

## Contents

<i>Preface</i> . . . . .	v
<b>Section 1: New Materials and Emerging Technology</b>	
Thermal Fatigue of an Yttrium-Modified Single-Crystal Superalloy . . . . .	1
F. MEYER-OLBERSLEBEN,* W. DORNER,** D. GOLDSCHMIDT** and F. RÉZAI-ARIA* (* <i>Swiss Federal Institute of Technology, Lausanne, Switzerland,</i> ** <i>MTU Motoren- und Turbinen-Union GmbH, Munich, FRG</i> )	
High Temperature Fatigue Behaviour of a Mechanically Alloyed ODS Nickel Base Superalloy . . . . .	7
M. MARCHIONNI and G. ONOFRIO ( <i>CNR-ITM, Cinisello B., Italy</i> )	
Thermo-Mechanical Fatigue of Metal Matrix Composites . . . . .	13
M. KARAYAKA and H. SEHITOGLU ( <i>University of Illinois, Urbana, IL, USA</i> )	
The Low Cycle Fatigue Behaviour of Titanium Alloys . . . . .	19
J. U. SPECHT ( <i>MTU Motoren- und Turbinen-Union GmbH, Munich, FRG</i> )	
Fatigue Behavior of Ceramics under Static and Cyclic Loading . . . . .	25
C.-K. J. LIN and D. F. SOCIE ( <i>University of Illinois, Urbana, IL, USA</i> )	
Cyclic Deformation and Low-Cycle Failure of Graphites . . . . .	31
D. A. GOKHFELD, A. O. CHERNIAVSKY, S. V. LEZHNEV, O. S. SADAKOV and A. G. SHVETSOV ( <i>Cheliabinsk State Technical University, Russia, CIS</i> )	
The Effect of Waveform on Low Cycle Fatigue of PC . . . . .	37
J. REMMERSWAAL ( <i>Delft University of Technology, Delft, The Netherlands</i> )	
Low Cycle Fatigue in WC-Co Cemented Carbides . . . . .	43
K. ORBTLÍK, J. POLÁK, M. HÁJEK ( <i>Institute of Physical Metallurgy, Czechoslovak Academy of Sciences, Brno, Czechoslovakia</i> ) and J. VRBKA ( <i>Technical University, Brno, Czechoslovakia</i> )	

Redistribution of Residual Stresses during Fatigue . . . . .	49
S. WU, Y. LIN AND A. ABEL ( <i>University of Sydney, Australia</i> )	

## Section 2: Microstructural Aspects

Microstructure and Fatigue ( <i>Invited Lecture</i> ) . . . . .	56
H.-J. CHRIST and H. MUGHRABI ( <i>University of Erlangen-Nürnberg, Erlangen, FRG</i> )	
Low Cycle Fatigue of Nitrogen Alloyed Martensitic Stainless Steels. . . . .	70
J.-B. VOGT,* C. BIGEON,* G. STEIN** and J. FOCT* ( <i>* University of Lille, Villeneuve d'Ascq, France, ** VSG Schmiedewerke GmbH, Essen, FRG</i> )	
Low Cycle Fatigue of a Duplex Stainless Steel Alloyed with Nitrogen. . . . .	76
G. DEGALLAIX, A. SEDDOUKI and S. DEGALLAIX ( <i>Ecole Centrale de Lille, France</i> )	
Microstructurally-Based Simulation of Multiaxial Low-Cycle Fatigue Damage of 316L Stainless Steel in Terms of the Behaviour of a Crack Population. . . . .	82
J. WEISS and A. PINEAU ( <i>Ecole des Mines, Evry, France</i> )	
Study on Metallography of Low Cycle Creep Fatigue Fracture of Type 316 Stainless Steels . . . . .	88
T. NAKAZAWA, N. FUJITA ( <i>Nippon Steel Corporation, Chiba-ken, Japan</i> ), H. KAGUCHI ( <i>Mitsubishi Heavy Industries Ltd, Kobe, Japan</i> ), H. KANEKO ( <i>Mitsubishi Heavy Industries Ltd, Hyogo-ken, Japan</i> ) and H. UEDA ( <i>Tokyo Electric Power Company, Tokyo, Japan</i> )	
Elasto-Plastic Behaviour of IN 718 Containing the $\delta$ -Ni <sub>3</sub> Cb Precipitation Phase . . . . .	94
KH.-G. SCHMITT-THOMAS and J. SCHMITT ( <i>Technical University of Munich, FRG</i> )	
The Role of Microstructural Processes in the Application of the Incremental Step Test to Determine the Cyclic Stress-Strain Curve of an Aluminium Alloy . . . . .	100
H.-J. CHRIST, K. LADES, L. VÖLKL and H. MUGHRABI ( <i>University of Erlangen-Nürnberg, Erlangen, FRG</i> )	
The Influence of Mechanical Prehistory on the Cyclic Stress-Strain Response and Microstructure of Single-Phase Metallic Materials . . . . .	106
G. HOFFMANN, O. ÖTTINGER and H.-J. CHRIST ( <i>University of Erlangen-Nürnberg, Erlangen, FRG</i> )	

A Study of Fatigue Damage Using the Electrical Potential Method . . . . .	112
M. J. HYDER, D. A. WOODFORD and L. F. COFFIN ( <i>Rensselaer Polytechnic Institute, Troy, NY, USA</i> )	
Quantitative Fractography of Fatigue Fracture in Nodular Iron . . . . .	118
R. G. BAGGERLEY ( <i>Kenworth Truck Co., Kirkland, WA, USA</i> ) and T. ARCHBOLD ( <i>University Of Washington, Seattle, WA, USA</i> )	
The Effect of Microstructure on the Low-Cycle Fatigue Behavior of Ductile Cast Iron . . . . .	124
S. HARADA, Y. AKINIWA and T. UEDA ( <i>Kyushu Institute of Technology, Kitakyushu, Japan</i> )	
Quantitative Relations between the Structure of Cast Iron and its Mechanical Properties Obtained by Means of Modified LCF-Method to Determine Allowable Strains . . . . .	130
A. KARAMARA ( <i>Instytut Odlewnictwa, Cracow, Poland</i> ) and K. PIETRZAK ( <i>Instytut Mechaniki Precyzyjnej, Warsaw, Poland</i> )	
Microstructural Effect Controlling Exhaustion of Ductility in Extremely Low Cycle Fatigue . . . . .	136
J. KOMOTORI and M. SHIMIZU ( <i>Keio University, Yokohama, Japan</i> )	
Microstructural Changes vs. Accumulation of Energy in Fatigue Tested Medium-Carbon Steel . . . . .	142
W. DUDZIŃSKI, J. KALETA and K. WIDANKA ( <i>Technical University of Wrocław, Poland</i> )	
The Influence of Laser Transformation Hardening on Fatigue Crack Initiation of 40Cr Steel . . . . .	148
C. S. LIU, Q. K. CAI and H. XU ( <i>Northeastern University of Technology, Shenyang, PR China</i> )	
Microstructural Aspects of Low Cycle Fatigue of Pearlitic Steels . . . . .	154
J. DZIUBIŃSKI ( <i>Silesian Technical University, Gliwice, Poland</i> )	
Grain-Size Dependence of the Fatigue Properties of Ni-20at.%Cr . . . . .	160
K. WOLF,* H. A. CALDERON,* P. VOGEL,* D. JUUL JENSEN** and G. KOSTORZ* (* <i>ETH Zürich, Switzerland</i> , ** <i>Risø National Laboratory, Denmark</i> )	
Influence of Time and Temperature on Crack Growth Rate in the P/M Nickelbase Alloy Udimet 700 with Three Different Microstructures . . . . .	166
E. E. AFELDT, H. FLÖGE and G. W. KÖNIG ( <i>MTU Motoren- und Turbinen-Union GmbH, Munich, FRG</i> )	

Dynamics of Cyclic Plastic Straining in Copper Single Crystals . . . . .	172
J. HELEŠIČ and J. POLÁK ( <i>Institute of Physical Metallurgy, Czechoslovak Academy of Sciences, Brno, Czechoslovakia</i> )	

### Section 3: High Temperature LCF

Creep–Fatigue–Oxidation Interactions on the High Temperature Low-Cycle Fatigue Damage of Austenitic Stainless Steels: Past, Current and Future ( <i>Invited Lecture</i> ) . . . . .	178
A. PINEAU ( <i>Ecole des Mines, Evry, France</i> )	
Thermal Fatigue of Pearlitic Nodular Cast Iron . . . . .	180
R. HALLSTEIN,* D. EIFLER,** D. LÖHE*** and E. MACHERAUCH* ( <i>* University of Karlsruhe, FRG, ** University of Essen, FRG, *** University of Paderborn, FRG</i> )	
Duplex Steel under Thermal Cycling: Experiments and a Micromechanical Model . . . . .	186
TH. SIEGMUND, F. D. FISCHER and K. L. MAURER ( <i>University of Mining and Metallurgy, Leoben, Austria</i> )	
Thermal Fatigue Anisotropy of the Oxide Dispersion Strengthened Nickel Base Superalloy Inconel MA 760 . . . . .	192
B. DEMESTRAL, G. EGGELER and N. MERK ( <i>Swiss Federal Institute of Technology, Lausanne, Switzerland</i> )	
Thermomechanical Fatigue on Turboengine Superalloys . . . . .	198
J. Y. GUÉDOU and Y. HONNORAT ( <i>SNECMA, Evry, France</i> )	
Mechanical Behaviour and Microstructure of an ODS-Superalloy Tested under LCF and TMF Loading . . . . .	204
E. VASSEUR and L. RÉMY ( <i>Ecole des Mines, Evry, France</i> )	
Creep–Fatigue Damage Evaluation of Modified 9Cr–1Mo Steel Based on the Overstress Concept . . . . .	210
M. YAGUCHI, Y. OKAMOTO, T. NAKAMURA and Y. ASADA ( <i>University of Tokyo, Japan</i> )	
Crack Growth in Low Cycle Fatigue with Compressive Hold for 1Cr–Mo–V and 12Cr–Mo–V Steels . . . . .	216
S. W. NAM, Y. J. OH and B. O. KONG ( <i>Korea Advanced Institute of Science and Technology, Seoul, Korea</i> )	
A Physically Based Model for Predicting LCF Life under Creep Fatigue Interaction . . . . .	222
K.-T. RIE and J. OLFE ( <i>Technical University of Braunschweig, FRG</i> )	

Study on Fracture Mechanism and a Life Estimation Method for Low Cycle Creep-Fatigue Fracture of Type 316 Stainless Steels. . . . .	229
H. KANEKO, T. SAKON ( <i>Mitsubishi Heavy Industries Ltd, Hyogo-ken, Japan</i> ), H. KAGUCHI ( <i>Mitsubishi Heavy Industries Ltd, Kobe, Japan</i> ), T. NAKAZAWA, N. FUJITA ( <i>Nippon Steel Corporation, Chiba-ken, Japan</i> ) and H. UEDA ( <i>Tokyo Electric Power Company, Tokyo, Japan</i> )	
Creep-Fatigue Behaviour of Heat Resistant Steels under Service-Type Long-Term Conditions . . . . .	235
J. GRANACHER and A. SCHOLZ ( <i>Technische Hochschule Darmstadt, FRG</i> )	
Evaluation of Creep-Fatigue Interaction Based on Creep Damage Mode . . . . .	242
K. YAGI and K. KUBO ( <i>National Research Institute for Metals, Tokyo, Japan</i> )	
High Temperature Inelastic Deformation of IN 738 LC under Uniaxial and Multiaxial Loading . . . . .	248
J. ZIEBS, J. MEERSMANN, H.-J. KÜHN and S. LEDWORUSKI ( <i>Bundesanstalt für Materialforschung und -prüfung, Berlin, FRG</i> )	
High Temperature LCF Behaviors of DS Superalloys . . . . .	256
J. Z. XIE ( <i>Institute of Aeronautical Materials, Beijing, PR China</i> )	
Fatigue and Short Crack Propagation Behaviour of Cast Nickel Base Alloys IN 713 C and MAR-M-247 LC at High Temperatures . . . . .	262
C. M. SONSINO, U. BRANDT ( <i>Fraunhofer-Institut für Betriebsfestigkeit, Darmstadt, FRG</i> ) and J. BERGMANN ( <i>IABG mbH, Ottobrunn, FRG</i> )	
Behaviour of Austenitic Steel in Plane Stress State under Thermal Cycling . . . . .	269
R. ŻUCHOWSKI and A. KRAJCYK ( <i>Technical University of Wrocław, Poland</i> )	
Hold Time Influence on the Thermal Fatigue Behaviour of Austenitic and Martensitic Stainless Steels . . . . .	275
A. F. ARMAS, I. ALVAREZ-ARMAS ( <i>Instituto de Física Rosario, Argentina</i> ) and C. PETERSEN ( <i>Nuclear Research Centre, Karlsruhe, FRG</i> )	
Three Dimensional Thermal Strain and Stress Analysis of Single Edge Wedge Specimens . . . . .	281
A. L. RAMTEKE, F. MEYER-OLBERSLEBEN and F. RÉZAI-ARIA ( <i>Swiss Federal Institute of Technology, Lausanne, Switzerland</i> )	
Low Cycle Thermal-Mechanical Fatigue on 316L Steel . . . . .	287
H. J. SHI, C. ROBIN and G. PLUVINAGE ( <i>University of Metz, France</i> )	

Creep Behaviour of the Superalloy IN738LC under Superimposed Creep-Fatigue Loading . . . . .	293
H. CHEN, W. CHEN, H. WEVER ( <i>Technical University of Berlin, FRG</i> ), F. JIAO and R. P. WAHI ( <i>Hahn-Meitner-Institut GmbH, Berlin, FRG</i> )	
Low Cycle Fatigue Behaviour of IN 738LC at 1223 K . . . . .	298
F. JIAO, J. ZHU, R. P. WAHI ( <i>Hahn-Meitner-Institut GmbH, Berlin, FRG</i> ), H. CHEN, W. CHEN and H. WEVER ( <i>Technical University of Berlin, FRG</i> )	
<b>Section 4: Multiaxial Conditions</b>	
Cyclic Deformation and Crack Initiation in Tubes under Multiaxial Loading . . . . .	304
B. WINDELBAND,* B. SCHINKE** and D. MUNZ* ( <i>*University of Karlsruhe, FRG, **Nuclear Research Centre, Karlsruhe, FRG</i> )	
Cyclic Deformation and Fatigue Life Prediction of Anisotropic Al-6061-T6 Rods under Biaxial Loadings . . . . .	311
H. LIN and H. NAYEB-HASHEMI ( <i>Northeastern University, Boston, MA, USA</i> )	
Comparison of the Prediction Capability of Crack Initiation Life Prediction Methods for Biaxial Loading Conditions . . . . .	317
A. NURTJAHJO ( <i>LUK, Serpong, Indonesia</i> ), W. OTT ( <i>FH Niederrhein, Krefeld, FRG</i> ), R. MARISSSEN ( <i>DSM, Geleen, The Netherlands</i> ), K.-H. TRAUTMANN ( <i>DLR, Cologne, FRG</i> ) and H. NOWACK ( <i>University of Duisburg, FRG</i> )	
The Multiaxial Rainflow Method . . . . .	325
K. DRESSLER, R. CARMINE and W. KRÜGER ( <i>Tecmath GmbH, Kaiserslautern, FRG</i> )	
The Criterion of Thermal Fatigue in Biaxial Stress States. . . . .	331
J. GALICKI and A. JAKOWLUK ( <i>Technical University of Bialystok, Poland</i> )	
Multiaxial Low Cycle Fatigue of Mar-M247LC DS Superalloy at Elevated Temperature . . . . .	337
M. SAKANE,* M. OHNAMI,* N. SHIRAHUI** and K. SHIMOMIZUKI* ( <i>*Ritsumeikan University, Kyoto, Japan, **Maizuru Technical College, Kyoto, Japan</i> )	
Creep Relaxation from an Initial Biaxial Stress State . . . . .	343
A. M. GOODMAN and R. HALES ( <i>Nuclear Electric plc, Berkeley, Gloucs, UK</i> )	

Plastic Strain Energy in Low-Cycle Fatigue . . . . .	349
M. GIGLIO and L. VERGANI ( <i>Politecnico di Milano, Italy</i> )	
A Modeling of Fatigue Crack Growth in Notched Specimen Subjected to Complex Stresses and its Application to Life Assessment . . . . .	356
T. HOSHIDE, T. OGAKI and T. INOUE ( <i>Kyoto University, Japan</i> )	
Multiaxial Low Cycle Fatigue of a Normalized Carbon Steel . . . . .	362
H. BOMAS, M. LOHRMANN, G. LÖWISCH and P. MAYR ( <i>Institut für Werkstofftechnik, Bremen, FRG</i> )	
LCF-Experiments on Single- and Poly-crystalline Metals—SRR99 and IN 738 LC—under Uniaxial and Multiaxial Strain Controlled Loading Conditions . . . . .	369
J. ZIEBS, K. NASEBAND and H.-J. KÜHN ( <i>Bundesanstalt für Material- forschung und -prüfung, Berlin, FRG</i> )	
A Description of Dynamic Creep and a Failure Criterion of the AlMgSi Alloy in Biaxial Stress States . . . . .	375
W. JERMOLAJ ( <i>Technical University of Bialystok, Poland</i> )	
Reinforced Concrete Beams under Multiaxial Loading: Weakness of Elasto- Plastic Idealizations . . . . .	381
R. BAIRRÃO ( <i>LNETI/ICEN/DEEN, Sacavém, Portugal</i> )	
<b>Section 5: Constitutive Equations</b>	
A Constitutive Relation for Transient and Stable Cyclic Loading ( <i>Invited Lecture</i> ) . . . . .	387
F. ELLYIN ( <i>University of Alberta, Edmonton, Canada</i> )	
Constitutive Equations for Cyclic Damage Evolution . . . . .	399
A. PLUMTREE and G. SHEN ( <i>University of Waterloo, Ontario, Canada</i> )	
Verification of a Microstructure-Related Constitutive Model by Optimized Identification of Material Parameters . . . . .	405
U. EGGERS ( <i>Technical University of Braunschweig, FRG</i> )	
A Unified Model Approach Combining Rate-Dependent and Rate- Independent Plasticity . . . . .	411
E.-R. TIRPITZ and M. SCHWESIG ( <i>Technical University of Braunschweig, FRG</i> )	

Constitutive Equations for Elastic-Plastic Material Behaviour under Extremely High Multiaxial Loads and Fatigue Loads . . . . .	418
F. U. MATHIAK, F. A. FUCHS ( <i>INPRO, Berlin, FRG</i> ), W. OTT ( <i>FH Niederrhein, Krefeld, FRG</i> ), K.-H. TRAUTMANN ( <i>DLR, Cologne, FRG</i> ), E. MALDFELD and H. NOWACK ( <i>University of Duisburg, FRG</i> )	
Unified Inelastic Constitutive Equation for Cyclic Loading at High Temperature and its Application to 304 Stainless Steel and 2 $\frac{1}{4}$ Cr-1Mo Steel . . . . .	424
T. NAKAMURA and Y. ASADA ( <i>University of Tokyo, Japan</i> )	
Cyclic Thermoviscoplasticity of an Aluminium Alloy AS5U3: Experiments and Modelization . . . . .	430
B. BELHEDI and P. DELOBELLE ( <i>UFR Sciences et Techniques, Besançon, France</i> )	
Generalization of the Kocks–Mecking Type Constitutive Model for Cyclic Deformation Description of Metals . . . . .	436
M. A. PERZYK ( <i>Warsaw University of Technology, Poland</i> )	
Concept to Improve the Approximation of Material Functions in Unified Models . . . . .	442
H. BRAASCH ( <i>Technical University of Braunschweig, FRG</i> )	
Constitutive Equations for Modelling Elasto-Plastic Cyclic Behaviour of Structural Materials . . . . .	448
V. KOSARCHUK and S. MELNIKOV ( <i>Institute for Problems of Strength, Academy of Sciences, Kiev, Ukraine, CIS</i> )	
Application of a Transient Cyclic Plasticity Model for Determination of the Incremental Step Test Material Curve . . . . .	453
B. SKALLERUD ( <i>SINTEF Structural Engineering, Trondheim, Norway</i> ) and A. F. BLOM ( <i>Aeronautical Research Institute (FFA), Bromma, Sweden</i> )	
Description of the CSSc by a Certain Class of Elastic-Plastic Models . . . . .	459
J. KALETA and G. ZIETEK ( <i>Technical University of Wroclaw, Poland</i> )	
Modelling Elastoplastic Deformations in Grey Cast Iron . . . . .	465
B. L. JOSEFSON and H. E. HJELM ( <i>Chalmers University of Technology, Göteborg, Sweden</i> )	
Hysteresis Energy and Fatigue Life of Selected Sintered Steels . . . . .	473
J. KALETA ( <i>Technical University of Wroclaw, Poland</i> ) and A. PIOTROWSKI ( <i>University of Essen, FRG</i> )	
Constitutive Equations for Fiber Reinforced Polyamides . . . . .	479
S. BERETTA and P. DAVOLI ( <i>Politecnico di Milano, Italy</i> )	

Probabilistic Method of Evaluating Fatigue Life of Aircraft Structure Components . . . . .	485
S. KOCANĀDA and H. TOMASZEK ( <i>Military Technical Academy, Warsaw, Poland</i> )	
<b>Section 6: Short Cracks and Macrocracks</b>	
Microcrack Density as an Indication of Accumulated Fatigue Damage . . . . .	490
K. IIDA ( <i>Shibaura Institute of Technology, Tokyo, Japan</i> )	
A Description of Short Fatigue Crack Behaviour Based on Surface Strain Redistribution . . . . .	496
H. ABDEL-RAOŪF ( <i>Zagazig University, Egypt</i> ), T. H. TOPPER and A. PLUMTREE ( <i>University of Waterloo, Ontario, Canada</i> )	
Short Crack Growth and Fatigue Life Evaluation . . . . .	502
J. POLÁK, P. LIŠKUTÍN and A. VAŠEK ( <i>Institute of Physical Metallurgy, Czechoslovak Academy of Sciences, Brno, Czechoslovakia</i> )	
Effects of Energy Dissipation and Energy Screening on Fatigue Crack Extension in Viscoelastic-Plastic Solids . . . . .	508
M. P. WNUK ( <i>University of Wisconsin, Milwaukee, WI, USA</i> )	
The $\Delta J$ -Integral and the Relation between Deformation Behaviour and Microstructure in the LCF-Range . . . . .	514
K.-T. RIE, H. WITTKE ( <i>Technical University of Braunschweig, FRG</i> ) and R. SCHUBERT ( <i>ERNO, Bremen, FRG</i> )	
Methods for Material Characterization in the Range of High Crack Growth Rates . . . . .	521
D. HELLMANN and K.-H. SCHWALBE ( <i>GKSS Research Centre Geesthacht, FRG</i> )	
Small Crack Behavior and Assessment of High Temperature Fatigue Damage for 2.25Cr-1Mo Steel . . . . .	527
I. NONAKA and M. KITAGAWA ( <i>Ishikawajima-Harima Heavy Industries Co., Ltd, Tokyo, Japan</i> )	
Transition from Small Crack to Large Crack on Creep-Fatigue Crack Propagation . . . . .	533
R. OHTANI, T. KITAMURA, N. TADA and S. IIO ( <i>Kyoto University, Japan</i> )	
Naturally Initiated Fatigue Small Crack Growth in a Single Crystal Ni-Base Superalloy at Elevated Temperature . . . . .	539
M. OKAZAKI, T. IMAI ( <i>Nagaoka University of Technology, Japan</i> ) and S. NOHMI ( <i>Kawasaki Heavy Industries Co., Akashi, Japan</i> )	

The Effect of the Compressive Stress–Strain Excursion on the Elastic-Plastic Small Crack Growth in Alloy 718 at 650°C . . . . .	545
A. H. ROSENBERGER and H. GHONEM ( <i>University of Rhode Island, Kingston, RI, USA</i> )	
The Effect of Superimposed Vibrational Stress on Low Cycle Fatigue Crack Propagation Behaviour . . . . .	552
B. E. POWELL, R. F. HALL and M. HAWKYARD ( <i>Portsmouth Polytechnic, UK</i> )	
Transient Effects in the Cyclic Crack Growth of Engineering Materials . . . . .	558
K. M. NIKBIN ( <i>Imperial College of Science, Technology and Medicine, London, UK</i> )	
Computation of the Crack Extension Energy Rate in Elasto-Plastic Fracture Mechanics and Applications in Engineering . . . . .	564
M. CHIARELLI, A. FREDIANI ( <i>University of Pisa, Italy</i> ) and M. LUCCHESI ( <i>University of Chieti, Italy</i> )	
The Growth of Fatigue Short Crack Emanating from Small Holes in 16Mn Steel Specimens . . . . .	570
W. M. WANG, Y. H. HUANG, H. XU and G. J. SUEN ( <i>Northeastern University of Technology, Shenyang, PR China</i> )	
Low-Cycle Fatigue of Cyclic Hardening and Softening Materials . . . . .	576
Y. FUKUSHIMA, S. HARADA and Y. AKINIWA ( <i>Kyushu Institute of Technology, Kitakyushu, Japan</i> )	
Crack Initiation and Low-Cycle Fatigue Behaviour of AlZnMgCu 1.5, X10 NiCrAlTi 32 20 and X2 NiCoMo 18 12 . . . . .	582
R. ADOLFS and K. DETERT ( <i>University of Siegen, FRG</i> )	
Microcrack Growth in Al 2024 and its Effect on Fatigue Life in the LCF-Regime . . . . .	588
J. K. GREGORY ( <i>GKSS Research Centre Geesthacht, FRG</i> ) and L. WAGNER ( <i>Technical University of Hamburg-Harburg, FRG</i> )	
Low Cycle Fatigue Crack Initiation and Growth at Room and Elevated Temperatures . . . . .	594
Y. DAI, N. J. MARCHAND ( <i>Ecole Polytechnique, Montréal, Québec, Canada</i> ) and M. HONGO (Pratt & Whitney Canada, Longueuil, Québec, Canada)	
Study on Fatigue Crack Propagation Rate in Welded Joints . . . . .	601
H. R. YANG ( <i>Shenyang College of Metallurgical Machinery, Shenyang, PR China</i> ), D. J. WANG and H. XU ( <i>Northeastern University of Technology, Shenyang, PR China</i> )	

- Numerical Study of Fatigue Crack in Welded Joints . . . . . 607  
 R. BERKELIS and M. DAUNYS (*University of Technology, Kaunas, Lithuania*)

### Section 7: Environmental Aspects

- Effect of Hold Time and Crevice Corrosion on LCF-Behaviour of Turbine Steels in Boiler Feed Water at 90°C . . . . . 613  
 E. LACHMANN (*IABG mbH, Ottobrunn, FRG*)

- Fatigue and Fracture Behavior of Carbon Fiber Reinforced Plastic under Combined Tensile and Torsional Stress and Influences of Water Absorption 621  
 K. KOMAI, K. MINOSHIMA and T. MIKI (*Kyoto University, Japan*)

- Mechanisms of Hydrogen Embrittlement during Low Cycle Fatigue in Metastable Austenite . . . . . 627  
 M. LABIDI,\* M. HABASHI,\* M. TVRDÝ\*\* and J. GALLAND\*  
 (\**Ecole Centrale Paris, Chatenay-Malabry, France*, \*\**Research Institute of Vitkovice, Ostrava, Czechoslovakia*)

- The Effect of SO<sub>2</sub> Bearing Atmospheres on Fatigue Failure of SAF 2205 and 316 Stainless Steel at 700°C . . . . . 634  
 E. AGHION and A. MOLABA (*University of Natal, Durban, South Africa*)

- The Environment Enhanced Crack Growth Behaviour in Low Cycle Fatigue Regime at High Temperature . . . . . 639  
 K.-T. RIE and H. KLINGELHÖFFER (*Technical University of Braunschweig, FRG*)

### Section 8: Design Methods and Practical Experience

- A Numerical Procedure to Calculate Residual Stresses and Fatigue Life of Pressurized Components after Autofrettage . . . . . 644  
 M. SCHÖN, V. B. KÖTTGEN and T. SEEGER (*Technische Hochschule Darmstadt, FRG*)

- Simulation of the Multiaxial Loading Influence on the Fatigue Life of Materials and Structures under Operational Conditions . . . . . 651  
 J. ČAČKO (*Institute of Materials and Machine Mechanics of the Slovak Academy of Sciences, Bratislava, Czechoslovakia*)

- The Effect of Minor Cycles on the Growth Rate of Small Cracks in a Turbine Disc Alloy . . . . . 657  
 G. W. KÖNIG, B. NOWAK and E. E. AFFELDT (*MTU Motoren- und Turbinen-Union GmbH, Munich, FRG*)

LCF-Failure Analysis of an Aero-Engine Turbine Wheel . . . . .	664
U. HESSLER and B. DOMES ( <i>BMW Rolls-Royce GmbH, Oberursel, FRG</i> )	
Life Prediction and Microstructures of Dissimilar Metal Welds . . . . .	671
C. BRUTTI, F. GAUZZI and S. MISSORI ( <i>University of Rome, Italy</i> )	
Case Studies on Utilizing <i>J</i> -Integral to Low-Cycle Fatigue Problems . . . . .	678
D. AZODI and P. BACHMANN ( <i>Gesellschaft für Reaktorsicherheit (GRS) mbH, Cologne, FRG</i> )	
Elastic-Plastic Behaviour of a Simulated Transverse Fillet-Welded Lap Joint Subjected to In-Plane Tensile Loading . . . . .	683
S. W. K. CHAN ( <i>Nuclear Electric plc, Barnwood, Gloucs, UK</i> ) and M. H. OGLE ( <i>The Welding Institute, Abington, UK</i> )	
Low Cycle Fatigue of Welded Joints in a Low Alloy Ferritic Steel at 565°C . . . . .	689
J. LINDBLOM, L. LINDÉ, P. J. HENDERSON and R. SANDSTRÖM ( <i>Swedish Institute for Metals Research, Stockholm, Sweden</i> )	

### Section 9: Life Prediction

Low Cycle Fatigue Life Prediction of Fossil Plant Components ( <i>Invited Lecture</i> ) . . . . .	695
R. VISWANATHAN ( <i>Electric Power Research Institute, Palo Alto, CA, USA</i> )	
A Model for Damage and Lifetime Prediction Taking into Account the Backstress . . . . .	721
J. AKTAA ( <i>University of Karlsruhe, FRG</i> ) and B. SCHINKE ( <i>Nuclear Research Centre, Karlsruhe, FRG</i> )	
Thermodynamic Analysis of Fatigue Damage Process . . . . .	727
X. Y. TUNG and Q. X. YANG ( <i>Northwestern Polytechnical University, Xi'An, P R China</i> )	
The Fatigue Evolution of Fractal Defects in Metals . . . . .	733
M. RYBACZUK ( <i>Technical University of Wrocław, Poland</i> )	
Uncertainties in Low Cycle Fatigue Test Data and Reliability of Component Life Predictions . . . . .	739
V. BICEGO ( <i>CISE, Segrate (Milano), Italy</i> ) and S. RAGAZZONI ( <i>ENEL-CRTN, Milano, Italy</i> )	

LCF Behaviour of a Cast Steel . . . . .	745
J. SOLIN and J. PULKKI ( <i>Technical Research Centre of Finland, Espoo, Finland</i> )	
Effect of Single Over-Straining on Surface Crack Growth Behaviour of Low Cycle Fatigue in Ti-6Al-4V Alloy . . . . .	751
Y. OCHI, A. ISHII, S. K. SASAKI and I. OHDACHI ( <i>University of Electro-Communications, Tokyo, Japan</i> )	
Low-Cycle Fatigue Life Predictions of Circumferentially Notched Cylindrical Components . . . . .	757
K. HATANAKA, T. FUJIMITSU and J. OHMORI ( <i>Yamaguchi University, Ube City, Japan</i> )	
Notch Fatigue Behaviour of Nickel Base Alloys . . . . .	763
J. W. BERGMANN, P. HEULER and M. VORMWALD ( <i>IABG mbH, Ottobrunn, FRG</i> )	
Analysis of Local Stress-Strain State and Low-Cycle Fatigue of Components with Large Pad Stress-Coined Holes . . . . .	769
S. IVANOVA, O. LEVIN and N. MAKHUTOV ( <i>Mechanical Engineering Research Institute, Moscow, Russia, CIS</i> )	
Estimation of Creep-Fatigue Life from Creep and Fatigue Data: Extrapolation of Best-Fit Equation of SUS304 to Other Materials . . . . .	775
K. SONOYA, M. KITAGAWA and I. OMATA ( <i>Ishikawajima-Harima Heavy Industries Co., Ltd, Tokyo, Japan</i> )	
Effect of Local Fatigue Damage on High Temperature Slow Strain Rate Fracture Initiation . . . . .	781
Y. INO ( <i>Toyota Technological Institute, Nagoya, Japan</i> )	
Application of Viscoplastic Modelling to Creep-Fatigue Life Prediction . . . . .	787
P. AGATONOVIC ( <i>MAN Technologie AG, Munich, FRG</i> )	
Concept of Fatigue Effective Stress and Constitutive Equation of Damaged Material . . . . .	793
L. Y. XIE, H. XU and D. J. WANG ( <i>Northeastern University of Technology, Shenyang, PR China</i> )	
New Fatigue-Life Equation and Elasticity Modulus Defect . . . . .	799
A. PUŠKÁR ( <i>University of Transport and Communications, Žilina, Czechoslovakia</i> )	

Life of Structural Steels under Cyclic Loading at Complex Stress State . . . . .	805
F. F. GIGINYAK, A. A. LEBEDEV ( <i>Institute for Problems of Strength, Academy of Sciences, Kiev, Ukraine, CIS</i> ), B. T. TIMOFEEV ( <i>Central Research Institute of Structural Materials, St Petersburg, Russia, CIS</i> ), Y. G. DRAGUNOV, A. V. GETMANCHUK and V. F. TITOV ( <i>OKB 'Gidropress', Podolsk, Russia, CIS</i> )	
Fatigue Maps and Mean Load Dependences . . . . .	811
A. DEL PUGLIA, F. PRATESI and G. ZONFRILLO ( <i>University of Florence, Italy</i> )	
Multiaxial Loading in the Program STATES for Assessment of Limit States . . . . .	817
S. VEJVODA ( <i>Vitkovice, Institute of Applied Mechanics, Brno, Czechoslovakia</i> )	
Estimation of the Structural Members Low-Cycle Fatigue Durability . . . . .	823
T. LAMBER, J. OKRAJNI and M. PLAZA ( <i>Silesian University of Technology, Katowice, Poland</i> )	
Lifetime Prediction for Thermal Fatigue: Development of a Stochastic Model . . . . .	829
E. KULLIG,* H. RIESCH-OPPERMANN,** T. WINKLER*** and A. BRÜCKNER-FOIT* ( <i>*University of Karlsruhe, FRG, **Nuclear Research Centre, Karlsruhe, FRG, ***Institute for Mechanics, Chemnitz, FRG</i> )	
Bauschinger Effect during the Low Cycle Fatigue of Low Alloy and Pearlitic Steels and their Welds . . . . .	835
J. DZIUBIŃSKI ( <i>Silesian Technical University, Gliwice, Poland</i> ) and W. C. BRUNNÉ ( <i>Institute for Materials Management, Katowice, Poland</i> )	
Fatigue Life Prediction in High Strength Steel Weldments . . . . .	841
A. TRICOTEAUX, S. DEGALLAIX ( <i>Ecole Centrale de Lille, Villeneuve d'Ascq, France</i> ) and E. BOLLINGER ( <i>SOLLAC, Dunkerque, France</i> )	
Strength to Low Cycle Straining and Fracture of Mechanically Heterogeneous Welded Joints . . . . .	847
M. DAUNYS and J. MACIULEVICHIUS ( <i>University of Technology, Kaunas, Lithuania</i> )	
Steels Durable Strength in the Presence of Cavitation Wear . . . . .	853
O. S. BALABEKOV, A. I. AINABEKOV and YE. P. SUKHENKO ( <i>Kazakh Chemical Technology Institute, Chimkent, Kazakhstan, CIS</i> )	
Crack Initiation Kinetics Prior to Tensile Specimens Fracture . . . . .	859
G. S. PISARENKO, A. A. LEBEDEV and N. G. CHAUSOV ( <i>Institute for Problems of Strength, Academy of Sciences, Kiev, Ukraine, CIS</i> )	

**Late Submission**

Cyclic Plastic Deformation of Two RS Aluminium Alloys . . . . .	865
H. J. ROVEN ( <i>The Norwegian Institute of Technology, Trondheim, Norway</i> ), R. KYSETH and O. JENSRUD ( <i>Raufoss AS, Norway</i> )	
<i>Index of Contributors</i> . . . . .	871
<i>Subject Index</i> . . . . .	875
