feasibility study. G. Trebbi, R. Belli, A. Bianchi, U. De Robertis, M. Mazzanti, M. Rognini, F. Gianturco, I.R. Bellobono . . . . .	703
Correlation between the micropore structure and the adsorption of benzene in pillared clays. H.-Y. Zhu, Z.-H. Hu, N. Maes, E.F. Vansant . . . . .	715

c. using chemical processes

Separation of acid gases from power plant flue gas streams by formulated amines. A. Chakma	.727
On solvent effects for CO <sub>2</sub> equilibrium absorption using amines. D. Eimer, H. Lidal, O. Erga	.739
On the effect of thermal regeneration on CO <sub>2</sub> absorption kinetics in amine solutions. G. Andersson, D. Eimer	.751
SO <sub>2</sub> separation by reactive liquid membranes. M. Okamoto, A. Chakma	.755
Application of hydrazine to regeneration of post-absorption solutions in combined SO <sub>2</sub> /NO <sub>x</sub> removal from flue gases by the chelate method. T.T. Suchecki, H. Kumazawa	.763
IR studies of the interactions of SO <sub>2</sub> with calcium-based sorbents. J. Zawadzki	.773

d. using other techniques

The preparative separation of lipids by silver resin chromatography. R.O. Adlof	.777
New technology for the specific enzymatic hydrolysis of vegetable oils. F.P. Cuperus, G. Boswinkel, J.T.P Derksen	.783
Importance of the third phase formation in LLX with TOA. N.R. Das, S. Lahiri	.791
Gas chromatographic estimation of adsorption properties of activated carbons. H. Grajek	.799
Perspectives of laser assisted gas mixture separation in slip flows through capillaries. A.S. Lagutchev, Y.N. Petrov	.813

Chromatographic study of the adsorption of O <sub>2</sub> , N <sub>2</sub> , Ar and CH <sub>4</sub> in cation exchanged A, X and Y zeolites. J.A. Martens, D. Ghys, M. Van de Voorde, H. Verelst, G. Baron, P.A. Jacobs . . . . .	819
Design of ultrafiltration and reverse osmosis processes by computer simulation. H. Niemi, S. Palosaari . . . . .	829
Counteracting chromatographic electrophoresis, a new process for purification of proteins. W. Shichang, G. Ruichang . . . . .	845
Extraction and concentration of furfural produced in reactor using supercritical CO <sub>2</sub> . T. Sako, T. Sugeta, N. Nakazawa, K. Otake, T. Taguchi, M. Sato, K. Shibata . . . . .	853
On-line extraction of polymers, oligomers, additives and monomers by multiple solvents on packed HPLC columns. W.J. Staal, P. Cools, A.M. van Herk, A.L. German . . . . .	857
A thermodynamic basis for chemical separation by selective inorganic ion exchanger. M. Tsuji, S. Komarneni . . . . .	861
A novel method for separating dispersed matter from a fluid medium by means of electrostatic repulsive force. G.C. Yeh, B.V. Yeh . . . . .	865
<b>III. SEPARATION TECHNOLOGY IN ENVIRONMENTAL APPLICATIONS.</b>	
Photosynthetic membranes in industrial wastewaters treatment, separation and recovery of valuable products. A case study with (dicyano)aurate(I) and (dicyano)argentate(I) ions. I.R. Bellobono . . . . .	877
Transport properties of alkali metal cations through photografted cryptand membranes immobilizing calix[8]arene. I.R. Bellobono, L. Righetto, A. D'Ambrosio, G. Azimonti . . . . .	885
Vapor-phase adsorption of benzene, toluene and xylene by a new adsorbent: modified elutrilithe. Z.-H. Hu, H.-Y. Zhu, E.F. Vansant . . . . .	895

Small scale applications to separate organic vapors by means of membranes. K. Ohlrogge, J. Wind . . . . .	903
The adsorption of phosphates from aqueous solutions using alumina pillared montmorillonite. A. Molinard, A. Scheerders, K. Possemiers, E.F. Vansant . . . . .	909
 <b>IV. GAS MEASUREMENTS</b>	
Ensuring international comparability of gas measurements through traceability to the mole, our SI unit for amount of substance. P. De Bièvre . . . . .	919
A gas chromatographic technique for the accurate determination of CO <sub>2</sub> in gas treating solvents. P. Shahi, A. Chakma . . . . .	937
Near-absolute gas (isotope) mass spectrometry: isotope abundances (and atomic weight) determinations of sulfur. S. Valkiers, M. Becker, F. Schaefer, L. Wouters, P. De Bièvre . . . . .	945
Near-absolute gas (isotope) mass spectrometry: isotope abundance (and atomic weight) determinations of silicon for an improved Avogadro constant. Abstract. P. De Bièvre, F. Schaefer, S. Valkiers . . . . .	951
Near-absolute gas (isotope) mass spectrometry: isotope abundances (and atomic weight) determinations of nitrogen and oxygen. S. Valkiers, P. De Bièvre . . . . .	953
Near-absolute gas (isotope) mass spectrometry: isotope abundance (and atomic weight) determinations of boron and carbon. S. Valkiers, P. De Bièvre . . . . .	959
Near-absolute gas (isotope) mass spectrometry: isotope abundance (and atomic weight) determinations of neon, krypton, xenon and argon. S. Valkiers, F. Schaefer, P. De Bièvre . . . . .	965
Author index . . . . .	969
