

## CONTENTS\*

The Theme of the Symposium .....	1
<b>B.D. Nageswara Rao</b>	
Keynote Lecture: Intramolecular Dynamics of Biomolecules. Possibilities and Limitations of NMR .....	15
<b>R.R. Ernst</b> , M.J. Blackledge, T. Bremi, R. Brüschweiler, M. Ernst, C. Griesinger, Z.L. Mádi, J.W. Peng, J.M. Schmidt, and Ping Xu	
Discussion .....	31
Structural, Dynamic, and Folding Studies of SH2 and SH3 Domains .....	35
<b>Julie D. Forman-Kay</b> , Steven M. Pascal, Alex U. Singer, Toshio Yamazaki, Ouwen Zhang, Neil A. Farrow, and Lewis E. Kay	
Discussion .....	49
NMR Studies of Proteins Involved in Cell Adhesion Processes .....	51
<b>Gerhard Wagner</b> , Daniel F. Wyss, Johnathan S. Choi, Antonio R.N. Arulanandam, Ellis L. Reinherz, Andrzej Krezel, and Robert A. Lazarus	
Discussion .....	63
Combining $^2\text{H}$ and $^{13}\text{C}$ Selective Enrichment to Probe Protein Dynamics .....	65
<b>David M. LeMaster</b>	
Incorporating Motional Properties into the Interpretation of Three-Dimensional Solution Structures .....	77
<b>Walter J. Chazin</b>	
Discussion .....	87
Phosphotyrosyl Peptide-Enzyme Complexes: How Much Structure Can We Get from Transferred NOE's? .....	91
<b>Carol Beth Post</b> and Michael L. Schneider	
Discussion .....	101

---

\* Names of moderators of panel discussions and authors who delivered the lectures are shown in bold face.

<b>Panel Discussion</b> on Structural Refinement and Dynamics .....	103
David Case, Marvin D. Kemple, N. Rama Krishna, Carol B. Post, and <b>Gerhard Wagner</b>	
Recent Developments in Protein NMR Spectroscopy .....	117
Stephan Grzesiek, Geerten W. Vuister, Andy C. Wang, Frank Delaglio, and <b>Ad Bax</b>	
Discussion .....	121
Field-Cycling NMR Applied to Macromolecular Structure and Dynamics .....	123
<b>Alfred G. Redfield</b>	
Discussion .....	133
Cross-Correlations: Obstacles or Tools for Structure Determination of Biomolecules ..	135
<b>Anil Kumar</b>	
Discussion .....	143
Towards the Accurate Measurement of Internuclear Distances in Biological Macromolecules by Suppression of Spin Diffusion .....	145
<b>Sébastien J. F. Vincent</b> , Catherine Zwahlen, and Geoffrey Bodenhausen	
Discussion .....	165
NMR of Symmetrical Assemblies of Self-Recognizing Oligonucleotides .....	167
<b>Maurice Guéron</b> , Kalle Gehring, and Jean-Louis Leroy	
Discussion .....	173
Protein-DNA Interaction from NMR and Monte Carlo Docking .....	175
<b>R. Kaptein</b> , M. Slijper, V.P. Chuprina, J.A.C. Rullmann, R.M.A. Knegtel, and R. Boelens	
Discussion .....	189
Dynamic Structure of Nucleic Acid Duplexes .....	191
<b>Thomas L. James</b> , Carlos González, He Liu, Uli Schmitz, and Nikolai B. Ulyanov	
Discussion .....	205
<b>Panel Discussion</b> on Extension of Techniques to Larger Molecules .....	207
G. Marius Clore, Stephen W. Fesik, David G. Gorenstein, David M. LeMaster, and <b>John L. Markley</b>	
NMR Structures of Proteins Involved in Signal Transduction .....	221
<b>S.W. Fesik</b> , R.P. Meadows, E.T. Olejniczak, A.P. Petros, P.J. Hajduk, H.S. Yoon, J.E. Harlan, T.M. Logan, M.-M. Zhou, D.G. Nettlesheim, H. Liang, and L. Yu	
Discussion .....	235

Structures of Multimeric Proteins by NMR .....	237
<b>G. Marius Clore</b> and Angela M. Gronenborn	
Discussion .....	243
NMR Structural Studies of Flexible Molecules .....	245
<b>Peter E. Wright</b> and H. Jane Dyson	
Iron-Sulfur Proteins: Investigations of Hyperfine-Shifted Hydrogen, Carbon, and Nitrogen Resonances .....	251
Bin Xia, Hong Cheng, Young Kee Chae, Lars Skjedal, William M. Westler, and <b>John L. Markley</b>	
On the Use of NMR in Complex Biological Systems: NMR Studies of Calcium Sensitive Interactions amongst Muscle Proteins .....	275
<b>Brian D. Sykes</b> , Carolyn M. Slupsky, David S. Wishart, Frank D. Sönnichsen, and Stéphane M. Gagné	
Discussion .....	285
The Structure of Lentiviral Tat Proteins in Solution .....	287
<b>Paul Rösch</b> , Peter Bayer, Andrzej Ejchart, Rainer Frank, Arnona Gazit, Franz Herrmann, Margot Kraft, Rina Rosin-Arbesfeld, Heinrich Sticht, Dieter Willbold, and Abraham Yaniv	
Discussion .....	305
A Structural Biologist's View of Precision and Accuracy of Structural Models of Proteins Based on NMR Data .....	307
<b>A. Joshua Wand</b>	
Discussion .....	325
<b>Panel Discussion</b> on NMR vis-à-vis Other Structural Methods .....	327
Bernard Brooks, <b>Mildred Cohn</b> , Thomas L. James, Franklyn G. Prendergast, and Janet L. Smith	
Poster Abstracts .....	339
Index .....	379
