

1	Overview of Cryptography .....	1
2	Mathematical Background .....	49
3	Number-Theoretic Reference Problems .....	87
4	Public-Key Parameters .....	133
5	Pseudorandom Bits and Sequences .....	169
6	Stream Ciphers .....	191
7	Block Ciphers .....	223
8	Public-Key Encryption .....	283
9	Hash Functions and Data Integrity .....	321
10	Identification and Entity Authentication .....	385
11	Digital Signatures .....	425
12	Key Establishment Protocols .....	489
13	Key Management Techniques .....	543
14	Efficient Implementation .....	591
15	Patents and Standards .....	635
A	Bibliography of Papers from Selected Cryptographic Forums .....	663
	References .....	703
	Index .....	755
