

CONTENTS

	Page
Preface	
Basic Physics of Plasma <i>by F. Cap</i>	1
Basic Features of the Kinetic Theory of Plasma Waves and of Waves-Particles Interaction <i>by L. Krlin</i>	39
Methods in Magneto-Hydrodynamic Stability Theory <i>by E.K. Maschke</i>	91
Electrostatic Waves and Instabilities in Homogeneous, Magnetized Plasmas <i>by J.J. Rasmussen</i>	117
Collective Scattering in Gases and Plasmas <i>by D. Grésillon</i>	171
Radiofrequency Plasma Heating and Current Drive Basic Aspects <i>by E. Canobbio and R. Croci</i>	227
