<i>Preface</i>	v
<i>List of Contributors</i>	xi

## Part 1: Basic Theory

1. The linear time – branching time spectrum I. The semantics of concrete, sequential processes <i>R.J. van Glabbeek</i>	3
2. Trace-oriented models of concurrency <i>M. Broj, E.-R. Olderog</i>	101
3. Structural operational semantics <i>L. Aceto, W.J. Fokkink, C. Verhoef</i>	197
4. Modal logics and mu-calculi: An introduction <i>J.C. Bradfield, C. Stirling</i>	293

## Part 2: Finite-State Processes

5. Process algebra with recursive operations <i>J.A. Bergstra, W.J. Fokkink, A. Ponse</i>	333
6. Equivalence and preorder checking for finite-state systems <i>R. Cleaveland, O. Sokolsky</i>	391

## Part 3: Infinite-State Processes

7. A symbolic approach to value-passing processes <i>A. Ingólfssdóttir, H. Lin</i>	427
8. An introduction to the $\pi$ -calculus <i>J. Parrow</i>	479
9. Verification on infinite structures <i>O. Burkart, D. Caucal, F. Moller, B. Steffen</i>	545

## Part 4: Extensions

10. Process algebra with timing: Real time and discrete time <i>J.C.M. Baeten, C.A. Middelburg</i>	627
---	-----

- |  |     |
|--|-----|
| 11. Probabilistic extensions of process algebras | 685 |
| <i>B. Jonsson, Wang Yi, K.G. Larsen</i>          |     |
| 12. Priority in process algebra                  | 711 |
| <i>R. Cleaveland, G. Lüttgen, V. Natarajan</i>   |     |

### Part 5: Non-Interleaving Process Algebra

- |  |      |
|--|------|
| 13. Partial-order process algebra (and its relation to Petri nets) | 769  |
| <i>J.C.M. Baeten, T. Basten</i>                                    |      |
| 14. A unified model for nets and process algebras                  | 873  |
| <i>E. Best, R. Devillers, M. Koutny</i>                            |      |
| 15. Process algebras with localities                               | 945  |
| <i>I. Castellani</i>   |      |
| 16. Action refinement  | 1047 |
| <i>R. Gorrieri, A. Rensink</i>                                     |      |

### Part 6: Tools and Applications

- |  |      |
|--|------|
| 17. Algebraic process verification                         | 1151 |
| <i>J.F. Groote, M.A. Reniers</i>                           |      |
| 18. Discrete time process algebra and the semantics of SDL | 1209 |
| <i>J.A. Bergstra, C.A. Middelburg, Y.S. Usenko</i>         |      |
| 19. A process algebra for Interworkings                    | 1269 |
| <i>S. Mauw, M.A. Reniers</i>                               |      |
| Author Index   | 1329 |
