

# Contents

<b>Preface</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Asset Price Dynamics	1
1.2 Volatility	1
1.3 Prediction	2
1.4 Information	2
1.5 Contents	3
1.6 Software	5
1.7 Web Resources	6
<b>I Foundations</b>	<b>7</b>
<b>2 Prices and Returns</b>	<b>9</b>
2.1 Introduction	9
2.2 Two Examples of Price Series	9
2.3 Data-Collection Issues	10
2.4 Two Returns Series	13
2.5 Definitions of Returns	14
2.6 Further Examples of Time Series of Returns	19
<b>3 Stochastic Processes: Definitions and Examples</b>	<b>23</b>
3.1 Introduction	23
3.2 Random Variables	24
3.3 Stationary Stochastic Processes	30
3.4 Uncorrelated Processes	33
3.5 ARMA Processes	36
3.6 Examples of ARMA( $l$ , 1) Specifications	44
3.7 ARIMA Processes	46
3.8 ARFIMA Processes	46
3.9 Linear Stochastic Processes	48
3.10 Continuous-Time Stochastic Processes	49
3.11 Notation for Random Variables and Observations	50

<b>4</b>	<b>Stylized Facts for Financial Returns</b>	<b>51</b>
4.1	Introduction	51
4.2	Summary Statistics	52
4.3	Average Returns and Risk Premia	53
4.4	Standard Deviations	57
4.5	Calendar Effects	59
4.6	Skewness and Kurtosis	68
4.7	The Shape of the Returns Distribution	69
4.8	Probability Distributions for Returns	73
4.9	Autocorrelations of Returns	76
4.10	Autocorrelations of Transformed Returns	82
4.11	Nonlinearity of the Returns Process	92
4.12	Concluding Remarks	93
4.13	Appendix: Autocorrelation Caused by Day-of-the-Week Effects	94
4.14	Appendix: Autocorrelations of a Squared Linear Process	95

## **II Conditional Expected Returns 97**

<b>5</b>	<b>The Variance-Ratio Test of the Random Walk Hypothesis</b>	<b>99</b>
5.1	Introduction	99
5.2	The Random Walk Hypothesis	100
5.3	Variance-Ratio Tests	102
5.4	An Example of Variance-Ratio Calculations	105
5.5	Selected Test Results	107
5.6	Sample Autocorrelation Theory	112
5.7	Random Walk Tests Using Rescaled Returns	115
5.8	Summary	120

<b>6</b>	<b>Further Tests of the Random Walk Hypothesis</b>	<b>121</b>
6.1	Introduction	121
6.2	Test Methodology	122
6.3	Further Autocorrelation Tests	126
6.4	Spectral Tests	130
6.5	The Runs Test	133
6.6	Rescaled Range Tests	135
6.7	The BDS Test	136
6.8	Test Results for the Random Walk Hypothesis	138
6.9	The Size and Power of Random Walk Tests	144
6.10	Sources of Minor Dependence in Returns	148
6.11	Concluding Remarks	151
6.12	Appendix: the Correlation between Test Values for Two Correlated Series	153
6.13	Appendix: Autocorrelation Induced by Rescaling Returns	154

<b>7</b>	<b>Trading Rules and Market Efficiency</b>	<b>157</b>
7.1	Introduction	157
7.2	Four Trading Rules	158
7.3	Measures of Return Predictability	163
7.4	Evidence about Equity Return Predictability	166
7.5	Evidence about the Predictability of Currency and Other Returns	168

7.6	An Example of Calculations for the Moving-Average Rule	172
7.7	Efficient Markets: Methodological Issues	175
7.8	Breakeven Costs for Trading Rules Applied to Equities	176
7.9	Trading Rule Performance for Futures Contracts	179
7.10	The Efficiency of Currency Markets	181
7.11	Theoretical Trading Profits for Autocorrelated Return Processes	184
7.12	Concluding Remarks	186
<b>III Volatility Processes</b>		<b>187</b>
<b>8</b>	<b>An Introduction to Volatility</b>	<b>189</b>
8.1	Definitions of Volatility	189
8.2	Explanations of Changes in Volatility	191
8.3	Volatility and Information Arrivals	193
8.4	Volatility and the Stylized Facts for Returns	195
8.5	Concluding Remarks	196
<b>9</b>	<b>ARCH Models: Definitions and Examples</b>	<b>197</b>
9.1	Introduction	197
9.2	ARCH(1)	198
9.3	GARCH(1, 1)	199
9.4	An Exchange Rate Example of the GARCH(1, 1) Model	205
9.5	A General ARCH Framework	212
9.6	Nonnormal Conditional Distributions	217
9.7	Asymmetric Volatility Models	220
9.8	Equity Examples of Asymmetric Volatility Models	222
9.9	Summary	233
<b>10</b>	<b>ARCH Models: Selection and Likelihood Methods</b>	<b>235</b>
10.1	Introduction	235
10.2	Asymmetric Volatility: Further Specifications and Evidence	235
10.3	Long Memory ARCH Models	242
10.4	Likelihood Methods	245
10.5	Results from Hypothesis Tests	251
10.6	Model Building	256
10.7	Further Volatility Specifications	261
10.8	Concluding Remarks	264
10.9	Appendix: Formulae for the Score Vector	265
<b>11</b>	<b>Stochastic Volatility Models</b>	<b>267</b>
11.1	Introduction	267
11.2	Motivation and Definitions	268
11.3	Moments of Independent SV Processes	270
11.4	Markov Chain Models for Volatility	271
11.5	The Standard Stochastic Volatility Model	278
11.6	Parameter Estimation for the Standard SV Model	283
11.7	An Example of SV Model Estimation for Exchange Rates	288
11.8	Independent SV Models with Heavy Tails	291
11.9	Asymmetric Stochastic Volatility Models	293

11.10	Long Memory SV Models	297
11.11	Multivariate Stochastic Volatility Models	298
11.12	ARCH versus SV	299
11.13	Concluding Remarks	301
11.14	Appendix: Filtering Equations	301

## **IV High-Frequency Methods 303**

<b>12</b>	<b>High-Frequency Data and Models</b>	<b>305</b>
12.1	Introduction	305
12.2	High-Frequency Prices	306
12.3	One Day of High-Frequency Price Data	309
12.4	Stylized Facts for Intraday Returns	310
12.5	Intraday Volatility Patterns	316
12.6	Discrete-Time Intraday Volatility Models	321
12.7	Trading Rules and Intraday Prices	325
12.8	Realized Volatility: Theoretical Results	327
12.9	Realized Volatility: Empirical Results	332
12.10	Price Discovery	342
12.11	Durations	343
12.12	Extreme Price Changes	344
12.13	Daily High and Low Prices	346
12.14	Concluding Remarks	348
12.15	Appendix: Formulae for the Variance of the Realized Volatility Estimator	349

## **V Inferences from Option Prices 351**

<b>13</b>	<b>Continuous-Time Stochastic Processes</b>	<b>353</b>
13.1	Introduction	353
13.2	The Wiener Process	354
13.3	Diffusion Processes	355
13.4	Bivariate Diffusion Processes	359
13.5	Jump Processes	361
13.6	Jump-Diffusion Processes	363
13.7	Appendix: a Construction of the Wiener Process	366
<b>14</b>	<b>Option Pricing Formulae</b>	<b>369</b>
14.1	Introduction	369
14.2	Definitions, Notation, and Assumptions	370
14.3	Black–Scholes and Related Formulae	372
14.4	Implied Volatility	378
14.5	Option Prices when Volatility Is Stochastic	383
14.6	Closed-Form Stochastic Volatility Option Prices	388
14.7	Option Prices for ARCH Processes	391
14.8	Summary	394
14.9	Appendix: Heston’s Option Pricing Formula	395

<b>15 Forecasting Volatility</b>	<b>397</b>
15.1 Introduction	397
15.2 Forecasting Methodology	398
15.3 Two Measures of Forecast Accuracy	401
15.4 Historical Volatility Forecasts	403
15.5 Forecasts from Implied Volatilities	407
15.6 ARCH Forecasts that Incorporate Implied Volatilities	410
15.7 High-Frequency Forecasting Results	414
15.8 Concluding Remarks	420
<b>16 Density Prediction for Asset Prices</b>	<b>423</b>
16.1 Introduction	423
16.2 Simulated Real-World Densities	424
16.3 Risk-Neutral Density Concepts and Definitions	428
16.4 Estimation of Implied Risk-Neutral Densities	431
16.5 Parametric Risk-Neutral Densities	435
16.6 Risk-Neutral Densities from Implied Volatility Functions	446
16.7 Nonparametric RND Methods	448
16.8 Towards Recommendations	450
16.9 From Risk-Neutral to Real-World Densities	451
16.10 An Excel Spreadsheet for Density Estimation	458
16.11 Risk Aversion and Rational RNDs	461
16.12 Tail Density Estimates	464
16.13 Concluding Remarks	465
