Preface	xiii
I. The Basics of C*-algebras	1
I.1 Definitions	1
I.2 Banach Algebra Basics	3
I.3 Commutative C*-algebras	7
I.4 Positive Elements	9
I.5 Ideals, Quotients and Homomorphisms	12
I.6 Weak Topologies	15
I.7 The Density Theorems	19
I.8 Some Operator Theory	23
I.9 Representations of C*-algebras	26
I.10 C*-algebras of Compact Operators	36
Exercises	40
II. Normal Operators and Abelian C*-algebras	46
II.1 Spectral Theory	46
II.2 The L^∞ Functional Calculus	48
II.3 Multiplicity Theory	53
II.4 The Weyl–von Neumann–Berg Theorem	57
II.5 Voiculescu’s Theorem	64
Exercises	72
III. AF C*-algebras	74
III.1 Finite Dimensional C*-algebras	74
III.2 AF Algebras	75
III.3 Perturbations	79
III.4 Ideals and Quotients	84
III.5 Examples	86
III.6 Extensions	91
Exercises	95

IV. K-theory for AF C*-algebras	97
IV.1 Idempotents	97
IV.2 K_0	100
IV.3 Dimension Groups	102
IV.4 Elliott's Theorem	109
IV.5 Applications	112
IV.6 Riesz groups	118
IV.7 The Effros–Handelman–Shen Theorem	120
IV.8 Blackadar's Simple Unital Projectionless C*-algebra	124
Exercises	129
V. C*-Algebras of Isometries	132
V.1 Toeplitz Operators	132
V.2 Isometries	136
V.3 Bunce–Deddens Algebras	137
V.4 Cuntz Algebras	144
V.5 Simple Infinite C*-algebras	147
V.6 Classification of Cuntz Algebras	150
V.7 Real Rank Zero	156
Exercises	162
VI. Irrational Rotation Algebras	166
VI.1 The algebras A_θ	166
VI.2 Projections in A_θ	170
VI.3 An AF algebra	172
VI.4 Berg's technique	174
VI.5 Imbedding A_θ into \mathfrak{A}_θ	177
Exercises	180
VII. Group C*-Algebras	182
VII.1 Group Representations	182
VII.2 Amenability	185
VII.3 Primitive Ideals	190
VII.4 A Crystallographic Group	193
VII.5 The Discrete Heisenberg Group	200
VII.6 The Free Group	203
VII.7 The Reduced C*-algebra of the Free Group	206
VII.8 $C^*_r(\mathbb{F}_2)$ is Projectionless	210
Exercises	214

VIII. Discrete Crossed Products	216
VIII.1 Crossed Products	216
VIII.2 Crossed Products by \mathbb{Z}	222
VIII.3 Minimal Dynamical Systems	223
VIII.4 Odometers	230
VIII.5 K-theory of Crossed Products	232
VIII.6 AF Subalgebras of Crossed Products	235
VIII.7 Crossed Product subalgebras of AF Algebras	238
VIII.8 Topological Stable Rank	244
VIII.9 An Order 2 Automorphism	247
Exercises	250
IX. Brown–Douglas–Fillmore Theory	252
IX.1 Extensions	252
IX.2 An Addition and Zero Element for $\text{Ext}(X)$	254
IX.3 Some Special Cases	258
IX.4 Positive maps	259
IX.5 $\text{Ext}(X)$ is a group	266
IX.6 First Topological Properties	268
IX.7 Ext for planar sets	273
IX.8 Quasidiagonality	281
IX.9 Homotopy Invariance	286
IX.10 The Mayer–Vietoris Sequence	289
IX.11 Examples	294
Exercises	299
References	303
Index	307
