## Contents of Macromol. Symp. 140

### International Symposium on the Application of Polymers in Foods Dallas, Texas, USA, 1998

Preface

*H. N. Cheng, G. L. Cote, I. C. Baianu*

#### I. Structure/Property Studies and Related Fundamental Issues

1. Structure-property correlations of non-starch food polysaccharides . . . . . 1  
*J. N. BeMiller*
2. X-ray and molecular modeling studies on the structure-function correlations of polysaccharides . . . . . 17  
*R. Chandrasekaran*
3. Exopolysaccharides from lactic acid bacteria: technological bottlenecks and practical solutions . . . . . 31  
*L. De Vuyst\*, B. Degeest*
4. Process characteristics of exopolysaccharide production by *Streptococcus thermophilus* . . . . . 43  
*B. Degeest\*, S. Van de Ven, L. De Vuyst*
5. Micro- and macro-phase behavior in protein-polyelectrolyte complexes . . 53  
*K. W. Mattison, Y. Wang, K. Grymonpré, P. L. Dubin\**

#### II. Product Development and Associated New Technologies

6. The “food polymer science” approach to flour functionality and ingredient technology in biscuit baking . . . . . 77  
*H. Levine\*, L. Slade*

7. Targeting of an appropriate amylose type starch for specific product applications . . . . .	81
<i>R. B. Friedman*, E. D. DeBoer, G. A. Delgado, S. L. Furcsik, F. Qvyjt, F. L. Tenbarga</i>	
8. Unique properties of high viscosity gums . . . . .	93
<i>C. A. Hoppe*, A. Goswami</i>	
9. GuarNT®Bland, a reduced odor stabilizer and soluble dietary fiber . . . . .	97
<i>F. M. Ward</i>	
10. Pectin-based biodegradable water insoluble films . . . . .	107
<i>A. E. Pavlath, A. Voisin, G. H. Robertson</i>	

### III. Characterization of Food Polymers in Solutions

11. Physical properties of xanthan, galactomannan and their mixtures in aqueous solutions . . . . .	115
<i>M. Rinaudo, M. Milas*, T. Bresolin, J. Ganter</i>	
12. Effect of glass transitions on the rheological properties of food polymers . . . . .	125
<i>V. T. Huang</i>	
13. Effect of genetic polymorphism on the gelation of $\beta$ -lactoglobulin . . . . .	137
<i>E. A. Foegeding*, R. Lowe, M. J. Boland, J. P. Hill</i>	
14. Rheology of carboxymethylcellulose made from bacterial cellulose . . . . .	145
<i>H. N. Cheng*, M. Takai, E. A. Ekong</i>	
15. The measurement of mass and size distributions, conformation, and branching of important food polymers by MALS following sample fractionation . . . . .	155
<i>M. H. Chen, P. J. Wyatt</i>	

### IV. NMR and Associated Studies of Food Polymers

16. Compositional heterogeneity in pectic polysaccharides: NMR studies and statistical analysis . . . . .	165
<i>T. G. Neiss, H. N. Cheng, P. J. H. Daas, H. A. Schols</i>	
17. Branching ratios of starch via proton nuclear magnetic resonance and their use in determining amylose/amylopectin content: evidence for three types of amylopectin . . . . .	179
<i>L. B. Dunn, Jr.*, W. J. Krueger</i>	
18. Structural and hydration studies of waxy and mealy potato starch cultivars by deuterium, carbon-13 CP-MAS/MASS NMR, and electron microscopy . . . . .	187
<i>I. C. Baianu*, P. I. Yakubu, E. Ozu</i>	

19. Physicochemical properties of plasticized corn zein films: NMR and adsorptivity studies . . . . .	197
<i>W. Wei, I. C. Baianu*</i>	
20. NMR of casein hydration and activity in solutions with ions . . . . .	211
<i>A. Mora-Gutierrez, H. M. Farrell, Jr., T. F. Kumosinski</i>	
21. Molecular dynamics and NMR studies of proteins in ionic solutions . . .	217
<i>I. C. Baianu, T. F. Kumosinski, T. C. Wei</i>	
22. Thermodynamic linkage of ion binding and hydration in myofibrillar protein solutions determined from multinuclear spin relaxation studies . . .	225
<i>I. C. Baianu, T. F. Kumosinski, A. Mora-Gutierrez, E. M. Ozu, T. S. Lioutas, P. J. Bechtel</i>	
23. Hydration behavior of heart muscle studied by nuclear magnetic relaxation: deuterium exchange of water protons in the myocardium . . .	245
<i>J. R. Lee, I. C. Baianu*, P. J. Bechtel</i>	
24. Vibrational and <sup>29</sup> Si NMR spectroscopies of soluble silicate oligomers . . .	263
<i>J. L. Bass, G. L. Turner, M. D. Morris</i>
