<b>Introduction</b>	1
<b>1 Cobordisms and topological quantum field theories</b>	9
Summary	9
1.1 Geometric preliminaries	10
Manifolds with boundary	10
Orientations	12
Some vocabulary from Morse theory	15
1.2 Cobordisms	18
Unoriented cobordisms	18
Oriented cobordisms	22
Decomposition of cobordisms	28
Topological quantum field theories	30
1.3 The category of cobordism classes	34
Gluing and composition	35
Identity cobordisms and invertible cobordisms	44
Monoidal structure	48
Topological quantum field theories	54
1.4 Generators and relations for <b>2Cob</b>	56
Preliminary observations	56
Generators	62
Relations	69
Relations involving the twist	72
Sufficiency of the relations	73
<b>2 Frobenius algebras</b>	78
Summary	78

2.1	Algebraic preliminaries	79
	Vector spaces, duals, and pairings	79
	Algebras and modules	86
2.2	Definition and examples of Frobenius algebras	94
	Definition and basic properties	94
	Examples	98
2.3	Frobenius algebras and comultiplication	106
	Graphical calculus	108
	Commutativity and cocommutativity	121
	Tensor calculus (linear algebra in coordinates)	123
2.4	The category of Frobenius algebras	131
	Frobenius algebra homomorphisms	131
	Tensor products of Frobenius algebras	132
	Digression on bialgebras	135
<b>3</b>	<b>Monoids and monoidal categories</b>	138
	Summary	138
3.1	Monoids (in <b>Set</b> )	139
	Some notions from set theory	139
	Definition of monoid	140
	Examples	143
	Monoid actions and representations	146
3.2	Monoidal categories	148
	Definition of monoidal categories	150
	Nonstrict monoidal categories	154
	Examples of monoidal categories and functors	157
	Symmetric monoidal categories	160
	Monoidal functor categories	167
3.3	Frobenius algebras and 2-dimensional topological quantum field theories	171
3.4	The simplex categories $\Delta$ and $\Phi$	177
	Finite ordinals	177
	Graphical description of $\Delta$	180
	Generators and relations for $\Delta$	183
	The symmetric equivalent: finite cardinals	188
	Generators and relations for $\Phi$	192
3.5	Monoids in monoidal categories, and monoidal functors from $\Delta$	197
	Monoids in monoidal categories	197
	Examples	201
	Monoidal functors from the simplex category	204

Algebras	207
Symmetric monoidal functors on $\Phi$	208
3.6 Frobenius structures	212
Comonoids and coalgebras	212
Frobenius objects, Frobenius algebras, and 2-dimensional cobordisms	214
<b>Appendix: vocabulary from category theory</b>	223
A.1 Categories	223
A.2 Functors	226
A.3 Universal objects	230
<i>References</i>	234
<i>Index</i>	237
