

CONTENTS

Preface	xi
List of Contributors	xv
Section 1: Materials & Devices	
*Defect Aspects of Advanced Device Technologies	
<i>B. O. Kolbesen</i>	3
Field Effect Analysis in Low Voltage Operation a-Si:H Thin Film Transistors with Very Thin PECVD a-SiO ₂ Gate Dielectric	
<i>P. Foglietti, G. Fortunato, L. Mariucci and C. Reita</i>	27
*Silicon and Silicon: Germanium Alloy Growth; Means and Applications	
<i>B. S. Meyerson</i>	33
*Preparation and Characterization of Silicon Ribbons	
<i>S. Sivothythaman and M. Rodot</i>	49
Rapid Thermal Chemical Vapor Deposition of Si _x Ge _{1-x} Alloys on Si and SiO ₂ and New Applications of Si _x Ge _{1-x} Alloys in Advanced MOSFET Processes	
<i>D. T. Grider, M. C. Öztürk, S. Ashburn, M. Sanganeria, J. J. Wortman</i>	55
*Kinetics and Dynamics of MBE Growth	
<i>B. A. Joyce</i>	61
Effects of Near-Interface Defects on the Optical Properties of MBE Grown GaAs/AlGaAs Layers	
<i>M. Jaraiz</i>	79
*Optoelectric Materials	
<i>M. Quillec</i>	83
Electrical Characteristics of PECVD Silicon Nitride/Compound Semiconductor Interfaces for Optoelectronic Device Passivation	
<i>A. Piccirillo and P. E. Bagnoli</i>	103
*Invited paper.	

Section 2: Processing Technologies

*Fundamentals of Semiconductor Processing <i>L. C. Kimerling</i>	111
Optical Analysis of Oxygen in Epitaxial Silicon <i>M. Geddo and B. Pivac</i>	119
Electrical Properties of “Clean” and Fe-Decorated Stacking Faults in p-type Si <i>B. Fiegl and G. Zoth</i>	129
On the Dirty Contacts on n-type Silicon <i>A. Castaldini, D. Cavalcoli and A. Cavallini</i>	135
Mössbauer Study of the DX-Center in Te-Implanted $Al_x Ga_{1-x} As$ <i>H. Bemelmans, G. Borghs and G. Langouche</i>	141
*Surface Science and Semiconductor Processing <i>F. W. Saris</i>	147
*Lithography for Manufacturing at 0.25 Micrometer and Below <i>H. J. Smith and M. L. Schattenburg</i>	153
*Basic Aspects of Ion Implantation <i>E. Rimini</i>	167
*Trends in Ion Implantation for Semiconductor and Optical Materials Research <i>J. M. Poate, D. C. Jacobson and D. J. Eaglesham</i>	195
Orientation Phenomena in MeV Implants of P in Si <i>V. Raineri, G. Galvagno, F. Priolo and E. Rimini</i>	207
Deep Implants by Means of Channeling: Ion Distribution and Radiation Damage in Angle Controlled N^+ Implantation in Silicon <i>A. Gasparotto, A. Carnera, S. Acco and A. La Ferla</i>	213
Dislocation Formation in Si Implanted at Elevated Temperature <i>J. R. Liefjing, J. S. Custer, R. J. Schreutelkamp and F. W. Saris</i>	219
Preparation and Characterization of Thin Film Simox Materials <i>A. Nejim and P. L. F. Hemment</i>	225

*Invited paper.

The Effect of Electronic Energy Loss on Epitaxial $\text{YBa}_2\text{Cu}_3\text{O}_7$ Thin Films After Heavy Ion Irradiation and Annealing up to Room Temperature <i>S. Henke, B. Hensel, B. Roas, S. Klaumünzer, G. Saemann-Ischenko</i>	233
Structural Study of The Epitaxial Realignment of Polycrystalline Si Films onto Si Substrates <i>F. Benyaïch, F. Priolo, E. Rimini, C. Spinella and P. Ward</i>	239
*Plasma Immersion Ion Implantation: A Perspective <i>C. Yu and N. W. Cheung</i>	245
A Sheet Stress Measurement Technique Using Thin Films to Measure Stresses in Inert-Gas Implanted Silicon <i>J. Yuan and J. W. Corbett</i>	251
Plasma Etching Processes <i>R. D'Agostino and F. Fracassi</i>	257
Section 3: Insulating & Metallic Layers	
*Charge Trapping, Degradation and Wearout of Thin Dielectric Layers During Electrical Stressing <i>M. M. Heyns and A. v.Schwerin</i>	279
Minority Carrier Lifetime Measurements After High Temperature Pretreatment <i>M. Dammann, T. Stockmeier and H. Baltes</i>	299
*Copper-Based Metallization <i>J. Li, S. Hong, S. W. Russell and J. W. Mayer</i>	305
Thermal Stability of Ti-Mo and Ti-Cu Bilayer Thin Films on Alumina <i>J. Strane, J. Li, S. W. Russell and J. W. Mayer</i>	321
Hyperfine Fields in Epitaxially Grown Co on GaAs <i>J. Dekoster, P. Belien, Y. Bruynseraede and G. Langouche</i>	327
Titanium Nitride Process Development <i>J. M. Molarius and M. Orpana</i>	331
*Materials Aspects and Implementation of Silicides for ULSI <i>K. Maex</i>	337

*Invited paper.

Ion Beam Synthesis of Buried Iron Disilicide <i>K. Radermacher, S. Mantl, R. Apetz, C. Dieker and H. Lüth</i>	363
Diffusion in Cobalt Silicide During Silicide Formation <i>C. M. Comrie and J. E. McLeod</i>	369
Formation of Germanides by Rapid Thermal Annealing and Their Applications in Advanced MOSFET Processes <i>S. P. Ashburn and M. C. Oztürk</i>	375
Section 4: Diffusion & Crystal Growth	
*Diffusion in Crystalline Silicon and Germanium – The State of the Art in Brief <i>W. Frank</i>	383
Symmetry Methods in Diffusion <i>D. T. Wu</i>	403
Diffusion of Gold in Sputtered Amorphous Silicon <i>A. V. Wagner, D. T. Wu and F. Spaepen</i>	409
Dopant Diffusion and Point Defects in Silicon During Silicidation <i>J. W. Honeycutt and G. A. Rozgonyi</i>	415
Lateral Diffusion Couples and Their Contribution to Understanding Thin Film Reactions <i>B. Blanpain</i>	421
*Diffusion and Defects in Amorphous Silicon <i>S. Coffa and J. M. Poate</i>	427
EPR Study of Defects Produced by MeV Ion Implantation into Silicon <i>L. T. Sealy and R. C. Barklie</i>	445
Vacancy Character of Damage Zones in Ion-Irradiated Silicon <i>P. J. Simpson, M. Vos, C. Wu, I. V. Mitchell and P. J. Schultz</i>	451
Multiple Amorphous States in Ion Implanted Semiconductors (Si and InP) <i>H. Bernas, M. O. Ruault and Ping Zheng</i>	459

*Invited paper.

*The Mechanism of Solid Phase Epitaxy <i>M. J. Aziz</i>	465
The Amorphous Side of Solid Phase Epitaxy <i>J. S. Custer</i>	477
*Metal-Enhanced Growth of Silicon <i>F. Spaepen, E Nygren and A. V. Wagner</i>	483
*Ion-Assisted Phase Transitions in Silicon <i>F. Priolo and A. Battaglia</i>	501
Ion-Assisted Nucleation in Amorphous Silicon <i>A. Battaglia, C. Spinella, F. Priolo and S. U. Campisano</i>	523
List of Participants.....	529
Index.....	535

*Invited paper.
