	Page
Preface	9
List of Contributors	10
J. Kestin	13
Internal Variables in the Local-Equilibrium Approximation	
W. Muschik	45
Remarks on Internal Variables	
W. Ebeling	55
Higher Order Entropy of Nonlinear Systems	
P. Haupt	65
Rate Independent Hysteresis Behavior as an Asymptotic Limit for Slow Processes	
G. Herrmann	66
On Thermodynamic Modeling of Damage in Elastic Solids	
I. Müller	82
On Thermodynamics of Pseudo- elasticity	
K. Wilmski	88
On Pattern Formation in Stress-induced Martensitic Transformation	
R. Drouot	106
A Thermodynamical Approach of Wall Effects on the Rheology of Dilute Polymer Solutions	

		Page
S. Hess	Nonlinear Flow Behavior of Fluids	122
A.F. Ghaleb	Modelling of Thermoelastic Superconductors	135
M. Epstein	Eshelby-like Tensors in Thermoelasticity	147
C. Trimarco	Path-Independent Integrals in Finite Elasticity	160
G.A. Maugin	Material Forces in Inhomogeneous Elastoplastic Solids	175
B. Maruszewski	Nonconventional Thermodynamical Considerations	187
P. Germain	Toward an Analytical Mechanics of Materials	198
G.A. Maugin	Nonlinearity for Nonscientists; Bridging the Two Cultures? <i>(Public lecture held at the Wissenschaftskolleg, June 11, 1992)</i>	217
Closure		246
