
CONTENTS

Preface

xiii

1 Introduction and Background

1

- 1.1 Characteristics of Random Data / 2
 - 1.1.1 Stationary Data / 2
 - 1.1.2 Ergodic Data / 3
 - 1.1.3 Statistical Sampling Considerations / 4
 - 1.1.4 Other Practical Considerations / 5
- 1.2 Fourier Series and Transformations / 6
 - 1.2.1 Fourier Series / 6
 - 1.2.2 Fourier Transforms / 9
 - 1.2.3 Finite Fourier Transforms / 10
 - 1.2.4 Delta Functions / 12
 - 1.2.5 Special Fourier Transforms / 14
- 1.3 Physical System Response Properties / 15
 - 1.3.1 Unit-Impulse Response Functions / 15
 - 1.3.2 Frequency Response Functions / 16
 - 1.3.3 Single-Degree-of-Freedom Systems / 18
 - 1.3.4 Multiple-Degree-of-Freedom Systems / 21
 - 1.3.5 Distributed Systems / 22

2 Probability Functions and Amplitude Measures

25

- 2.1 Probability Functions / 25
 - 2.1.1 Probability Distribution Functions / 26
 - 2.1.2 Probability Density Functions / 27
- 2.2 Moments and Average Amplitude Measures / 29
 - 2.2.1 Expected Values and Moments / 30
 - 2.2.2 Central Tendency and Dispersion / 31
 - 2.2.3 Data-Averaging Operations / 32

- 2.3 Special Probability Density Functions / 33
 - 2.3.1 Normal (Gaussian) Noise / 33
 - 2.3.2 Sine Waves / 35
 - 2.3.3 Sine Wave in Gaussian Noise / 37
- 2.4 Statistical Sampling Errors / 37
 - 2.4.1 Bias versus Random Errors / 38
 - 2.4.2 Errors in Amplitude Estimates / 39
 - 2.4.3 Errors in Probability Density Estimates / 40

3 Correlation and Spectral Density Functions

- 3.1 Correlation Functions / 43
 - 3.1.1 Classical Correlation Concepts / 43
 - 3.1.2 Extensions to Time History Data / 47
- 3.2 Spectral Density Functions / 49
 - 3.2.1 Spectra via Correlation Functions / 50
 - 3.2.2 Spectra via Fourier Transforms / 54
 - 3.2.3 Spectra via Analog Filtering / 56
- 3.3 General Interpretations / 57
 - 3.3.1 Autocorrelation Functions / 57
 - 3.3.2 Autospectral Density Functions / 61
 - 3.3.3 Cross-Correlation Functions / 64
 - 3.3.4 Cross-Spectral Density Functions / 66
- 3.4 Estimation Procedures and Errors / 68
 - 3.4.1 Correlation Estimation Procedures / 68
 - 3.4.2 Spectral Estimation Procedures / 71
 - 3.4.3 Statistical Sampling Errors / 76

4 Single-Input / Single-Output Relationships

- 4.1 Ideal System Relationships / 78
 - 4.1.1 Stationary Inputs / 79
 - 4.1.2 Transient Inputs / 81
 - 4.1.3 Effects of Nonzero Mean Values / 82
 - 4.1.4 Ordinary Coherence Functions / 83
- 4.2 Effects of Measurement Noise / 86
 - 4.2.1 Uncorrelated Input and Output Noise / 87
 - 4.2.2 Output Noise Only / 89
 - 4.2.3 Input Noise Only / 89
 - 4.2.4 Correlated Input and Output Noise / 92

| | | |
|----------|---|------------|
| 4.3 | Feedback Systems / 95 | |
| 4.3.1 | Relationships Without Extraneous Noise / 95 | |
| 4.3.2 | Effects of Extraneous Noise / 96 | |
| 4.3.3 | Feedback Control Systems / 98 | |
| 4.4 | Examples of Engineering Systems / 100 | |
| 5 | System Identification and Response | 105 |
| 5.1 | Calculation of Frequency Response Functions / 105 | |
| 5.1.1 | Optimality of Calculations / 106 | |
| 5.1.2 | Relationships Using External Excitation / 109 | |
| 5.1.3 | Noise-to-Signal Ratios / 111 | |
| 5.1.4 | System Parameter Estimation / 112 | |
| 5.2 | Errors in Estimating Frequency Response Functions / 113 | |
| 5.2.1 | Random Errors / 114 | |
| 5.2.2 | Bias Errors / 115 | |
| 5.2.3 | Illustrations of Errors / 117 | |
| 5.3 | System Response Predictions / 124 | |
| 5.3.1 | Single-Degree-of-Freedom System / 125 | |
| 5.3.2 | Distributed Systems / 126 | |
| 6 | Propagation-Path Identification | 131 |
| 6.1 | Nondispersive Propagation, Input/Output Data / 131 | |
| 6.1.1 | Cross-Correlation Measurements / 132 | |
| 6.1.2 | Cross-Spectrum Measurements / 136 | |
| 6.1.3 | Unit-Impulse Response Measurements / 140 | |
| 6.1.4 | Practical Considerations / 142 | |
| 6.2 | Nondispersive Propagation, Output Data Only / 145 | |
| 6.2.1 | Autocorrelation Measurements / 145 | |
| 6.2.2 | Autospectrum Measurements / 149 | |
| 6.2.3 | Practical Considerations / 152 | |
| 6.3 | Dispersive Propagation / 153 | |
| 6.3.1 | Single-Path Problems / 153 | |
| 6.3.2 | Multiple-Path Problems / 156 | |
| 6.3.3 | Mixed-Path Problems / 158 | |
| 6.4 | Estimation of Path Characteristics / 160 | |
| 6.4.1 | Path Frequency Response Estimates / 160 | |
| 6.4.2 | Applications Using Transients / 162 | |

| | | |
|----------|--|------------|
| 7 | Single-Input / Multiple-Output Problems | 164 |
| 7.1 | Correlation and Spectrum Relationships / 164 | |
| 7.1.1 | General Input/Output Relationships / 165 | |
| 7.1.2 | Relationships for a Single-Input/Two-Output System / 167 | |
| 7.2 | Relative Time Delays and Propagation Direction / 169 | |
| 7.2.1 | Estimation of Relative Time Delays / 169 | |
| 7.2.2 | Determination of Dominant Direction / 172 | |
| 7.2.3 | Further Relationships / 174 | |
| 7.3 | Source Location in Fluids / 175 | |
| 7.3.1 | Procedures and Practical Considerations / 176 | |
| 7.3.2 | Finite Source Dimensions / 177 | |
| 7.3.3 | Contaminating Output Noise / 178 | |
| 7.3.4 | Reverberation and Scattering Effects / 183 | |
| 7.3.5 | Data Acquisition and Sampling Errors / 185 | |
| 7.3.6 | Periodic Sources / 187 | |
| 7.4 | Source Location in Solids / 191 | |
| 7.4.1 | Propagation with Different Mechanisms / 191 | |
| 7.4.2 | Direction of Energy Propagation / 194 | |
| 7.5 | System Identification From Output Measurements / 196 | |
| 7.5.1 | Identification of Resonance Frequencies / 197 | |
| 7.5.2 | Determination of Normal-Mode Shapes / 201 | |
| 7.5.3 | Estimation of Structural Damping / 202 | |
| 8 | Multiple-Input / Multiple-Output Relationships | 204 |
| 8.1 | Multiple-Input/Single-Output Systems / 204 | |
| 8.1.1 | Basic Input/Output Relationships / 206 | |
| 8.1.2 | Optimum Frequency Response Functions / 207 | |
| 8.1.3 | Two-Input/Single-Output Systems / 208 | |
| 8.2 | Multiple Coherence Functions / 211 | |
| 8.2.1 | Definition and Basic Relationships / 211 | |
| 8.2.2 | Special Cases / 212 | |
| 8.3 | Conditioned Spectral Analysis / 214 | |
| 8.3.1 | Definitions and Basic Relationships / 214 | |
| 8.3.2 | Conditioned Spectral Density Functions / 216 | |
| 8.4 | Partial Coherence Functions / 219 | |
| 8.4.1 | Two-Input/Single-Output Systems / 219 | |
| 8.4.2 | Multiple-Input/Single-Output Systems / 225 | |

- 8.5 Multiple-Input/Multiple-Output Systems / 228
 - 8.5.1 Definitions and Basic Relationships / 229
 - 8.5.2 Interpretations / 231

9 Energy-Source Identification

234

- 9.1 Problem Formulation / 234
 - 9.1.1 Uncorrelated Sources / 235
 - 9.1.2 Noise-Free Source Measurements / 236
 - 9.1.3 Practical Considerations / 237
- 9.2 Single-Channel Measurement Problems / 238
 - 9.2.1 Input Measurement Problems / 238
 - 9.2.2 Time-Delay Bias Errors / 239
 - 9.2.3 Reverberation Effects / 240
 - 9.2.4 Input/Output Feedback and Nonlinearities / 243
- 9.3 Input Measurement Interference / 244
 - 9.3.1 Calculations Using Coherent Output Spectra / 244
 - 9.3.2 Calculations Using Partial Coherence Functions / 247
 - 9.3.3 Suppression of Measurement Interference / 248
- 9.4 Physically Correlated Sources / 250
 - 9.4.1 Coherent Output Power Analysis / 251
 - 9.4.2 Analysis Using Partial Coherent Output Powers / 253
 - 9.4.3 Procedures for Ordering Inputs / 257
 - 9.4.4 Summary of Errors / 262

10 Procedures to Solve Multiple-Input / Multiple-Output Problems

264

- 10.1 Formulation of Models / 264
 - 10.1.1 Two-Input Systems / 264
 - 10.1.2 Multiple-Input Systems / 268
 - 10.1.3 Fourier Transforms and Spectral Functions / 271
- 10.2 Optimum System Relationships / 274
 - 10.2.1 Optimum Systems for Conditioned Inputs / 274
 - 10.2.2 Optimum Systems for Original Inputs / 276
 - 10.2.3 Relations between Optimum Systems / 277
- 10.3 Computational Algorithms / 279
 - 10.3.1 Conditioned Records from Original Records / 279

- 10.3.2 Conditioned Spectral Density Functions / 282
- 10.3.3 Partial Coherence Functions and Noise Spectra / 286
- 10.3.4 Multiple Coherence Functions / 288
- 10.3.5 Alternative Notation and Formulas / 289

11 Statistical Errors in Estimates

293

- 11.1 Spectral Density Function Estimates / 294
 - 11.1.1 Bias Errors / 295
 - 11.1.2 Random Errors / 297
- 11.2 Single-Input/Single-Output Problems / 299
 - 11.2.1 General Considerations / 300
 - 11.2.2 Summary of Random-Error Formulas / 303
 - 11.2.3 Ordinary Coherence Functions Estimates / 304
 - 11.2.4 Coherent Output Spectrum Estimates / 305
 - 11.2.5 Overall Level Estimates / 306
- 11.3 Frequency Response Function Estimates / 307
 - 11.3.1 Bias Errors / 307
 - 11.3.2 Gain-Factor Estimates / 307
 - 11.3.3 Phase-Factor Estimates / 309
 - 11.3.4 Gain-Factor Estimates from Autospectra Only / 311
- 11.4 Multiple-Input/Single-Output Problems / 313
 - 11.4.1 Multiple Coherence Function Estimates / 313
 - 11.4.2 Partial Coherence Function Estimates / 314
 - 11.4.3 Gain-Factor and Phase-Factor Estimates / 316
 - 11.4.4 Special Formulas for Uncorrelated Inputs / 316
- 11.5 Correlation Function Estimates / 320
 - 11.5.1 Random Error in Magnitude of Peak Value / 321
 - 11.5.2 Random Error in Location of Peak Value / 323

12 Nonstationary Data Analysis Techniques

325

- 12.1 Practical Considerations / 325
 - 12.1.1 Segmented Stationary Data / 326
 - 12.1.2 Continuously Nonstationary Data / 326
 - 12.1.3 General Analysis Approach / 327
- 12.2 Mean and Mean Square Values / 328
 - 12.2.1 Running-Time-Average Estimates / 329
 - 12.2.2 Statistical Estimation Errors / 331

- 12.2.3 Optimum Averaging Time / 337
- 12.2.4 Illustration / 339
- 12.2.5 Curve-Fitted Estimates / 341
- 12.3 Autospectral Density Functions / 344
 - 12.3.1 Instantaneous Autospectrum / 344
 - 12.3.2 Time-Varying Spectrum / 349
 - 12.3.3 Statistical Estimation Errors / 352
 - 12.3.4 Optimum Analysis Parameters / 353
 - 12.3.5 Illustration / 356
 - 12.3.6 Spectral Analysis Using FFT Algorithms / 359
 - 12.3.7 Spectral Analysis with Predetermined Bandwidths / 361
- 13 Nonlinear System Analysis Techniques** **363**
 - 13.1 Practical Considerations / 364
 - 13.1.1 Preliminary Analysis of Measured Data / 364
 - 13.1.2 Nonlinear Models and Procedures / 365
 - 13.2 Types of Nonlinear Systems / 366
 - 13.2.1 Zero-Memory and Finite-Memory Nonlinear Systems / 367
 - 13.2.2 Bilinear and Trilinear Systems / 369
 - 13.2.3 Square-Law and Cubic Nonlinear Systems / 370
 - 13.3 Parallel Linear and Nonlinear Systems / 372
 - 13.3.1 System Identification for Non-Gaussian Input Data / 373
 - 13.3.2 Goodness-of-Fit via Coherence Functions / 376
 - 13.3.3 System Identification for Gaussian Input Data / 378
 - 13.3.4 Procedure for Linear and Nonlinear System Identification / 380
 - 13.4 Determination of Physical Parameters in Nonlinear Differential Equations of Motion / 381
 - 13.4.1 Reverse Dynamic Nonlinear Systems / 382
 - 13.4.2 SDOF Nonlinear Systems / 386
 - 13.4.3 MDOF Nonlinear Systems / 389
 - 13.5 Computer Simulation Results / 395
 - 13.5.1 Nonlinear System Input/Output Data / 395
 - 13.5.2 SDOF Nonlinear Cases / 398
 - 13.5.3 MDOF Nonlinear Cases / 415
 - 13.5.4 Conclusions / 430
