

C O N T E N T S

	<u>Page No.</u>
<i>Foreword</i>	1
Effect of Design on the Controllability of Continuous Plants Professor M. Morari, California Institute of Technology, USA.	3
Early Integration of Process and Control Design John E. Rijnsdorp and Paul Bekkers, TNO-IPL, Eindhoven, The Netherlands.	17
Controllability Measures for Disturbance Rejection Sigurd Skogestad and Erik A. Wolff, University of Trondheim, Norway.	23
Design and Operability of an Energy Integrated Distillation Column Torben Mønsted Schmidt, Arne Koggersbøl and Sten Bay Jørgensen, Technical University of Denmark, Denmark.	31
Design Modifications and Proper Distillation Control Z. Fonyo, Swiss Federal Institute of Technology, Switzerland.	41
Controllability Analysis for Unstable Processes Morten Hovd and Sigurd Skogestad, University of Trondheim, Norway.	49
Control System Design in Distillation Processes and its Dependence of the Original Process Design Anders Karlstrom, Claes Breitholtz, Inge Jovik and Adam Lagerberg, Chalmers University, Sweden.	55
Design and Control of Recycle Processes in Ternary Systems with Consecutive Reactions William L. Luyben, Lehigh University, USA.	65
Simultaneous Process and System Control Design : An Actual Industrial Case S. M. A. M. Bouwens and P. H. Kösters, DOW Benelux N.V., The Netherlands.	75

Concurrent Integrated Design of Process and Operating System D. M. Laing and J. W. Ponton, University of Edinburgh, UK.	87
Incorporating Operability Measures into the Process Synthesis Stage of Design G. W. Barton, M. A. Padley and J. D. Perkins, University of Sydney, Australia and Centre for Process Systems Engineering, Imperial College, UK.	95
A Multiobjective Optimization Approach for Analyzing the Interaction of Design and Control Michael L. Luyben and Christodoulos A. Floudas, Princeton University, USA.	101
Integrated Design of Effluent Treatment Systems Stephen Walsh and John Perkins, Centre for Process Systems Engineering, Imperial College, UK.	107
Interactions between Design and Operation of Batch Plants S. Macchietto, Centre for Process Systems Engineering, Imperial College, UK.	113
A Procedure for Controllability Analysis Erik A. Wolff, Sigurd Skogestad, Morten Hovd and Knut W. Mathisen, University of Trondheim, Norway.	127
Is the Relative Gain Array a Sensitivity Measure? Quan Liang, Sichuan Institute of Light Industry and Chemical Technology, China.	133
Robust Control Indicators in Process Design and Control J. Figueroa, J. Romagnoli and G. Barton, University of Sydney, Australia	139
Early Stage Process Controllability Assessment M. J. Oglesby, T. I. Malik, S. Fararooy and V. Geake, ICI Engineering, Billingham, UK and ICI Engineering, Northwich, UK. Centre for Process Systems Engineering, Imperial College, UK and Cambridge Control Limited, UK.	145
Inferential Control using Nonlinear Model-based Observer Control R. W. Jones and P. J. Gawthrop, Glasgow University, UK.	151

Control Configuration Selection for the Inferential Control of a High Purity Distillation Column	
D. Alkaya, D. Ariburnu, C. Ozgen and T. Gürkan, Middle East Technical University, Turkey.	157
The Model Projection Problems in the Global Instrumentation of a Process	
N. Karcianas, City University, UK.	167
Computer-aided Optimal Dynamic Network Design	
V. G. Vainer and E. V. Levitt, Kharkov Pedagogical Institute, Ukraine.	171
Optimal Design and Operation of Complex Batch Distillation Column	
Shinji Hasebe, Badhrulhisham B. Abdul Aziz and Iori Hashimoto, Kyoto University, Japan.	177
Dynamic Modeling in Design and Operation Safety Checking of Large Scale Pipeline Networks	
J. Zaworka, T. Jenicek, J. Kralik, J. Sterba and Z. Vostry, Institute of Information Theory and Automation, Czechoslovakia.	183
Computer-aided Process Design System for Plant Operation	
Yuji Naka, Hiroshi Takiyama, Eiji O'Shima, Tokyo Institute of Technology, Japan.	189
Comparison of Several Startup Models for Binary and Ternary Batch Distillation with Holdups	
Badhrulhisham B. Abdul Aziz, Shinji Hasebe and Iori Hashimoto, Kyoto University, Japan.	197
The Design and Scheduling of Multipurpose Batch Plants	
N. Shah, C. C. Pantelides, and R. W. H. Sargent, Centre for Process Systems Engineering, Imperial College, UK.	203
Supervisory Control of Parallel Processes in Batch Plants	
Hans-Michael Hanisch, Universitat Dortmund, Germany.	209
A Knowledge-based Expert System for Hazard and Operability Studies	
Heeyeop Chae, Yeo Hong Yoon and En Sup Yoon, Seoul National University, Korea.	215
Computer Emulation of Hazard Identification	
H. Zerkani and A. G. Rushton, Loughborough University, UK.	221

A Hierarchical Method for Line-by-Line Hazard and Operability Studies

Jennifer M. Black and Jack W. Ponton, University of Edinburgh, UK.

227

Design of Flexible and Reliable Process Systems

Thomas V. Thomaidis and Efstratios N. Pistikopoulos, Centre for Process Systems Engineering, Imperial College. UK.

235
