

CONTENTS

Preface	ix
List of Participants	xi
List of Contributors	xix
Theory and Analysis of Laminated Composite Plates J.N. Reddy	1
Micromechanics Analysis of Composite Materials A.S.D. Wang	81
Prediction of the Effective Damage Properties and Failure Properties of Non Linear Anisotropic Discontinuous Reinforced Composites K. Derrien, J. Fitoussi, G. Guo and D. Baptiste	131
Mechanics of Three-Dimensional Textile Structural Composites: Processing Tsu-Wei Chou and Timothy D. Kostar	151
Mechanics of Three-Dimensional Textile Structural Composites: Analysis Tsu-Wei Chou and Timothy D. Kostar	163
Mechanics of Three-Dimensional Textile Structural Composites: Performance Modeling Tsu-Wei Chou and Kishore Pochiraju	173
Testing and Modeling of Inelastic Behavior of Fibrous Composites C.T. Sun	183
Characterization of Strain Rate-Dependent Behavior in Polymeric Composites C.T. Sun	195
A Treatment of Interfacial Cracks in the Presence of Friction C.T. Sun and W. Qian	205
Impact and High Rate Testing of Composites: An Overview B.R.K. Blackman and J.G. Williams	215
Impact and High Rate Testing of Composites: High Rate Delamination Testing B.R.K. Blackman and J.G. Williams	225
Composite for Marine Applications Part 1. Testing of Materials and Structures for Surface Vessels P. Davies	235
Composite for Marine Applications Part 2. Underwater Structures P. Davies and P. Chauchot	249
Examples for Non-Destructive Testing of Glass- and Carbon-Fiber-Reinforced Polymer-Matrix Composites A.J. Brunner, J. Neuenschwander	261
Towards Standardised Interlaminar Fracture Tests for Unidirectional Fiber-Reinforced Polymer-Matrix Composites A.J. Brunner	279
Advantages and Disadvantages of Thermoset and Thermoplastic Matrices for Continuous Fibre Composites A. Cervenka	289

Hygrothermal Ageing of Glass Reinforced Composite Pipes A.Cervenka	299
Composite Pipes Based on Thermoplastic Matrices Reinforced by Continuous Fibres A.Cervenka	309
Impact Damage of Composite Structures M. de Freitas and L. Reis	319
Remarks on Linear and Nonlinear Variational Design Sensitivity Analysis F.-J. Barthold	331
Remarks on Computing the Energy Release Rate and its Sensitivities F.-J. Barthold and S. Mesecke	341
Some Remarks on Robust Design F.-J. Barthold and S. Mesecke	351
Optimization of Thin-Walled Structures E. Stein and F.-J. Barthold	361
Theory and Computation of Multilayer Composites E. Stein and J. Tessmer	369
Theory and Computation of Damage and Failure of Composites E. Stein and J. Tessmer	379
Optimal Design of Composite Structures with Integrated Piezoelectric Laminæ Victor M. Franco Correia, Cristóvão M. Mota Soares and Carlos A. Mota Soares	389
Optimization of Composite Structures Using Response Surface Approximations R.T. Haftka, R. Vitali and B.V. Sankar	409
Genetic Algorithms for Optimization of Composite Laminates R.T. Haftka	431
Identification Techniques in Composite Laminates Pauli Pedersen	443
Sensitivity Analysis and Inverse Problems for Laminates and Materials Pauli Pedersen	453
Asymptotic Approach to Optimal Structural Design with Brittle-Fracture Constraints Part 1: Prototype Problem N.V. Banichuk	465
Asymptotic Approach to Optimal Structural Design with Brittle-Fracture Constraints Part 2: Deterministic and Stochastic Problems N.V. Banichuk	477
Some Composite Structures Experiences at NASA Langley Research Center James H. Starnes, Jr. and Damodar R. Ambur	489
Prospects of Smart Structures for Future Aircraft K.W. Dittrich	509
