PREFACE	ix
LIST OF ILLUSTRATIONS	xi
1 OPEN FUNDAMENTAL QUESTIONS OF LIMITS TO INFORMATION IN THE QUANTUM MEASUREMENT OF A SINGLE SYSTEM	1
1.1 Meaning of the Quantum Wavefunction / 3	
1.2 Nature of the Quantum Zeno Effect / 6	
1.3 Fundamental Quantum Limit to Precision Measurements / 7	
1.4 Conclusion / 9	
2 IMPOSSIBILITY OF DETERMINING THE UNKNOWN QUANTUM WAVEFUNCTION OF A SINGLE SYSTEM	11
2.1 Introduction / 11	
2.2 Generalized Model of the Quantum Measurement of a Single System / 17	
2.3 Statistics of the Result of a Quantum Measurement of a Single System / 18	
2.4 Statistics of the Results of a Series of Quantum Measurements of a Single System / 19	
2.5 Conclusion / 21	

3	QUANTUM NONDEMOLITION (QND) MEASUREMENTS OF A SINGLE SYSTEM	23
3.1	Introduction / 23	
3.2	Series of QND Measurements of a Single System / 26	
3.3	Photon-Number QND Measurements of a Single Squeezed Wavepacket of Light / 31	
3.3.1	Measurement of a Single Squeezed Wavepacket / 34	
3.3.2	Measurement of an Ensemble of Identical Squeezed Wavepackets / 35	
3.3.3	Saturated Quantum Brownian Motion and Continuous Collapse of the Squeezed Wavepacket / 37	
3.3.4	Statistics of Results of a Series of Photon-Number QND Measurements of a Single Squeezed Wavepacket / 39	
3.3.5	Consistency with the Upper Limit to the Quantum Channel Capacity / 41	
3.3.6	Impossibility of Determining the Wavefunction of the Squeezed Wavepacket due to the Reduction / 44	
3.4	QND Measurements of the Quadrature Amplitudes of a Single Squeezed State of Light / 45	
3.5	QND Measurement as a Protective Measurement / 48	
3.6	Conclusion / 50	
4	MEASUREMENTS WITHOUT ENTANGLEMENT OF A SINGLE QUANTUM SYSTEM	51
4.1	Introduction / 51	
4.2	Measurement without Entanglement of a Squeezed Harmonic Oscillator State / 53	
4.3	Series of Measurements without Entanglement of a Single Squeezed Harmonic Oscillator State / 56	
4.4	Protective Measurement of a Single Squeezed Harmonic Oscillator State / 58	
4.4.1	Driving the Signal Back to Its Initial Excitation / 58	

4.4.2	Protective Measurement of a Single Squeezed State Is Equivalent to a Measurement of an Ensemble of Identical Squeezed States / 60	
4.5	Protective Measurement: Both a QND Measurement and a Measurement without Entanglement / 62	
4.6	Conclusion / 63	
5	ADIABATIC MEASUREMENTS OF A SINGLE QUANTUM SYSTEM	65
5.1	Introduction / 65	
5.2	Position Measurement of a Single Harmonic Oscillator in an Energy Eigenstate / 68	
5.2.1	Exact Solution / 68	
5.2.2	Adiabatic Approximated Solution / 69	
5.2.3	Comparison of the Adiabatic Approximated Solution to the Exact Solution / 70	
5.3	Conclusion / 73	
6	QUANTUM ZENO EFFECT OF A SINGLE SYSTEM	75
6.1	Introduction / 75	
6.2	Two-Level Atom in a Single-Mode Cavity / 78	
6.2.1	Unitary Time Evolution of the Photon-Number in the Cavity / 80	
6.2.2	Series of QND Measurements of the Photon-Number in the Cavity / 82	
6.3	Schrödinger and Heisenberg Pictures: Equivalence to the Impossibility of Determining the Quantum Wavefunction of a Single System / 86	
6.4	Conclusion / 89	
7	FUNDAMENTAL QUANTUM LIMIT TO EXTERNAL FORCE DETECTION VIA MONITORING A SINGLE HARMONIC OSCILLATOR (OR FREE MASS)	91
7.1	Introduction / 91	
7.2	Monitoring the Dynamic Observables of a Single Driven Free Mass / 95	
7.2.1	Momentum Monitoring / 95	

- 7.2.2 Direct Measurement of the Momentum Change / 97
- 7.2.3 Contractive State Measurements Beat the Standard Quantum Limit (SQL) in Position Monitoring with State Resetting / 99
- 7.2.4 Without State Resetting There Is SQL in Position Monitoring / 102
- 7.3 Equivalence to the Impossibility of Determining the Quantum State of a Single Driven Free Mass / 104
- 7.4 Meaning of the Uncertainty Principle and Completeness of Quantum Mechanics / 105
- 7.5 Monitoring the Dynamic Observables of a Single Driven Harmonic Oscillator / 110
- 7.6 Monitoring the Number of Quanta of Energy of a Single Driven Harmonic Oscillator / 111
- 7.7 Equivalence to the Quantum Zeno Effect of a Single Driven Harmonic Oscillator / 113
- 7.8 Conclusion / 115

8 ESTABLISHED LIMITS TO INFORMATION IN THE QUANTUM MEASUREMENT OF A SINGLE SYSTEM 117

- 8.1 The Quantum Wavefunction Has an Epistemological Meaning Only / 117
- 8.2 The Quantum Zeno Effect Is Truly a Measurement Effect / 118
- 8.3 There Is a Fundamental Quantum Limit to External Force Detection via Monitoring a Driven Harmonic Oscillator / 118
