Chapter

## **1 Introduction**

*N. Kondo and K. C. Ting*

1.1	Why Was this Monograph Written	1
1.2	What Is the Definition of a Bioproduction Robot?	2
1.3	Necessity of the Bioproduction Robot	2
1.4	Uniqueness of Bioproduction Robots	3
1.4.1	Development of Bioproduction Robots	3
1.4.2	Robot's Intelligence and Mind	3
1.5	Overview of the Monograph	4
	References	7

## **2 Robotics for Manipulating Biological Objects**

*N. Kondo and K. C. Ting*

2.1	Work Objects of Bioproduction Robots	9
2.2	Characteristics of Biological Objects	10
2.3	Features of Bioproduction Robotics	12
2.4	Expectations for Bioproduction Robots	12
2.4.1	Labor Saving and Substitution	13
2.4.2	Extension of Human Capability	13
2.4.3	New Production System with the Robot	13
2.5	Multipurpose Robot for Bioproduction	15
2.6	Bioproduction Robots: An Integration of Engineering, Biology, and Social Science	17
	References	18

## **3 Fundamentals and Basic Components of Robots**

*N. Kondo*

3.1	Fundamentals of Robots	19
3.1.1	Servomechanisms	19
3.2	Basic Components of Robots	20

3.2.1	Manipulator	21
3.2.1.1	Mechanism of a Manipulator	21
3.2.1.2	Control of a Manipulator	22
3.2.1.3	Robot without a Manipulator	22
3.2.2	End-Effector	23
3.2.2.1	Mechanism of an End-Effector	23
3.2.2.2	Sensors for an End-Effector	23
3.2.3	Sensors	24
3.2.3.1	Sensors for a Bioproduction Robot	24
3.2.3.2	Classification of Sensors	24
3.2.3.3	Sensor Fusion	25
3.2.3.4	Future Robotic Sensors	25
3.2.4	Traveling Devices	25
3.2.5	Control Devices	26
3.2.5.1	CPU	27
3.2.5.2	Memory	27
3.2.5.3	Peripheral Devices	28
3.2.5.4	Buses	28
3.2.6	Classification of Actuators	29
3.2.6.1	Electric Actuator	29
3.2.6.2	Hydraulic Actuator	29
3.2.6.3	Pneumatic Actuator	29
	References	30

## 4 Design and Control of Manipulators

*N. Kondo*

4.1	Mechanism of a Manipulator	31
4.1.1	Cartesian Coordinate Manipulators	31
4.1.2	Cylindrical-Coordinate Manipulators	33
4.1.3	Polar-Coordinate Manipulators	33
4.1.4	Articulated Manipulators	35
4.2	Redundant Manipulators	35
4.3	Evaluation of Mechanism	37
4.3.1	Operational Space	37
4.3.2	Measure of Manipulatability	38
4.3.3	Redundant Space and Posture Diversity	41
4.3.4	Space for Obstacle Avoidance	41
4.3.5	Accuracy of the Manipulator End	42
4.4	Manipulators for Bioproduction	43
4.4.1	Plant-training Systems	43
4.4.2	Fruit Vegetables Grown on a Vertical Plane	43
4.4.3	Fruit Tree Grown on a Sphere	53
4.4.4	Fruit Tree Grown on a Trellis Plane	54

4.4.5	Vegetables Grown on the Ground	55
4.4.6	Other Objects	55
4.5	Control of a Manipulator	56
4.5.1	2-DOF Polar Manipulator	56
4.5.2	2-DOF Articulated Manipulator	57
4.5.3	Geometric Solution of Joint Displacement for a 5-DOF Articulated Manipulator	59
4.5.4	Solution of Joint Angular Velocities for a 3-DOF Articulated Manipulator	60
4.5.5	Control of a Redundant Manipulator	61
	References	63
<b>5</b>	<b>Machine Vision</b>	
	<i>Y. Shirai, N. Kondo and T. Fujiura</i>	
5.1	Image Acquisition	65
5.1.1	Image Sensors	65
5.1.2	TV Cameras	65
5.1.3	Image Grabber and its Processing Device	65
5.1.4	Luminaire	66
5.2	Discrimination	67
5.2.1	Method of Red–Green–Blue Signals	67
5.2.2	Method of the Most Suitable Wavelength Band Based on Spectral Reflectance	69
5.3	Recognition	71
5.3.1	Features from the Binary Image	71
5.3.1.1	Fractal Dimension	72
5.3.1.2	Thinning Processing	72
5.3.1.3	Chain Coding	73
5.3.2	Features from the Gray-Level Image	73
5.3.2.1	Co-Occurrence Matrix	74
5.3.3	Recognition Algorithm for a Biological Object	75
5.4	Depth Measurement and Three-Dimensional Vision	77
5.4.1	Depth Measurement	77
5.4.1.1	Time of Flight	78
5.4.1.2	Active Triangulation	78
5.4.1.3	Stereo Vision	80
5.4.1.4	Stereo Vision with Distinct Features	81
5.4.2	Area-Based Stereo Vision	82
5.4.2.1	Real-Time Area-Based Stereo Vision	84
5.4.2.2	Feature-Based Stereo Vision	85
5.4.2.3	Multistage Stereo with Matching Reliability	87
5.4.3	Sensor Fusion	91
5.4.3.1	Sensor-Fusion Categories	91

5.4.3.2	Sensor Fusion for a Mobile Robot	92
5.4.3.3	Initial Range Data Processing	92
5.4.3.4	Knowledge Representation	93
5.4.3.5	Recognition by Sensor Fusion	93
5.4.4	Application to Bioproduction	95
5.4.4.1	Measurement of Fruit Location by Binocular Stereo Vision	95
5.4.4.2	Three-Dimensional Vision Sensor that Emits Red and Infrared Beams	96
5.4.4.3	Three-Dimensional Vision Sensor that Emits Only Infrared Beams	101
5.4.4.4	Visual Feedback Control	102
5.4.4.5	Depth Measurement by use of Differential Object Size	104
	References	104
<b>6</b>	<b>Sensors for Bioproduction Robots</b>	
	<i>M. Monta, N. Kondo and T. Fujiura</i>	
6.1	External Sensors for Perception other than Vision	109
6.1.1	Range Sensors	109
6.1.1.1	Ultrasonic Sensor	109
6.1.1.2	Position-Sensitive Device	112
6.1.2	Proximity Sensors	112
6.1.2.1	Photosensing Type	112
6.1.2.2	Pneumatic Type	113
6.1.3	Tactile Sensors	114
6.1.3.1	Touch Sensor	114
6.1.3.2	Pressure Sensor	115
6.1.3.3	Slip Sensor	115
6.1.4	Ripeness Sensor for Fruit	115
6.1.4.1	Photo Sensor	115
6.1.4.2	Sonic Sensor	116
6.1.4.3	Gas Sensor	116
6.1.5	Sensors for Robot Guidance	117
6.1.5.1	Fixed Path	117
6.1.5.2	Semifixed Path	117
6.1.5.3	Free Path	118
6.2	Internal Sensors for Mechanism Control	118
6.2.1	Fixed-Position and Fixed-Angle Detection	118
6.2.1.1	Microswitch	118
6.2.1.2	Photoelectric Sensor	119
6.2.2	Position and Angle Measurement	120
6.2.2.1	Potentiometer	120
6.2.2.2	Encoder	122

6.2.3	Velocity and Angular Velocity Measurements	123
6.2.3.1	Tachometer Generator	123
6.2.3.2	Moving Magnet Velocity Sensor	124
6.2.4	Acceleration Measurement	125
6.2.4.1	Piezoelectric Acceleration Sensor	125
6.2.4.2	Strain-Gauge Acceleration Sensor	125
6.2.5	Inclination Measurement	126
6.2.5.1	Photoelectric Inclination Sensor	126
6.2.5.2	Electrolytic-Liquid-Type Inclination Sensor	127
6.2.6	Azimuth Measurement	127
6.2.6.1	Gyroscope	127
6.2.6.2	Geomagnetic Sensor	129
	References	130
<b>7</b>	<b>Traveling Devices within Bioproduction Environments</b>	
	<i>M. Monta</i>	
7.1	Wheel Type	133
7.1.1	Characteristics and Mechanisms	133
7.1.2	Applications for Bioproduction Environments	134
7.2	Rail Type	136
7.2.1	Characteristics and Mechanisms	136
7.2.2	Applications for Bioproduction Environments	137
7.3	Crawler Type	138
7.3.1	Characteristics and Mechanisms	138
7.3.2	Applications for Bioproduction Environments	140
7.4	Gantry System	141
7.4.1	Characteristics and Mechanisms	141
7.4.2	Types and Structure of Gantries	142
7.4.2.1	Wide-Span Vehicle.	142
7.4.2.2	Rail-Type Gantry	143
7.5	Legged Robot	144
7.5.1	Characteristics and Mechanisms	144
7.5.2	Applications for Bioproduction Environments	146
	References	147
