

CONTENTS

SURVEY PAPERS

Constrained Control Concepts in Power Plants and Power Systems for Avoiding Emergency Conditions E. WELFONDER (D)	1
Issues in Modelling and Simulation of Power Plants C. MAFFEZZONI (I)	15
Evaluation of the Operation of the Interconnected West European Grid J.P. WAHA (B)	25

MODELLING AND SIMULATION OF POWER PLANTS

Simulation of Heat Exchangers in Fossil Fired Power Plants: A method to avoid Gibbs' phenomena L. FERRARINI, C. MAFFEZZONI (I)	31
Temperature Control using State Feedback in a Fossil Fired Power Plant J. MANN, G.K. LAUSTERER (D)	37
Dynamic Modeling of a Single Shaft Gas Turbine A. HUSSAIN (MAL), H. SEIFI (IR)	43
Testing of Dynamic Behaviour of a Once Through Waste Heat Boiler by Means of Long Time Transients R. DOLEZAL (D)	49
Real-time Modelling of a Ventilation System for a Power Plant Simulator P. KOCHER, E. WELFONDER (D)	55

CONTROL OF POWER PLANTS

On the Automatic Start-up/Shutdown System for a Combined Cycle with Two Different Gas Turbines K. NAKANOMORI, M. KANO (J)	63
A Combustion Air Changeover Control for Heat Recovery Boilers M. KANO (J)	69
Optimization of Daily Combined Heat and Power Production A. URBANCIC, M. SKAPIN-RUGELJ (SLOVENIA)	75
Predictor-based Optimal Control of Supply Temperature in District Heating Systems O.P. PALSSON, H. MADSEN, H.T. SOGAARD (DK)	81

Self-tuning Constrained Control of a Power Plant V. KAMINSKAS, D. JANICKIENE, D. VITKUTE (LIT)	87
---	----

ADVANCED CONTROL SCHEMES

Continuous-time Generalised Predictive Control of a Boiler Model PING YANG (PRC), B.W. HOGG (UK)	93
Comparison of Classical PID and Modern H_{∞} -control Concepts for Frequency and Voltage Control of Power Plants U. KIFFMEIER, U. KEUCHEL (D)	97
Control Strategies Securing Low Emission Values in the Berrenrath FBC-plant H.-G. KRAUSE (D)	103
Optimal Output Feedback for the Optimization of a Conventional Steam Temperature Controller S.A.W.M. PETERS, W.W. DE BOER (NL)	109
Study of the Start-up Control of a Drum Boiler by Means of a Mathematical Model A. BEATO, V. BOLIS, P. COLOMBO, A. DE MARCO, S. QUATELA, A. ZIZZO, F. MARZIALI (I)	115
A Design and Implementation of a Combustion Controller in Microcomputer-based Multiloop Controller MMC-90 J. CRETNIK, J. PETROVIC, A. BITENC (SLOVENIA)	123

STRATEGIES FOR ACTIVATION OF STORED ENERGY

Improved Unit Dynamic Response using Condensate Stoppage B. FUTTERER, G.K. LAUSTERER, S.R. LEIBBRANDT (D)	129
Economic Spinning Reserve Power by Controlled Preheater Activation W. DORNER, E. WELFONDER (D)	135
Novel Stored Energy Techniques for Spinning Reserve T.O.M. CANNING, F. McNAMARA, A. EGAN, P. NAUGHTON (IRL)	141
Actual Dynamic Performance of Thermal Power Plants with Various Designs and Control Systems F.H. CONRADIE (RSA), H. KURTEN (D)	147
Theoretical Investigation of the Frequency Behaviour of the Tirolean Grid after Transmission Line Separation Leading to Germany W. HUDOVERNIK (A), W. MICHLER, K. SCHNEIDER (D)	153

STATE ESTIMATION; FAULT ANALYSIS; DIAGNOSIS

Computing-predictor-based MRACS for Nonlinear Time-varying Power Plants Based on a New System Identification Method M. UCHIDA, Y. TOYOTA, Y. AKIYAMA, H. NAKAMURA (J)	159
Detection of Measurement Errors in Nuclear Power Plants F. KRATZ, G. MOURROT, D. MAQUIN, F. LOISY (F)	165

State Estimation in Thermal Power Stations S. STREIT (A)	171
Computer-based Sensor and Process Fault Diagnosis in Real Time J. PROCK (D)	177
On-line Closed Loop Energy Management-systems in Future W.P.H. STRACK (D)	183

APPLICATION OF ARTIFICIAL INTELLIGENCE METHODS

AI-based Design and Simulation of Hydroelectric Power Systems T. SMITHERS, MING XI TANG (UK)	189
An Integrated Diagnostic System using Analytical Redundancy and Artificial Intelligence for Coal-fired Power Plants Z. FATHI (USA), J. KORBICZ (PL), W.F. RAMIREZ, G. GILLILAND (USA)	193
The Design Process of an Expert System to Support Power Plant Operators S. BAGNARA, R. NICOLETTI, M. MAINI, G. ZARDETTO (I)	199
Inductive Learning Applied to Fossil Power Plants Control Optimization J.R. VELASCO, G. FERNANDEZ, L. MAGDALENA (E)	205
A Knowledge-based Approach to Optimizing and Maintaining Cogeneration Facilities A. HOFMANN (USA)	211

TOOLS FOR CONTROL SYSTEM DESIGN, DOCUMENTATION AND MONITORING

Stabilization of a 28MW Gas Turbine Fault Analysis and Controller Design using Specialized CACD Tools G. HONDERD, P.P.J. VAN DEN BOSCH, A.C. VAN DER HAM, P. VAN DIJK (NL)	217
CADC: A Computer Aided Design Tool for Control Systems of Complex Processes F. PRETOLANI, C. DE NICOLAJ, R. LUCCHINI (I)	223
A CAD Environment for the Design of Power Plant Control Systems L. FERRARINI, C. MAFFEZZONI (I)	229
Integrated Validation of Man Machine Interface and Control System for a Combined Cycles Plant E. COLOZZA, P. GROPELLI, M. MAINI, A. SCIANNA (I)	235
First Operational Results with Latest Network-based Man-machine-system Design B. STROICK, A. SORSA (D)	239

FLOW CALCULATIONS AND LOAD FORECASTING

Modelling of Nonlinear Nodal Admittances in Load Flow Analysis J. CIDRAS, J.A. MARTINEZ-VELASCO (E), J.A. PECAS LOPES, F. MACIEL BARBOSA (P)	245
---	-----

A Robust, Step-length Control Algorithm Applied to Power Flow Calculation K. IMHOF, W. KAISER, I. NORDANLYCKE (CH)	251
An Approach to Optimal Power Flow and VAR Compensation Planning ZHU TAIXIU, ZENG QINGYU (PRC)	257
Aspects of Relational Database Management and Human Computer Interface Required for a Fully Integrated Load Forecasting System M.R. IRVING, R. THURLBY (UK)	263
Modelling the Temperature Factor in Short-term Electrical Load Forecasting I. KARANTA, J. RUUSUNEN (SF)	269
Practical Considerations in the Construction of Load Models for Load Management A. GABALDON, C. ALVAREZ (E), R.P. MALHAME (CDN)	273

DISTRIBUTION NETWORKS AND DC TRANSMISSION

Reconfiguration for Loss Reduction in Distribution Networks C. ROLDAN, N. GONZALEZ, C. ALVAREZ (E)	281
Distribution Networks Loss Reduction: Capacitor Allocation and Operation C. ALVAREZ, R. MOLINA (E)	287
Low Order Dynamic Controllers for HVDC Links Supplying Weak Systems G.J. GEORGANTZIS, G.B. GIANNAKOPOULOS, N.A. VOVOS (GR)	293
Harmonic Interference of HVDC in Transmission Systems G. BRAUNER, G. MORAW (A)	299
HVDC-Transmission Line Model for Transient Simulation Purposes R. NAVARRO-ADLEMO, C. BREITHOLTZ (S)	305

VOLTAGE AND REACTIVE POWER SCHEDULING AND CONTROL

Integration of Transformers with Voltage Regulation into an Optimal Power Flow Algorithm for the VEW HV and EHV Grid P. STELZNER, H.-J. HAUBRICH, D. HEINZ (D)	311
Decentralized Secondary Voltage Control and Pilot Bus Selection T. GOMEZ, A. CONEJO, J.I. DE LA FUENTE, F.L. PAGOLA (E), C.J. REHN (S)	317
Modeling of the Voltage-reactive Power Behaviour of Large-scale Power Systems - Process Aggregation and Simulation Model J. UHLIG, H.-H. WILFERT, B. HAUFE, Ch. HOY, K. KUSSNER, H.-H. MARSCHNER (D)	325
A Step towards a Better Coordination of the Voltage Control between Different Countries: Results of a Structural Analysis on a Part of the Western European Power System C. VIALAS, E. MICONNET (F), E. AMTHAUER (CH)	331
Co-ordinated Controller for a Static VAR Compensator/Synchronous Generator System B.W. HOGG, A.R. MAHRAN (UK), A.M. SERAG, S.M. SHARAF (ET)	335

GENERATION SCHEDULING AND CONTROL

Extended Generation Control and Dispatch G. SCHWARZ, H. HAFNER (A)	341
Hydro Coordination in an Energy Management System S. VEMURI, W.J. HOBBS, L. LEMONIDIS (USA)	347
The Application of Deterministic and Probabilistic Methodologies to Spinning Reserve Policy in Thermal Generation Scheduling B. EUA-ARPORN, B.J. CORY (UK)	351
Generation Reserve Alignment with Disconnectable Load Blocks B. FOX, S. JOVANOVIĆ (UK)	357
The Load-Frequency-Control (LFC) of the Energie-Versorgung Schwaben AG (EVS) R. JOSWIG (D)	363

POWER SYSTEM CONTROL CENTER FUNCTIONS

Advanced Network Analysis Functions for Supporting Power System Operation G. SCHELLSTEDE, G. BEISLER (D)	369
Architecture and Function of a Distributed Energy Management System G. SCHELLSTEDE, J. FRICK (D)	377
Integration of an Optimal Power Flow Package into the New STEWEAG Energy Management System A. SCHADLER (A), K. IMHOF, S. SALY, H. FELDMANN (CH), O. ALSAC (USA)	385
Topological Interlocking within Microprocessor-based Control Systems for Substations G. HARNISCHMACHER, R. SPEH, J. STENZEL (D)	391

STABILITY ENHANCEMENT AND CONTROL

Power System Transient Stability Enhancement by Optimal Simultaneous Control of Active and Reactive Power J. MACHOWSKI, D. NELLES (D)	397
New SMES Control Strategies as a Link between Network and Power Plant Control E. HANDSCHIN, Th. STEPHANBLÖME (D)	403
A Microprocessor-based Monitoring and Control System for Power System Stability J. MATSUKI, T. OKADA, Y. FUSHIMI, S. HANADA (J)	409
Power System Stabilizer based on Variable Structure Control J. HEYDEMAN, G. HONDERD, S.I. JUWANA (NL), A.M. SHARAF (CDN)	415
Practical Aspects of the Modal Network Reduction Technique Applied to the Interconnected Power System of Singapore M.E. SCHMIEG (D), K.J. TJONG (SGP), H.W. WEBER (CH)	419

DYNAMIC SECURITY ANALYSIS

Control Behaviour of Part Power Systems during Restoration after Blackouts E. WELFONDER, W. SATTINGER (D), H.P. ASAL, H. WEBER (CH)	425
Robustness Improvement of the AESOPS Algorithm by Means of a Multimachine State-space based Correction Formula Y. XUE (PRC), H. SASAKI (J)	433
Ward-type Equivalents for Transient Stability Analysis T.L. BALDWIN, L. MILI, A.G. PHADKE (USA)	439
Simulation of Transients in Power Systems taking into consideration Models for Protective and Control Devices H. KAMMERATH, B. OSWALD, H.-D. KOLMORGEN (D)	445

EXPERT SYSTEMS AND OBSERVERS APPLIED TO POWER SYSTEM PROBLEMS

A Training Simulator with an Advising Expert System for Power System Restoration D. RUMPEL, G. KROST, T. ADER (D)	451
Dynamic Security Assessment through Large-scale Software Integration R.J. MARCEAU, F.D. GALIANA, R. MAILHOT (CDN)	457
Expert Systems Application to Power Systems - State-of-the-Art and Future Trends G. BRETTHAUER, E. HANDSCHIN, W. HOFFMANN (D)	463
Observer based Detection and Recognition of External Disturbances for Large Turbogenerators H.-J. NERN, H.H. SOLIMAN, H.A. NOUR ELDIN (D)	469

ROUND TABLE DISCUSSIONS

Survey Paper

Introduction of Expert Systems and Fuzzy Logic into the Operation Environment of Power Plants and Power Systems P.J.M. VAN SON (Chairman) (NL)	477
---	-----

Contributions of Panel Members

The Application of Expert Systems and Fuzzy Logic to Electric Power Systems in Japan - Experience, Problems and Solutions - M. KATO (J)	481
Diffusion of Innovations in Power Engineering: The Adoption of Expert Systems H.E. DIJK (NL)	485
The Application of Expert Systems and Fuzzy Logic in the View of EDF A. HERTZ (F)	487
The Application of Expert Systems and Fuzzy Logic in the View of VEW Germany P. STELZNER (D)	489

The Digest On-line Diagnostics System Reduces Costs in Power Stations C. ZORNER (D)	491
Author Index	495
Keyword Index	497
