

TABLE OF CONTENTS

Foreword	5
--------------------	---

PART I: PHONOLOGY AND PHONETICS

1. The feature level of language	13
1.1. Distinctive features in operation.	13
1.2. Structure of distinctive features	14
1.3. Opposition and contrast	15
1.4. Message and code	15
1.5. Ellipsis and explicitness	15
2. The variety of features and their treatment in linguistics .	18
2.1. Phonology and phonemics	18
2.2. The 'inner' approach to the phoneme in relation to sound	19
2.3. Types of features	20
2.4. The 'outer' approaches to the phoneme in relation to sound	22
2.4.1. The mentalist view.	22
2.4.2. The code-restricting view	23
2.4.3. The generic view	23
2.4.4. The fictionalist view	24
2.4.5. The algebraic view.	26

2.5. The cryptanalyst's and decoder's devices as two complementary techniques	28
3. The identification of distinctive features	31
3.1. Syllable	31
3.2. Two kinds of distinctive features	33
3.3. Classification of prosodic features	33
3.3.1. Force features.	34
3.3.2. Quantity features	34
3.3.3. Tone features	35
3.3.4. The interconnection between stress and length.	36
3.4. Comparison of prosodic and inherent features	36
3.5. General laws of phonemic patterning	38
3.5.1. Restrictions in the overall inventory of distinctive features.	38
3.6. The three classes of inherent features	40
3.6.1. Sonority features	40
3.6.2. Protensity features	43
3.6.3. Tonality features	43
3.7. Stages of the speech event	44
3.7.1. The use of different stages in the study of distinctive features.	46
3.7.2. Nomenclature of distinctive features	48
4. Phonemic patterning.	50
4.1. Stratification	50
4.1.1. The nuclear syllable	50
4.1.2. The role of the nasal consonant	51
4.1.3. The primary triangle	51
4.1.4. The split of the primary triangle into two triangles, consonantal and vocalic	52
4.1.5. Patterning of oral resonance features	53
4.1.6. Sonority features in relation to the optimal consonant and vowel.	55
4.2. The dichotomous scale.	58

4.3. The spatio-temporal pattern of phonemic operations	61
Selected list of studies in general phonology (till 1966)	64

PART II: TWO ASPECTS OF LANGUAGE
AND TWO TYPES OF APHASIC DISTURBANCES

1. The linguistic problems of aphasia	69
2. The twofold character of language	72
3. Similarity disorder	77
4. Contiguity disorder	85
5. The metaphoric and metonymic poles	90
