Preface Or: What Are You Getting Yourself Into Here?..... vii

Part I. The Beam Model

1. Streaming 101.....	3
Terminology: What Is Streaming?	4
On the Greatly Exaggerated Limitations of Streaming	6
Event Time Versus Processing Time	9
Data Processing Patterns	12
Bounded Data	12
Unbounded Data: Batch	13
Unbounded Data: Streaming	14
Summary	22
2. The <i>What, Where, When, and How</i> of Data Processing.....	25
Roadmap	26
Batch Foundations: <i>What</i> and <i>Where</i>	28
<i>What</i> : Transformations	28
<i>Where</i> : Windowing	32
Going Streaming: <i>When</i> and <i>How</i>	34
<i>When</i> : The Wonderful Thing About Triggers Is Triggers Are Wonderful Things!	34
<i>When</i> : Watermarks	39
<i>When</i> : Early/On-Time/Late Triggers FTW!	44
<i>When</i> : Allowed Lateness (i.e., Garbage Collection)	47
<i>How</i> : Accumulation	51
Summary	55

- 3. Watermarks..... 59**
 - Definition 59
 - Source Watermark Creation 62
 - Perfect Watermark Creation 64
 - Heuristic Watermark Creation 65
 - Watermark Propagation 67
 - Understanding Watermark Propagation 69
 - Watermark Propagation and Output Timestamps 75
 - The Tricky Case of Overlapping Windows 80
 - Percentile Watermarks 81
 - Processing-Time Watermarks 84
 - Case Studies 86
 - Case Study: Watermarks in Google Cloud Dataflow 87
 - Case Study: Watermarks in Apache Flink 88
 - Case Study: Source Watermarks for Google Cloud Pub/Sub 90
 - Summary 93

- 4. Advanced Windowing..... 95**
 - When/Where*: Processing-Time Windows 95
 - Event-Time Windowing 97
 - Processing-Time Windowing via Triggers 98
 - Processing-Time Windowing via Ingress Time 100
 - Where*: Session Windows 103
 - Where*: Custom Windowing 107
 - Variations on Fixed Windows 108
 - Variations on Session Windows 115
 - One Size Does Not Fit All 119
 - Summary 119

- 5. Exactly-Once and Side Effects..... 121**
 - Why Exactly Once Matters 121
 - Accuracy Versus Completeness 122
 - Side Effects 123
 - Problem Definition 123
 - Ensuring Exactly Once in Shuffle 125
 - Addressing Determinism 126
 - Performance 127
 - Graph Optimization 127
 - Bloom Filters 128
 - Garbage Collection 129
 - Exactly Once in Sources 130
 - Exactly Once in Sinks 131

Use Cases	133
Example Source: Cloud Pub/Sub	133
Example Sink: Files	134
Example Sink: Google BigQuery	135
Other Systems	136
Apache Spark Streaming	136
Apache Flink	136
Summary	138

Part II. Streams and Tables

6. Streams and Tables	141
Stream-and-Table Basics Or: a Special Theory of Stream and Table Relativity	142
Toward a General Theory of Stream and Table Relativity	143
Batch Processing Versus Streams and Tables	144
A Streams and Tables Analysis of MapReduce	144
Reconciling with Batch Processing	150
<i>What, Where, When, and How</i> in a Streams and Tables World	150
<i>What</i> : Transformations	150
<i>Where</i> : Windowing	154
<i>When</i> : Triggers	157
<i>How</i> : Accumulation	165
A Holistic View of Streams and Tables in the Beam Model	166
A General Theory of Stream and Table Relativity	171
Summary	172
7. The Practicalities of Persistent State	175
Motivation	175
The Inevitability of Failure	176
Correctness and Efficiency	177
Implicit State	178
Raw Grouping	179
Incremental Combining	181
Generalized State	184
Case Study: Conversion Attribution	186
Conversion Attribution with Apache Beam	189
Summary	199
8. Streaming SQL	201
What Is Streaming SQL?	201
Relational Algebra	202

Time-Varying Relations	203
Streams and Tables	207
Looking Backward: Stream and Table Biases	214
The Beam Model: A Stream-Biased Approach	214
The SQL Model: A Table-Biased Approach	218
Looking Forward: Toward Robust Streaming SQL	226
Stream and Table Selection	227
Temporal Operators	228
Summary	249
9. Streaming Joins.....	253
All Your Joins Are Belong to Streaming	253
Unwindowed Joins	254
FULL OUTER	255
LEFT OUTER	258
RIGHT OUTER	259
INNER	259
ANTI	261
SEMI	262
Windowed Joins	266
Fixed Windows	267
Temporal Validity	269
Summary	282
10. The Evolution of Large-Scale Data Processing.....	283
MapReduce	284
Hadoop	288
Flume	289
Storm	294
Spark	297
MillWheel	300
Kafka	304
Cloud Dataflow	307
Flink	309
Beam	313
Summary	316
Index.....	319
