## INVITED PAPER

- 1        **'Techniques for solving electromagnetic scattering problems from large bodies'**  
R Mittra and Z Altman  
University of Illinois, USA

## NOVEL COMPUTING

- 7        **'Parallel computation of large-scale FDTD problems'**  
A D Tinniswood and P S Excell  
University of Bradford, UK  
M Hargreaves, S Whittle and D Spicer  
British Aerospace Defence, UK
- 13       **'Electromagnetic field modelling using parallel and distributed processing techniques'**  
V F Fusco  
The Queen's University of Belfast, UK
- 17       **'Machine independent algorithm for concurrent finite-element problems'**  
W J Buchanan and N K Gupta  
Napier University, UK
- 21       **'An approach in the parallelization of a boundary element algorithm on shared memory workstations'**  
G Mäder and F H Uhlmann  
Technical University of Ilmenau, Germany
- 26       **'Body-fitted PIC software for electromagnetic problems: The time domain code PIC3D'**  
J W Eastwood, W Arter, N J Brealey and R W Hockney  
AEA Technology, UK

## **BOUNDARY CONDITIONS**

- 32      **'Solving scattering problems in EMC analysis using finite and infinite elements'**  
S Gratkowski  
Technical University of Szczecin, Poland  
L Pichon and A Razek  
Ecole Supérieure d'Electricité, France
- 36      **'Practical experience in using absorbing boundary conditions with FDTD method'**  
R Ait-Sadi and C R I Emson  
Vector Fields Ltd, UK
- 40      **'Heaviside absorbing layer for a TLM mesh of symmetrical condensed node'**  
I G Gosling and P Y Qu  
Nanyang Technological University, Singapore
- 45      **'Efficient modelling of thin conducting sheets within the TLM method'**  
J A Cole, J F Dawson and S J Porter  
University of York, UK
- 51      **'Application of approximate boundary conditions to electromagnetic transient scattering problems'**  
S Yuferev  
Russian Academy of Sciences, Russia  
N Ida  
University of Akron, USA
- 57      **'Ultimate numerical accuracy of the surface charge method for electrostatics'**  
F H Read and N J Bowring  
University of Manchester, UK

## **BIOMEDICAL APPLICATIONS**

- 62      **'Resonance effects inside a human head exposed to a cellular phone'**  
S Gutschling and T Weiland  
Technische Hochschule Darmstadt, Germany
- 67      **'The use of the FDTD method in the design of IDG antennas'**  
V Stoiljković, S R Pennock and P R Shepherd  
University of Bath, UK

# ELECTROMAGNETIC COMPATIBILITY

- 72 **'The hybrid element method for EMC problems in VLSI circuits'**  
E B Nowacka, N P van de Meijs and P Dewilde  
Delft University of Technology, The Netherlands
- 78 **'Transformation methods for a fast analysis of reflection effects on printed circuit boards'**  
J Müller  
University of Paderborn, Germany
- 84 **'Investigation of the influence of measurement antenna modelling on the radiated spectrum'**  
U Keller and M Bücken  
University of Paderborn, Germany  
S Öing  
INCASES Engineering GmbH, Germany
- 89 **'A review of approaches to the enhancement of performance in computational methods applied to electromagnetic hazards'**  
C C R Jones, I P MacDiarmid and C P Loller  
British Aerospace, UK  
R J Simpson  
University of Central Lancashire, UK

## SOFTWARE INTEGRATION

- 96 **'Overview of the research and engineering framework (REF) for computational electromagnetics'**  
B Hantman and J Labelle  
Raytheon Company, USA  
K Siarkiewicz  
Air Force Rome Laboratory, USA
- 102 **'The antenna design framework'**  
M Sabbadini  
ESA-ESTEC, The Netherlands  
S Titomanlio  
Ingegneria dei Sistemi, Italy
- 106 **'CEM for antennas in a concurrent engineering environment'**  
A K Brown  
EASAT Antennas Ltd, UK

## FINITE ELEMENTS I

- 113 **'Finite element analysis of transient phenomena in electromagnetic forming system'**  
B Bendjima and M Féliachi  
Laboratoire de Recherche en Techniques Inductives, France
- 117 **'The modelling of Jaumann layers on general scatterers in two dimensions'**  
A Charles, M S Towers and A McCowen  
University of Wales Swansea, UK
- 121 **'An electroquasistatic finite element model of electric fields and currents generated by coronating electrodes in an electrostatic precipitator'**  
J A Houlgreave, K S Bromley and J C Fothergill  
University of Leicester, UK

## BOUNDARY ELEMENTS

- 127 **'Analysis of accelerator wake fields using boundary integral equation'**  
H Kawaguchi and T Honma  
Hokkaido University, Japan
- 133 **'An efficient computer modelling of crack responses in non-uniform field ACFM non-destructive testing'**  
D Mirshekar-Syahkal  
University of Essex, UK
- 139 **'Regularization of near singularity in FE-BE coupling analysis of three-dimensional static magnetic fields'**  
H Igarashi, K Watanabe and T Honma  
Hokkaido University, Japan  
A Kost  
Technische Universität Berlin, Germany
- 143 **'A hybrid FEM-BEM approach for the characterization of uniform transmission lines and waveguides'**  
M Vogt and V Schulz  
University of Paderborn, Germany

## MICROWAVES AND OPTICAL CIRCUITS

- 149 **'Loss in normal and superconducting millimetre-wave and submillimetre wave microstrip transmission line'**  
G Yassin and S Withington  
University of Cambridge, UK

- 155 **'Microwave mixer analysis using 3-D FDTD'**  
Q Chen and V F Fusco  
The Queen's University of Belfast, UK
- 159 **'Simulation of microwave devices containing discrete circuit elements by using the finite integration technique'**  
P Thoma and T Weiland  
Technical University of Darmstadt, Germany
- 165 **'Analysis of the electromagnetic field distribution in a microwave circuit using the TLM method and comparison with normal mode expansion method and experiments'**  
P Sewell, T M Benson and C Christopoulos  
University of Nottingham, UK  
T Anada and J-P Hsu  
Kanagawa University, Japan

## **PROCESSING**

- 171 **'Enhanced accuracy of 2D finite element field quantities by a local post-process'**  
K Hameyer, U Pahner and R Belmans  
Katholieke Universiteit Leuven, Belgium
- 176 **'Electromagnetic visualisation using commercial software'**  
H A Nott  
Australian Army Technical and Engineering Agency (ATEA), Australia

## **SENSORS**

- 182 **'Prediction of phased array blindness using isolated element characteristics'**  
L D Bamford and J R James  
Cranfield University, UK  
A Fray  
DRA Malvern, UK
- 188 **'Simulation study of 10 GHz radar backscattering from clouds, and solution of the inverse problem of atmospheric turbulence measurements'**  
F J Yanovsky  
Kiev International University of Civil Aviation, Ukraine

## **ELECTRICAL MACHINES**

- 194 **'A new technique to model and simulate divided winding induction motors'**  
M N Cirstea, E B Patterson, P G Holmes and D Morley  
The Nottingham Trent University, UK
- 200 **'SPICE electrical machine models'**  
I M Mafuve  
Rutherford Appleton Laboratory, UK
- 206 **'A novel technique to derive an analogue hardware description language model of 2.2kw induction motor'**  
D Downes, P G Holmes, B Patterson, J M K Pratt and M Kansara  
The Nottingham Trent University, UK

## **TLM**

- 210 **'Reduction of numerical errors in the simulation of field-particle interaction problems using the TLM algorithm'**  
M G Kong  
University of Liverpool, UK  
T M Benson and C Christopoulos  
University of Nottingham, UK
- 215 **'Using 3D-(SCN) TLM for the analysis of anisotropic and non-linear structures'**  
M H Abd El-Azeem, M I Sobhy, K W Royer and E A Hosny  
University of Kent at Canterbury, UK

## **FINITE ELEMENTS II**

- 220 **'Experiences with 3-dimensional magnetic vector potential/electric scalar potential finite element solvers using the Coulomb gauge'**  
A Sitzia and A E Baker  
GEC Alsthom Engineering Research Group, UK
- 223 **'Universal matrices for the  $N$ - dimensional finite element'**  
M Dufresne and P P Silvester  
McGill University, Canada
- 229 **'Conducting wire modelling in time domain codes'**  
N E Pegg  
Sowerby Research Centre (BAe), UK

## INVITED PAPER

- 235 **'Semiconductor technology computer aided design'**  
A G O'Neil  
University of Newcastle upon Tyne, UK

## FORCE CALCULATION

- 241 **'A new method to improve the accuracy of Maxwell stress based force calculations in computational electromagnetic fields'**  
Z W Shi and C B Rajanathan  
University of Abertay Dundee, UK
- 247 **'Computation of electromagnetic forces from finite element field solutions'**  
A Benhama, A C Williamson and A B J Reece  
UMIST, UK
- 253 **'On the influence of mesh deformation to the force calculation when accounting for the movement'**  
J M Allegre, C Marchand and Z Ren  
Laboratoire de Génie Electrique de Paris, France

## FDTD

- 259 **'Finite-difference solution of the transverse Laplace's equation in unbounded planar transmission lines'**  
O Sucre R and D Suster  
Universidad Simón Bolívar, Venezuela
- 265 **'Time domain iterative methods for inhomogeneous and non-linear wave equations in lossy media'**  
C Buccella and A Orlandi  
University of L'Aquila, Italy
- 271 **'Body-fitted PIC software for electromagnetic problems: The preprocessing program peggie'**  
W Arter, J W Eastwood, N J Brealey and R W Hockney  
AEA Technology, UK
- 277 **'A novel variable source impedance technique for emulating unperturbed eigenmodes in the FD-TD method'**  
M Celuch-Marcysiak and W K Gwarek  
Warsaw University of Technology, Poland

## **COUPLED PROBLEMS**

- 283 **'Frequency domain TLM applied to microwave heating'**  
C Flockhart and C Christopoulos  
University of Nottingham, UK
- 289 **'Analysis and design of multi-sector monopole Yagi-Uda array mounted on a ground plane using moment method'**  
T Maruyama, K Uehara and K Kagoshima  
NTT Wireless Systems Laboratories, Japan
- 295 **'An investigation of magnetic fields induced from underwater acoustic sources'**  
J A Ramirez, B Rao, J B Peddell, P D Loach and E M Freeman  
Imperial College of Science, Technology and Medicine, UK
- 301 **'Solution of coupled electromagnetic and thermal problems in induction heating applications'**  
F Dughiero, M Forzan and S Lupi  
University of Padua, Italy

## **INTEGRAL EQUATIONS**

- 306 **'Analysis of dielectrically-loaded wire, strip and patch antennas using the method of moments'**  
R A Abd-Alhameed and P S Excell  
University of Bradford, UK
- 312 **'Multi-region reduced field testing (RFT) for matrix thinning'**  
R Kastner and G Nocham  
Tel Aviv University, Israel
- 318 **'Method of moments with solenoidal basis functions: An approach to analyse the scattering by inhomogeneous dielectrics'**  
S Antenor and L Mendes  
Universidade Estadual de Campinas, Brazil

## **POSTER PAPERS**

### **MICROWAVE ANTENNAS AND DEVICES**

- 322 **'Moment method analysis of an aperture coupled microstrip antenna with multilayer superstrate'**  
B Robinson, T Vlasits, E Korolkiewicz and C Creasy  
University of Northumbria at Newcastle, UK

- 326 **'Offset or inclined printed slot on the ground plane of a microstrip line with anisotropic substrates'**  
Y M M Antar and Z Fan  
Royal Military College of Canada, Canada
- 332 **'Computer model for the simulation of printed superdirective HTS spiral antennas'**  
R J Waldron and G G Cook  
University of Sheffield, UK
- 338 **'The CFIE technique applied to finite-size planar and non-planar microstrip antenna'**  
B G Salman and A McCowen  
University of Wales Swansea, UK
- 342 **'The extended spectral domain approach applied to multilayer IDG structures containing magnetized ferrites'**  
Z Fan and Y M M Antar  
Royal Military College of Canada, Canada  
S R Pennock  
University of Bath, UK
- 348 **'Calculation of modes in a microstrip line with no zero or spurious modes'**  
C A Ó Donnabháin, J J Grannell and P J Murphy  
University College Cork, Ireland
- 352 **'Simulation of Frequency Selective Surfaces (FSS) using 3D-TLM'**  
M I Sobhy, M H Abd El-Azeem, K W Royer, R J Langley and E A Parker  
University of Kent at Canterbury, UK
- 358 **'TLM time-domain modelling and the use of windowing profiles for frequency-domain transformations applied to microwave cavity resonators'**  
L Albasha and C M Snowden  
University of Leeds, UK

## **OPTIMISATION**

- 364 **'A novel neural network approach in non-destructive testing'**  
F C Morabito and M Campolo  
University of Reggio Calabria, Italy
- 370 **'An optimization approach to the analysis and synthesis of circuits and fields'**  
P Di Barba and A Savini  
University of Pavia, Italy

## HIGH FREQUENCY TECHNIQUES

- 376 **'Derivation of an equivalent multiport description of dielectric periodic gratings based on the coupled-wave theory'**  
E Griese  
Siemens Nixdorf Informationssysteme AG, Germany
- 382 **'The region of application in GTD/UTD'**  
P R Foster  
Microwave and Antenna Systems, UK
- 387 **'Multiple scattering in heterogeneous media with spherical inclusions'**  
M Defos du Rau, F Pessan, V Vigneras-Lefebvre and J P Parneix  
PIOM Laboratory, France
- 393 **'An analysis of near field structure of reflector antennas and resonant scatterers'**  
V Veremey, Yu Tuchkin and V Dudka  
Ukrainian National Academy of Sciences, Ukraine
- 399 **'Generalized high-speed subdomain analysis method for quasi-optical antennae'**  
P R Winning  
University of Strathclyde, UK  
M Nakajima and T Kato  
Kyoto University, Japan
- 405 **'Modelling surface raw data for reflector antenna applications'**  
J R Bergmann and F J V Hasselmann  
Catholic University of Rio de Janeiro, Brazil
- 411 **'Application of adaptive algorithms for near-field far-field transformation'**  
S Paker and S Kent  
Istanbul Technical University, Turkey
- 415 **'Application of fock-currents for curved convex surfaces within the framework of a current-based hybrid method'**  
U Jakobus and F M Landstorfer  
University of Stuttgart, Germany
- 421 **'Analysis of rectangular waveguide filters and polarisers with reduced width E plane stubs'**  
S M Tun  
SMT Consultancies Ltd, UK

## LATE PAPER

425

**'Computing environments for controlling simulations in computational electromagnetic and multi-physics'**

J A Murphy, D P Rowse and C Guichard

British Aerospace, UK

N P Weatherill and E Turner-Smith

University of Wales, Swansea, UK
