Editor's Note xv

Foreword xvii

1	Introduction to Nanotechnology	1
	by Dr. K. Eric Drexler	
1.1	The relationship of molecular nanotechnology and science	1
1.2	The essential role of manufacturing in technological progress	2
1.3	Early ideas and recent progress	3
1.4	Implications of atomic-scale positional control for manufacturing	5
1.5	Uses of the term "nanotechnology"	6
1.6	An overview of the study of molecular nanotechnology	8
1.7	The importance of molecular manufacturing	9
1.8	Molecular machine components	10
1.9	A molecular manufacturing system	12
1.10	A "household" molecular manufacturing system	13
1.11	Summary: Characteristics of molecular manufacturing	16
1.12	Molecular manufacturing and the computer revolution	17

1.13	From current technology to molecular manufacturing	17
1.14	Public policy and molecular manufacturing	18
1.15	Conclusions	18
1.16	Discussion	19
2	Design-Ahead for Nanotechnology	23
	by Ralph C. Merkle	
2.1	Diamond	24
2.2	Designing small mechanical structures from diamondoid materials	25
2.3	Simulating the properties of molecular structures	27
2.4	Designing a nanoscale robot arm	31
2.5	Chemical tools to synthesize diamondoid materials	32
2.6	A synthetic strategy	34
2.7	Self-replicating systems	35
2.8	Starting with simpler systems	36
2.9	Complexity of different kinds of self-replicating systems	36
2.10	Reactions to molecular manufacturing	37
2.11	Advances in computer technology	39
2.12	Fundamental physical limits of computation	40
2.13	A molecular mechanical computer	40
2.14	Performance characteristics of a molecular mechanical computer	43
2.15	Advantages and disadvantages of molecular mechanical logic	44
2.16	Research objectives for molecular manufacturing	46
2.17	Discussion	48
3	Designing Molecular Components	53
	by Ted Kaehler	
3.1	Paths to a proto-assembler	53
3.2	Artificial evolution	54
3.3	Key steps in artificial evolution	57
3.4	Applications of artificial evolution	60
3.5	Molecular building blocks	61

3.6	Requirements for molecular building blocks	61
3.7	Problems in finding molecular building blocks	62
3.8	Summary	65
3.9	Discussion	65
4	Biotechnology as an Enabling Technology	67
	by Dr. Martin Edelstein	
4.1	Information management in the cell	67
4.2	Structural proteins provide the physical-plant of the cell	68
4.3	Molecular manufacturing within the cell	70
4.4	Inventory control in the cell	71
4.5	Current technology for producing proteins	72
4.6	Protein structures begin with linear chains of amino acids	73
4.7	Protein chains fold into more complex structures	74
4.8	Secondary structure in proteins	76
4.9	Structural motifs in proteins	79
4.10	Lessons for molecular nanotechnology from the study of protein structural motifs	85
4.11	Practical considerations for biological production of proteins	86
4.12	Discussion	88
5	Modeling and Remodeling Molecules	93
	by Michael Pique	
5.1	An overview of protein molecules	94
5.2	Remodeling an antibody molecule	97
5.3	Remodeling an enzyme	102
5.4	New ways to model proteins	106
5.5	Conclusions	108
5.6	Acknowledgments	108
5.7	Discussion	109
6	Paths to Nanotechnology	113
	by Howard Landman	
6.1	A model for scientific and economic development	113

	6.1.1	Knowledge space	114
	6.1.2	Colonization metaphor	115
	6.1.3	Mining metaphor	116
6.2	Existing fields and industries that might lead to nanotechnology		120
	6.2.1	Micromechanics	121
	6.2.2	Microelectronics and computers	122
	6.2.3	Biotechnology	123
	6.2.4	Chemistry	124
6.3	Discussion		125
7	Today's New Materials: Atomic Control in One Dimension		129
	by Dr. Michael Kelly		
	7.1	Early uses of thin-film technology	131
	7.2	Epitaxial growth	133
	7.3	Atomic layer epitaxy	135
	7.4	Future potential of improved multilayer structures	138
	7.5	Summary	143
	7.6	Discussion	143
8	Diamond Growth: Today and Tomorrow		147
	by Dr. Michael Pinneo		
	8.1	Properties and applications of diamond	147
	8.2	CVD diamond deposition process	150
	8.3	Excitation mechanisms for diamond growth	155
	8.4	Applications	159
		8.4.1 Mechanical applications	160
		8.4.2 Electronic applications	163
		8.4.3 Biomedical applications	169
	8.5	Future diamond synthesis technologies	169
	8.6	Discussion	170
9	Nanotechnology: Evolution of the Concept		173
	by Christine L. Peterson		

9.1	Components of the concept	173
9.1.1	Atoms	174
9.1.2	Chemistry	174
9.1.3	Molecular machinery: Atoms as parts of machines	175
9.1.4	Programmable manufacturing systems	176
9.2	A partial synthesis by Feynman	176
9.3	Methodology required: Theoretical applied science	178
9.4	Nanotechnology concept emerges at MIT	178
9.5	Theoretical work continues	180
9.6	Further work	182
9.6.1	Work in the United States	182
9.6.2	Work in Switzerland and Sweden	184
9.6.3	Work in Japan	184
9.7	Public education and policy implications	184
9.8	Interest within the space development community	186
9.9	Prospects for nanotechnology	186
10	Virtual Molecular Reality	187
	by Prof. Marvin Minsky	
10.1	Tinkertoy, Meccano, and Erector Sets	187
10.2	Quantum certainty	189
10.3	Missteps toward micromachinery	190
10.4	What to do next?	192
10.5	The skeptics	192
10.6	Gauging progress	194
10.7	Discussion	194
11	Molecular Manufacturing as a Path to Space	197
	by Dr. K. Eric Drexler	
11.1	A brief sketch of our history in space	197
11.2	Better vehicles to get to space	198
11.3	Getting around in space	199
11.4	Why go into space?	200
11.5	Living in space	200

- 11.6 Discussion 202

- 12 Nanotechnology Research and Development Sponsorship 207**
by Neil Jacobstein
 - 12.1 Where are we now? 208
 - 12.2 Where are we going? 214
 - 12.3 How do we get there? 215
 - 12.4 So what? 216
 - 12.5 Discussion 217

- 13 Nanotechnology in Japan 221**
by Dr. Charles Sweet
 - 13.1 MITI-sponsored research 222
 - 13.2 STA-sponsored research 223
 - 13.3 MESC-sponsored research 224
 - 13.4 Cooperation among MITI, STA, and MESC 225
 - 13.5 The corporate sector 226

- 14 The Politics of Technology in the United States: The Background for the Coming Era of Nanotechnology Politics 229**
by James C. Bennett
 - 14.1 The politics of technology 230
 - 14.2 A lesson from space policy 231
 - 14.3 Players in the government 232
 - 14.4 Influencing the government 237
 - 14.5 Industrial policy? 238
 - 14.6 Discussion 244

- 15 Nanotech: A Venture Perspective 245**
by John Doerr
 - 15.1 Lessons learned 248
 - 15.2 Commercialization 249
 - 15.3 Public policy 252

15.4	Discussion	255
16	The Open Society and Its Media	261
	by Mark S. Miller	
16.1	Improving society	261
16.2	Media matter	262
16.3	Xanadu	263
16.4	Links	264
16.5	Hyperlinks	265
16.6	Emergent properties	266
16.7	Transclusion	267
16.8	Remembering the past: historical trails	268
16.9	Preparing for the future: detectors	269
16.10	The WidgetPerfect saga	269
16.11	Permissions	272
16.12	Reputation-based filtering	272
16.13	Hypertext + multimedia = hypermedia	274
16.14	External transclusion	274
16.15	Conclusions	274
16.16	Acknowledgments	276
Index	277
