

Contents

| | |
|--|-----------|
| Contents | 7 |
| Preface | 13 |
| Chapter 1 Introduction | 15 |
| The System Concept | 16 |
| Popular Definitions and Acronyms | 19 |
| <i>Semiconductors versus Conductors and Insulators</i> | 19 |
| <i>The Diode Family</i> | 20 |
| <i>The Transistor Family</i> | 20 |
| <i>Passive Devices</i> | 21 |
| <i>Microsystems: MEMS, MOEMS, NEMS, POEMS, etc.</i> | 21 |
| Sources of Information | 24 |
| Summary for Chapter 1 | 24 |
| References for Chapter 1 | 25 |

Chapter 2 The Crystal Lattice System 27

| | |
|--|-----------|
| Observed Lattice Property Data | 29 |
| <i>Silicon</i> | 33 |
| <i>Silicon Dioxide</i> | 36 |
| <i>Silicon Nitride</i> | 37 |
| <i>Gallium Arsenide</i> | 37 |
| Crystal Structure | 39 |
| <i>Symmetries of Crystals</i> | 40 |
| Elastic Properties: The Stressed Uniform Lattice | 48 |
| <i>Statics</i> | 48 |
| The Vibrating Uniform Lattice | 64 |
| <i>Normal Modes</i> | 64 |
| <i>Phonons, Specific Heat, Thermal Expansion</i> | 81 |
| Modifications to the Uniform Bulk Lattice | 88 |
| Summary for Chapter 2 | 91 |
| References for Chapter 2 | 92 |

Chapter 3 The Electronic System 95

| | |
|---|------------|
| Quantum Mechanics of Single Electrons | 96 |
| <i>Wavefunctions and their Interpretation</i> | 97 |
| <i>The Schrödinger Equation</i> | 102 |
| Free and Bound Electrons, Dimensionality Effects | 106 |
| <i>Finite and Infinite Potential Boxes</i> | 106 |
| <i>Continuous Spectra</i> | 112 |
| <i>Periodic Boundary Conditions</i> | 115 |
| <i>Potential Barriers and Tunneling</i> | 115 |
| <i>The Harmonic Oscillator</i> | 118 |
| <i>The Hydrogen Atom</i> | 123 |
| <i>Transitions Between Electronic States</i> | 127 |
| <i>Fermion number operators and number states</i> | 130 |
| Periodic Potentials in Crystal | 132 |
| <i>The Bloch Functions</i> | 132 |
| <i>Formation of Band Structure</i> | 133 |
| <i>Types of Band Structures</i> | 136 |
| <i>Effective Mass Approximation</i> | 139 |
| Summary for Chapter 3 | 140 |
| References for Chapter 3 | 141 |

Chapter 4 The Electromagnetic System 143

| | |
|---|-----|
| Basic Equations of Electrodynamics | 144 |
| <i>Time-Dependent Potentials</i> | 149 |
| <i>Quasi-Static and Static Electric and Magnetic Fields</i> | 151 |
| Basic Description of Light | 158 |
| <i>The Harmonic Electromagnetic Plane Wave</i> | 158 |
| <i>The Electromagnetic Gaussian Wave Packet</i> | 160 |
| <i>Light as Particles: Photons</i> | 162 |
| Waveguides | 164 |
| <i>Example: The Homogeneous Glass Fiber</i> | 166 |
| Summary for Chapter 4 | 167 |
| References for Chapter 4 | 168 |

Chapter 5 Statistics 169

| | |
|---|-----|
| Systems and Ensembles | 170 |
| <i>Microcanonical Ensemble</i> | 171 |
| <i>Canonical Ensemble</i> | 174 |
| <i>Grand Canonical Ensemble</i> | 176 |
| Particle Statistics: Counting Particles | 178 |
| <i>Maxwell-Boltzmann Statistics</i> | 178 |
| <i>Bose-Einstein Statistics</i> | 180 |
| <i>Fermi-Dirac Statistics</i> | 181 |
| <i>Quasi Particles and Statistics</i> | 182 |
| Applications of the Bose-Einstein Distributions | 183 |
| Electron Distribution Functions | 184 |
| <i>Intrinsic Semiconductors</i> | 184 |
| <i>Extrinsic Semiconductors</i> | 187 |
| Summary for Chapter 5 | 190 |
| References for Chapter 5 | 190 |

Chapter 6 Transport Theory 191

| | |
|--|-----|
| The Semi-Classical Boltzmann Transport Equation | 192 |
| <i>The Streaming Motion</i> | 193 |
| <i>The Scattering Term</i> | 195 |
| <i>The BTE for Phonons</i> | 197 |
| <i>Balance Equations for Distribution Function Moments</i> | 197 |

| | |
|---|-----|
| <i>Relaxation Time Approximation</i> | 201 |
| Local Equilibrium Description | 204 |
| <i>Irreversible Fluxes and Thermodynamic Forces</i> | 205 |
| <i>Formal Transport Theory</i> | 212 |
| <i>The Hall Effect</i> | 216 |
| From Global Balance to Local Non-Equilibrium | 219 |
| <i>Global Balance Equation Systems</i> | 220 |
| <i>Local Balance: The Hydrodynamic Equations</i> | 220 |
| <i>Solving the Drift-Diffusion Equations</i> | 222 |
| <i>Kinetic Theory and Methods for Solving the BTE</i> | 227 |
| Summary for Chapter 6 | 231 |
| References for Chapter 6 | 231 |

Chapter 7 Interacting Subsystems 233

| | |
|--|-----|
| Phonon-Phonon | 235 |
| <i>Phonon Lifetimes</i> | 235 |
| <i>Heat Transport</i> | 236 |
| Electron-Electron | 239 |
| <i>The Coulomb Potential (Poisson Equation)</i> | 240 |
| <i>The Dielectric Function</i> | 241 |
| <i>Screening</i> | 242 |
| <i>Plasma Oscillations and Plasmons</i> | 243 |
| Electron-Phonon | 245 |
| <i>Acoustic Phonons and Deformation Potential Scattering</i> | 246 |
| <i>Optical Phonon Scattering</i> | 249 |
| <i>Piezoelectricity</i> | 251 |
| <i>Piezoelectric Transducers</i> | 258 |
| <i>Stress Induced Sensor Effects: Piezoresistivity</i> | 260 |
| <i>Thermoelectric Effects</i> | 262 |
| Electron-Photon | 267 |
| <i>Intra- and Interband Effects</i> | 268 |
| <i>Semiconductor Lasers</i> | 270 |
| Phonon-Photon | 276 |
| <i>Elasto-Optic Effect</i> | 276 |
| <i>Light Propagation in Crystals: Phonon-Polaritons</i> | 277 |
| Inhomogeneities | 279 |
| <i>Lattice Defects</i> | 280 |
| <i>Scattering Near Interfaces (Surface Roughness,</i> | 281 |

| | |
|-------------------------------------|------|
| <i>Phonons at Surfaces</i> | .284 |
| <i>The PN Junction</i> | .300 |
| <i>Metal-Semiconductor Contacts</i> | .313 |
| Summary for Chapter 7 | .324 |
| References for Chapter 7 | .324 |
