|-----------------------------------------------------------------|------------|
| Preface | xv |
| Notation | xvi |
| 1 Introduction | 1 |
| 1.1 Economic Growth in Historical Perspective | 1 |
| 1.2 Quality and Quantity | 3 |
| 1.3 Human Relationships | 4 |
| 1.4 Economic Theories of Growth | 5 |
| 1.5 Suggested Readings | 9 |
| 2 Measuring Growth and Distribution | 10 |
| 2.1 Measuring Output and Inputs | 10 |
| 2.2 Time and Production | 13 |
| 2.3 A Note on Units | 14 |
| 2.4 Technology in the Real World | 15 |
| 2.5 The Uses of Output: Investment and Consumption | 18 |
| 2.6 The Social Consumption-Growth Rate Schedule | 19 |
| 2.7 The Distribution of Income: Wages and Profit | 23 |
| 2.8 The Real Wage-Profit Rate Schedule | 25 |
| 2.9 Income Shares | 27 |
| 2.10 The Growth-Distribution Schedule | 29 |
| 2.11 Changes in Labor and Capital Productivity | 31 |

| | | |
|----------|------------------------------------------------------------|-----------|
| 2.12 | Comparing Economies | 34 |
| 2.13 | Global Economic Leadership | 35 |
| 2.14 | Labor Productivity Growth in Real Economies | 37 |
| 2.15 | Stylized Facts | 39 |
| 2.16 | Suggested Readings | 41 |
| 3 | Models of Production | 43 |
| 3.1 | Accounting Frameworks and Explanatory Models | 43 |
| 3.2 | A Model of Production | 44 |
| 3.3 | Agents and Distribution | 45 |
| 3.4 | Choice of Technique and Production Functions | 47 |
| 3.5 | Particular Production Functions | 52 |
| | 3.5.1 The Leontief production function | 52 |
| | 3.5.2 The Cobb-Douglas production function | 53 |
| 3.6 | Classifying Technical Change | 58 |
| 3.7 | Two-sector Growth-Distribution Schedules | 61 |
| 3.8 | Models of Production and Models of Growth | 67 |
| 3.9 | Suggested Readings | 67 |
| 4 | The Labor Market | 68 |
| 4.1 | Models of Economic Growth | 68 |
| 4.2 | Labor Supply and Demand | 70 |
| 4.3 | The Classical Conventional Wage Model | 71 |
| 4.4 | The Neoclassical Full Employment Model | 76 |
| 4.5 | Toward a Model of Economic Growth | 79 |
| 4.6 | Growth in Real Economies | 80 |
| 4.7 | Suggested Readings | 82 |
| 5 | Models of Consumption and Saving | 83 |
| 5.1 | A Two-Period Consumption-Saving Model | 84 |
| | 5.1.1 Solving the two-period consumption problem | 86 |

| | | |
|----------|---------------------------------------------------------------------------------------|------------|
| 5.2 | An Infinite-Horizon Model | 89 |
| 5.2.1 | Solving the infinite-horizon problem | 91 |
| 5.3 | The Constant Saving Rate Model | 93 |
| 5.4 | Saving Rates and Growth Rates | 94 |
| 5.5 | Suggested Readings | 96 |
| 6 | Classical Models of Economic Growth | 97 |
| 6.1 | The Classical Conventional Wage Model | 97 |
| 6.2 | Comparative Dynamics in the Conventional Wage Model | 101 |
| 6.3 | Labor-Saving Technical Change in the Classical Model | 104 |
| 6.4 | Choice of Technique in the Classical Model | 108 |
| 6.5 | A Classical Model of Growth with Full Employment | 110 |
| 6.6 | Choice of Technique in the Classical Full-Employment Model | 114 |
| 6.7 | The Classical Approach to Growth | 116 |
| 6.8 | Suggested Readings | 116 |
| 7 | Biased Technical Change in the Classical Model | 117 |
| 7.1 | The Classical Conventional Wage Share Model with Biased Technical Change | 117 |
| 7.2 | Viability of Technical Change | 120 |
| 7.3 | Biased Technical Change and the Fossil Production Function | 123 |
| 7.4 | Convergence and the Classical Model | 127 |
| 7.5 | One Vision of Economic Growth | 134 |
| 7.6 | Suggested Readings | 134 |
| 8 | The Neoclassical Growth Model | 136 |
| 8.1 | The Solow–Swan Model | 136 |
| 8.2 | The Intensive Production Function | 137 |
| 8.3 | Saving, Population, and Steady State Growth | 138 |
| 8.4 | The Solow–Swan Model and the Growth-Distribution Schedule | 143 |

| | | |
|-----------|-------------------------------------------------------------------------|------------|
| 8.5 | The Complete Model | 145 |
| 8.6 | Substitution and Distribution | 146 |
| 8.7 | Comparative Dynamics | 149 |
| 8.8 | Transitional Dynamics | 151 |
| 8.9 | Limitations of the Solow–Swan Model | 152 |
| 8.10 | Suggested Readings | 153 |
| 9 | Technical Change in the Neoclassical Model | 155 |
| 9.1 | Technical Change and the Production Function | 155 |
| 9.2 | The Solow–Swan Model with Harrod-Neutral Technical Change | 158 |
| 9.3 | Growth Accounting | 160 |
| 9.4 | Classical and Neoclassical Interpretations of the Residual | 164 |
| 9.5 | Comparative Steady State Dynamics in the Solow–Swan Model | 165 |
| 9.6 | Transitional Dynamics in the Solow–Swan Model | 170 |
| 9.7 | Suggested Readings | 174 |
| 10 | Investment Constrained Economic Growth | 176 |
| 10.1 | Saving, Investment, and Output | 176 |
| 10.2 | A Model of Investment Constrained Growth | 177 |
| 10.3 | Equilibrium in the Investment Constrained Model | 183 |
| 10.4 | Comparative Dynamics in the Investment Constrained model | 185 |
| 10.5 | Profit-Led or Wage-Led Growth? | 188 |
| 10.6 | Long Run or Short Run? | 190 |
| 10.7 | The Keynesian Contribution to Growth Theory | 193 |
| 10.8 | Suggested Readings | 194 |
| 11 | Land-Limited Growth | 197 |
| 11.1 | Non-Reproducible Resources | 197 |
| 11.2 | Ricardo’s Stationary State | 198 |

| | | |
|-----------|-----------------------------------------------------------------------------------|------------|
| 11.3 | Production with Land | 201 |
| 11.4 | The Capitalist's Decision Problem with Land | 202 |
| 11.5 | The Arbitrage Principle | 203 |
| 11.6 | Equilibrium Conditions | 206 |
| 11.7 | The Abundant Land Regime | 207 |
| 11.8 | The Scarce Land Regime | 208 |
| 11.9 | From the Abundant to the Scarce Land Regime | 210 |
| 11.10 | Lessons of the Land-Limited Model | 212 |
| 11.11 | Suggested Readings | 214 |
| 12 | Exhaustible Resources | 215 |
| 12.1 | Growth with an Exhaustible Resource | 215 |
| 12.2 | Production with an Exhaustible Resource | 216 |
| 12.3 | Saving and Portfolio Choice | 219 |
| 12.4 | The Growth Path | 220 |
| 12.5 | Exhaustible Resources in the Real World | 222 |
| 12.6 | Suggested Readings | 224 |
| 13 | Government Debt and Social Security: The Overlapping Generations Model | 225 |
| 13.1 | Government Finance and Accumulation | 225 |
| 13.2 | Government and Private Budget Constraints | 226 |
| 13.3 | Saving and Consumption with Selfish Households | 229 |
| 13.4 | A Classical Overlapping Generations Growth Model . . . | 232 |
| 13.5 | A Neoclassical Overlapping Generations Growth Model | 236 |
| 13.6 | Pareto-efficiency in the Overlapping Generations Model | 239 |
| 13.7 | Analyzing Social Security and Budget Deficits | 243 |
| 13.8 | Social Security in the Overlapping Generations Model | 245 |

| | | |
|-----------|----------------------------------------------------------------------------|------------|
| 13.8.1 | Fully funded social security | 246 |
| 13.8.2 | Unfunded social security | 247 |
| 13.9 | Government Debt in the Overlapping Generations Model | 252 |
| 13.10 | The Lessons of the Overlapping-Generations Model | 254 |
| 13.11 | Suggested Readings | 255 |
| 14 | Money and Economic Growth | 256 |
| 14.1 | Monetary Systems | 256 |
| 14.2 | The Gold Standard | 257 |
| 14.3 | Production with Gold | 258 |
| 14.4 | Capitalist Consumption with Gold | 260 |
| 14.5 | Steady State Growth | 262 |
| 14.6 | Unbalanced Technical Change | 264 |
| 14.7 | The Evolution of Credit Money | 265 |
| 14.8 | Suggested Readings | 267 |
| 15 | Approaches to Technical Change | 268 |
| 15.1 | The Origin of Technical Change | 268 |
| 15.2 | The Technical Progress Function and the Embodiment Hypothesis | 269 |
| 15.3 | The Vintage Structure of Machines | 271 |
| 15.4 | Steady State Growth in the Vintage Model | 272 |
| 15.5 | Induced Technical Change | 275 |
| 15.6 | Specialization and Imperfect Competition | 279 |
| 15.7 | Endogenous Growth with Specialization | 280 |
| 15.8 | Cumulative Causation | 282 |
| 15.9 | Suggested Readings | 283 |
| 16 | Endogenous Technical Change | 285 |
| 16.1 | Technical Change in a Capitalist Economy | 285 |
| 16.2 | Learning by Doing | 286 |
| 16.3 | R&D Investment in Technical Change | 288 |

16.4 How Much R&D? 291

16.5 Steady-State Growth with
No Persistent Effects of R&D 293

16.6 Steady-State Growth with Persistent Effects of R&D . . . 295

16.7 Persistent Effects of R&D with a
Conventional Wage Share 296

16.8 Suggested Readings 298
