

Contents

Session 1:

Reliability and System Design

Chairman: A. Schweer, RWE Energie, Essen, Germany

The Influence of Different Network Structures on Power Supply Reliability 9
Meeuwsen, W. Kling, Delft University of Technology, Netherlands

Medium Voltage Network Planning Based on Probabilistic Reliability Evaluation Including the Insurance System 15
J. Backes, H.-J. Koglin, L. Klein, University of Saarland, Saarbrücken, Germany

Indices for Availability of Supply 23
D. Start, Electrical Association, London, United Kingdom

Combining Stochastical and Transient Behaviour in Industrial Power System Reliability Assessment..... 29
J. F. L. van Casteren, M. E. Schmieg, Digsilent GmbH, Germany
M. H. J. Bollen, Chalmers Univ., Sweden

Comparison of Reliability Calculation Programs for the Investigation of Distribution and Transmission Networks 37
A. Mondovic, Badenwerk AG, Karlsruhe, Germany
J. Kunkel, Energie-Versorgung Schwaben AG, Stuttgart, Germany
T. Nippert, Hamburgische Electricitäts-Werke AG, Germany
U. Zimmermann, Deutsche Verbundgesellschaft e. V., Heidelberg, Germany

Session 2:

Measurements and Simulation

Chairman: P. Bornard, EDF, France

Harmonics Impedance Identification of Medium Voltage Networks 43
Th. Tischbein, RWE Energie AG, Essen, Germany
H.-J. Haubrich, A. Kox, IAEW, RWTH Aachen, Germany

New Method for Stochastic Power Quality Simulation 49
G. Brauner, P. Kaluza, Vienna University of Technology, Vienna, Austria

Quality of Power Supply and Wind Power Penetration Prospects for the EPS of Crete 55
Prof. Dr.-Engr. Th. M. Papazoglou, Tech. Ed. Institute, Iraklio, Crete, Greece
J. Stefanakis, Public Power Corporation, Iraklio, Crete, Greece

Power Quality Measurement in Industrial and Public Distribution Systems	61
<i>K. H. Krüger, T. Wittmann, Siemens AG, Erlangen, Germany</i>	
The Voltage Quality of the Electrical Network in the Italian Speaking Park of Switzerland	67
<i>T. Raffaele, Aziende Municipalizzate, Bellinzona, Switzerland</i>	
Quality of Power Supply of a High- and Medium Voltage Network	73
<i>H. Wienold, Isar-Amperwerke AG, Munich, Germany</i>	
A Constant Reactive Power Rectifier for Arc Furnaces	79
<i>B. Gollentz, GREEBEL, Belfort, France</i>	
<i>P. Mauras, EDF, Clamart, France</i>	
<i>J. Du Parc, CEGELEC, Massy, France</i>	
<i>A. Berthon, CREEBEL, Belfort, France</i>	
Session 3:	
Harmonics and Flicker	
<i>Chairman: A. Robert, Electrabel, Belgium</i>	
Modelling of Domestic Linear and Nonlinear Loads for Evaluation of their Cumulative Impact in Distribution Networks	85
<i>G. Carpinelli, P. Caramia, P. Verde, F. Vitali, Università di Cassino, Italy</i>	
A Method for the Calculation of Planning Levels Using a Statistical Estimation of the Voltage Distortion	87
<i>G. Winkler, J. Meyer, Technical University Dresden, Germany</i>	
Modelling and Simulation of High Frequency Disturbances Induced by Non-Linear Consumers	93
<i>M. Ungureanu, St. Ioan, M. Scutariu, Bucharest Politehnica University – Power System Dept., Romania</i>	
<i>M. Ivan, GSCI – Electricity Authority, Romania</i>	
Assessment of Future Harmonic Distortion Levels in the French System	99
<i>J. Martinon, T. Deflandre, P. Fauquembergue, Électricité de France, Clamart, France</i>	
Harmonic Measurements on NGC Transmission System	105
<i>I. A. Erinmez, D. S. Crisford, S. P. C. Downs, National Grid Company, United Kingdom</i>	
Voltage Flicker Caused by arc Furnace – Case: Mo i Rana, Norway	113
<i>N. H. Jendal, L. Voldhaug, Statnett SF, Norway</i>	

Session 4:

Improvement of Power Supply Quality

Chairman: A. Erinmez, S. P. C. Downs, England

SVC or VSC for Reduction of Voltage Sags and Flicker – Trends in Power Electronics	119
<i>M. Häusler, A. Schnettler, ABB Calor Emag Schaltanlagen AG, Mannheim, Germany</i>	
<i>P. Halvarsson, ABB Power Systems AB, Västerås, Sweden</i>	
Power Conditioner for Distribution Systems	125
<i>M. Weinhold, R. Zurowski, T. Mangold, L. Voss, Siemens AG, Erlangen, Germany</i>	
Control of Shunt-Connected Hybrid Active Filter	131
<i>M. Sonnenschein, Ruhr-Universität Bochum, Germany</i>	
<i>M. Weinhold, R. Zurowski, Siemens AG, Erlangen, Germany</i>	
Voltage Quality and Reliability from Electrical Energy Storage Systems	137
<i>B. Ratering-Schnitzler, M. Kleimaier, RWE Energie AG, Essen, Germany</i>	
<i>U. Kriegler, Piller GmbH, Osterode, Germany</i>	
<i>Th. Stephanblome, M. Schroeder, E.U.S GmbH, Gelsenkirchen, Germany</i>	
HTS-Micro-SMES for Power Quality Improvement	143
<i>Th. Stephanblome, A. Tromm, E.U.S GmbH, Gelsenkirchen, Germany</i>	
<i>R. Schöttler, American Superconductor Europe GmbH, Kaarst, Germany</i>	
<i>M. Kleimaier, F. Muschalle, RWE Energie AG, Essen, Germany</i>	
Experimental Experiences of a Shunt Active Filter with Superconducting Magnetic Energy Storage (SMES) to Enhance Quality of Power Supply	151
<i>O. Simon, H. Späth, Universität Karlsruhe, Germany</i>	
<i>H. Salbert, K.-P. Juengst, P. Komarek, Forschungszentrum Karlsruhe, Germany</i>	
SMES-Application to reduce Harmonics, asymmetrical Loading and Voltage Fluctuations	157
<i>H.-J. Haubrich, A. Heider, G. Dany, IAEW, RWTH Aachen, Germany</i>	
<i>Th. Tischbein, RWE Energie AG, Germany</i>
