

CONTENTS OF MAKROMOL. CHEM., MACROMOL. SYMP. 32

E. Franta, P. Rempp	
Dedication	ix
1. T. Saegusa*, Y. Chujo, K. Aoi, M. Miyamoto	
One-shot block copolymerization	1
2. E. J. Goethals*, D. Van Meirvenne, G. Trossaert, R. Deveux	
Polymer networks via cationic ring-opening polymerization	11
3. J. M. DeSimone, A. M. Hellstern, E. J. Siochi, S. D. Smith, T. C. Ward, P. M. Gallagher, V. J. Krukonis, J. E. McGrath*	
Homogeneous and multiphase poly(methyl acrylate) graft polymers via the macromonomer method	21
4. R. P. Quirk*, J. Yin, S.-H. Guo, X.-W. Hu, G. Summers, J. Kim, L.-F. Zhu, L. E. Schock	
Anionic synthesis of chain-end functionalized polymers	47
5. Ph. Teyssié*, R. Fayt, J. P. Hautekeer, C. Jacobs, R. Jérôme, L. Leemans, S. K. Varshney	
New prospects for "living" anionic polymerization of (meth)acrylic esters	61
6. D. Y. Sogah*, W. R. Hertler, I. B. Dicker, P. A. DePra, J. R. Butera	
Catalyzed silicon-mediated living polymerizations. Structure control, catalyst design and mechanisms	75
7. A. H. E. Müller	
Group transfer and anionic polymerization: A critical comparison	87
8. J. Šebenda	
Effect of reaction medium on ionic lactam polymerization	105
9. J. P. Kennedy	
Recent developments in living carbocationic polymerization of alkenes ..	119
10. M. Sawamoto*, T. Higashimura	
Design and initiators of living cationic polymerization of vinyl monomers	131
11. M. Zsuga, J. P. Kennedy*, T. Kelen	
A chemical approach to the problem of slow initiation in living cationic polymerizations	145
12. T. Biedron, R. Szymanski, P. Kubisa, S. Penczek*	
Kinetics of polymerization by activated monomer mechanism	155
13. E. Franta*, J. Refai, C. Durand, L. Reibel	
Block copolymers of polyacetals	169

14.	O. Nuyken*, H. Kröner, S. Aechtner Living cationic polymerization of vinyl ethers	181
15.	V. Héroguez, A. Deffieux, M. Fontanille* Living cationic polymerization of 2-chloroethyl vinyl ether: Kinetics, mechanism and application to polymer synthesis	199
16.	P. Sigwalt On the nature of active species in cationic ring-opening polymerization of cyclodimethylsiloxanes	217
17.	D. Fish, I. M. Khan, J. Smid* Anionic ring opening polymerization of cyclotetrasiloxanes with large substituents	241
18.	S. Inoue*, T. Aida, M. Kuroki, Y. Hosokawa Living polymerizations of acrylic monomers with aluminoporphyrin ..	255
19.	B. Rozenberg The features of cationic polymerization of lactones under the action of onium salts	267
20.	H. R. Kricheldorf*, I. Kreiser-Saunders, N. Scharnagl Anionic and pseudoanionic polymerization of lactones – a comparison	285
21.	P. H. Plesch Developments in the theory of cationic polymerization. Part IX. Some effects of the complex formation between cations and monomers.....	299

* In papers with more than one author the asterisk indicates the name of the author to whom inquiries should be addressed.
