

TABLE OF CONTENTS

EDITORIAL	vii
The Evolution of Data Memory and Storage: An Overview <i>Walter E. Proebster</i>	1
Optimizing Logic for Speed, Size, and Testability <i>Robert K. Brayton and Alexander Saldanha</i>	25
VLSI Architectures for Digital Video Signal Processing <i>P. Pirsch</i>	65
Compiler Techniques for Massive Parallel Architectures <i>Lothar Thiele</i>	101
Programmable Cellular Neural Networks. A State-of-the-art <i>Tamás Roska</i>	151
Developments in Parallel Programming Languages <i>R. H. Perrott</i>	169
Load Balancing Grid-Oriented Applications on Distributed Memory Parallel Computers <i>D. Roose, J. de Keyser and R. van Driessche</i>	191
Strategic Decision Analysis and Group Decision Support <i>Simon French</i>	217
Ten Years of Advances in Machine Learning <i>Y. Kodratoff</i>	231
Designing Logic Programming Languages <i>J. W. Lloyd</i>	263
Efficient Bottom-up Evaluation of Logic Programs <i>Raghu Ramakrishnan, Divesh Srivastava and S. Sudarshan</i>	287
Proving Correctness of Executable Programs <i>Kit Lester</i>	325

Direct Manipulation as a Basis for Constructing Graphical User Interfaces Coupled to Application Functions <i>Jan van den Bos</i>	355
Visualization of Volumetric Medical Image Data <i>K.J. Zuiderveld and M.A. Viergever</i>	363
Scientific Visualization <i>J.J. van Wijk</i>	387
Picture Archiving and Communication Systems: A Service <i>R. Mattheus</i>	397
