

Contents

Program Committee	xi
Series Foreword	xiii
Preface	xv
Referees	xvii

Programming Environments

Temporal Debugging and its Visual Animation <i>Yosee Feldman, Ehud Shapiro</i>	3
-----------------------------------------------------------------------------------	---

Abstract Views of Prolog Executions in Opium <i>Mireille Ducassé</i>	18
-------------------------------------------------------------------------	----

Non-Horn Programs

A Complete Top-Down Interpreter for First Order Programs <i>Taisuke Sato, Fumio Motoyoshi</i>	35
--------------------------------------------------------------------------------------------------	----

An Alternative Characterization of Disjunctive Logic Programs <i>David W. Reed, Donald W. Loveland, Bruce T. Smith</i>	54
---------------------------------------------------------------------------------------------------------------------------	----

Non-Monotonicity I

Well-Founded Semantics, Generalized <i>Melvin C. Fitting</i>	71
-----------------------------------------------------------------	----

Stable Theories for Logic Programs <i>A. C. Kakas, P. Mancarella</i>	85
-------------------------------------------------------------------------	----

Reasoning about Programs I

Automatic Generation of Simplification Lemmas for
Inductive Proofs 103
Laurent Fribourg

A General Criterion for Avoiding Infinite Unfolding
During Partial Deduction of Logic Programs 117
Maurice Bruynooghe, Danny De Schreye, Bern Martens

Concurrency and Parallelism I

A Simulation Study of Or- and Independent
And-Parallelism 135
Kish Shen, Manuel V. Hermenegildo

IDIOM: Integrating Dependent And-, Independent And-,
and Or-Parallelism 152
*Gopal Gupta, Vítor Santos Costa, Rong Yang, Manuel V.
Hermenegildo*

Programming Paradigms of the Andorra Kernel Language 167
Sverker Janson, Seif Haridi

Types and Rewriting

Typed Feature Structures: A Generalization of First-Order
Terms 187
Bob Carpenter

Typed Prolog: A Semantic Reconstruction of the
Mycroft-O'Keefe Type System 202
T. K. Lakshman, Uday S. Reddy

Non-Classical Logics I

A Clausal Logic for Deontic Action Specification
(Extended Abstract) 221
Ron van der Meyden

A Modal Reconstruction of Blocks and Modules in Logic
Programming 239
Laura Giordano, Alberto Martelli

Warren Abstract Machine

A New Scheme for Unification in WAM 257
André Mariën, Bart Demoen

Extending the Warren Abstract Machine to Polymorphic Order-
 Sorted Resolution 272
Christoph Beierle, Gregor Meyer, Heiner Semle

Non-Classical Logics II

Higher-Order Horn Logic Programming 289
William W. Wadge

The Uniform Proof-Theoretic Foundation of Linear Logic
 Programming (Extended Abstract) 304
James Harland, David Pym

Bottom-Up Evaluation

Top-Down vs. Bottom-Up Revisited 321
Raghu Ramakrishnan, S. Sudarshan

Magic Sets and Bottom-Up Evaluation of Well-Founded Models 337
David B. Kemp, Divesh Srivastava, Peter J. Stuckey

Language Constructs

Using Dynamic Predicates in an Or-Parallel Prolog System 355
Péter Szeredi

A Declarative Alternative to “Assert” in Logic Programming 372
Scott Dietzen, Frank Pfenning

Semantics of Logic Programs with Aggregates 387
David B. Kemp, Peter J. Stuckey

Constraints I

Intelligent Backtracking for CLP Languages: An Application to
 CLP(\mathcal{R}) 405
Bruno De Backer, Henri Beringer

Some Global Compile-Time Optimizations for CLP(\mathcal{R}) 420
Niels Jørgensen, Kim Marriott, Spiro Michaylov

Abstract Interpretation of Constraints on Order-Sorted Domains <i>Yves Caseau</i>	435
Concurrency and Parallelism II	
Copy Avoidance through Compile-Time Analysis and Local Reuse <i>Ian Foster, Will Winsborough</i>	455
A Static Load Partitioning Method Based on Execution Profile for Committed Choice Languages <i>Yasuo Hidaka, Hanpei Koike, Jun'ichi Tatemura, Hidehiko Tanaka</i>	470
Reforming Compilation of Logic Programs <i>Håkan Millroth</i>	485
Reasoning about Programs II	
Automatic Termination Proofs for Prolog Programs Operating on Nonground Terms <i>Lutz Plümer</i>	503
A Termination Test for Logic Programs <i>Yehoshua Sagiv</i>	518
NSTO Programs (Not Subject To Occur-Check) <i>Pierre Deransart, Gérard Ferrand, Michel Téguia</i>	533
Non-Monotonicity II	
Relating Dempster-Shafer Theory to Stable Semantics <i>Raymond T. Ng, V. S. Subrahmanian</i>	551
Counterfactual Reasoning Based on Revising Assumptions <i>Luís Moniz Pereira, Joaquim Nunes Aparício, José Júlio Alferes</i>	566
Applications	
Experiences from a Large Industrial Circuit Design Application <i>Thomas Filkorn, Richard Schmid, Erik Tidén, Peter Warkentin</i>	581
Prolog Testing of C Modules <i>Paul Strooper, Daniel Hoffman</i>	596

Program Transformation and Synthesis

Derivation of Efficient Logic Programs by Synthesizing New
Predicates 611
Tadashi Kawamura

Program Transformation under the Principle of Proof as
Program 626
Hideaki Nakayama

Synthesis of a Family of Recursive Sorting Procedures 641
Kung-Kiu Lau, Steven D. Prestwich

Constraints II

Temporal Logic Programming and its Relation to Constraint
Logic Programming 661
Christoph Brzoska

Integrating Numerical and Qualitative Models within
Constraint Logic Programming 678
Igor Mozetič, Christian Holzbaur

True-Concurrency in Concurrent Constraint Programming 694
Ugo Montanari, Francesca Rossi

Invited Talks

Reasoning and Programming: Analogies between Logic and
Computation 717
Johan van Benthem

Fifth Generation Computer Project: Towards Large-Scale
Knowledge Information Processing 719
Koichi Furukawa

Advanced Tutorials

Non-Monotonic Reasoning and Logic Programming 735
Teodor C. Przymusiński

Using Compositional Programming to Write Portable, High-
Performance Parallel Programs 737
Ian Foster, Carl Kesselman, Steve Taylor

Author Index 739
