

Table of Contents

Acknowledgments .....viii  
List of Tables .....x  
List of Figures.....xi

Chapter I: INTRODUCTION

Introduction.....1  
The Region and the Time Period.....1  
Seasonality as an Archaeological Concept.....3  
Red deer in the Upper Paleolithic of  
Southwest France.....3  
Seasonality and Age Determinations  
from Red deer Teeth.....3  
Overview of the Study.....3

Chapter II: ASSESSING RECENT MODELS OF UPPER PALEOLITHIC  
SUBSISTENCE AND SETTLEMENT

Introduction.....5  
The Studies.....6  
    Hunter, Herder, or Fisher.....6  
        On Reindeer Dependence.....6  
        On Salmon.....14  
    Site Location.....15  
Limitations of the Current Database.....16  
Interpretive Problems: Theoretical Limitations...17

Chapter III: SEASONALITY STUDIES IN ARCHAEOLOGY

Introduction.....18  
Definition of Seasonality.....20  
Methods of Seasonality Estimation.....20  
    Indirect Methods.....20  
    Direct Methods.....20

Presence-Absence of Faunal Species.....	20
Floral Remains.....	23
Population Structure.....	23
Annual and Stress Related Physiological Events.....	25
Oxygen Isotope Analysis.....	28
Incremental Structures.....	28
Molluscs.....	28
Fish.....	30
Antler Pedicels.....	31
Bone.....	31
Mammalian Teeth.....	32
Cementum Annuli Analysis.....	35
For Future Research in Cementum Annuli Applications.....	40
Discussion.....	42
 Chapter IV: SEASONAL BEHAVIOR OF THE RED DEER	
Introduction.....	44
The Red deer of Pleistocene Europe.....	44
Definition of the Species.....	44
Seasonal Behavior of <u>Cervus elaphus</u> .....	47
 Chapter V: METHODOLOGY	
Introduction.....	51
Dental Annuli Analysis of <u>Cervus elaphus</u> .....	51
Previous Studies.....	51
The Present Study's Control Sample.....	59
Recommendations for Standard Application of Cementum Annuli Analysis to <u>Cervus elaphus</u> Teeth from Archaeological Sites...	62
The Sample and Its Preservation.....	62

The Technique.....	62
Terminology.....	63
Appearance of First Increment and Implications for Exact Aging.....	63
Timing of Annuli Formation and Cessation.....	63
Assignment of Seasonal Categories.....	63
Age Profiles of the Red deer.....	65
Methods Employed.....	65
Interpretation of the Age Profiles.....	66

#### Chapter VI: THE ARCHAEOLOGICAL SAMPLE

Introduction.....	69
Background: Research Goals for the French Upper Paleolithic.....	69
Overview of the Late Glacial Biotic Complex.....	71
Species Range.....	72
The Sample for the Present Study.....	73
The Upper Perigordian Sample.....	75
Le Flageolet I.....	78
La Ferrassie.....	80
Roc de Combe.....	82
Les Battuts.....	83
Summary of Upper Perigordian Sample.....	85
The Tardiglacial Sites.....	86
On the Magdalenian and Azilian.....	86
La Gare de Couze.....	87
Le Morin.....	90
Pont d'Ambon.....	92
Summary of Tardiglacial Sample.....	94

Chapter VII: PATTERNS OBSERVED AND INTERPRETATIONS

The Upper Perigordian Sample.....96

    Le Flageolet I, Level 7.....96

    La Ferrassie, Level D2.....97

    Roc de Combe, Level 1.....97

    Les Battuts, Level 5.....98

    Discussion of the Upper Perigordian Sample..98

    Hypotheses Concerning Topographic  
    Location, Species Hunted, Seasonality,  
    Seasonal Behavior of the Prey, and  
    Settlement.....99

    Age Profiles of the Red deer.....100

The Tardiglacial Sample.....101

    Gare de Couze, Levels B-G1.....101

    Le Morin, Level A (I-IV).....101

    Pont d'Ambon (Levels 2,3,3a and 3b).....102

    Discussion of the Tardiglacial Sites.....105

        How Pont d'Ambon Differs from  
        Gare de Couze and Le Morin.....105

Implications of the Age Profiles  
of the Red deer.....106

Summary Implications of the Data.....109

Chapter VIII: RECOMMENDATIONS FOR  
FUTURE RESEARCH AND CONCLUDING REMARKS.....111

    Contributions of the Present Research.....111

    Future Research Directions.....112

Appendix A: Photographs of Cementum Annuli.....	116
Appendix B: Results of Cementum Annuli Analysis and Eruption and Attrition Estimates: Season of Death and Age of Red deer.....	124
Appendix C: Linking Animals of Compatible Teeth, Seasonality and Age to Estimate Numbers of Individuals Present.....	135
Appendix D: Age Profile of Red deer from Pont d'Ambon Based on Cementum Annuli Counts and Klein's Crown Height Program.....	146
