

CONTENTS

Preface	xi–xv	
Notes on the articles	xvii–xxi	
Bibliography	xxiii–xxiv	
Acknowledgements	xxv–xxvi	
A KEY FIGURE IN ENLIGHTENMENT GEOLOGY: NICOLAS DESMAREST		
I	Nicolas Desmarest and geology in the eighteenth century <i>Toward a History of Geology</i> , ed. C.J. Schneer. Cambridge, MA: The M.I.T. Press, 1969	339–356
II	The beginnings of a geological naturalist: Desmarest, the printed word, and nature <i>Earth Sciences History</i> 20. Morgantown, WV, 2001, pp. 44–61. Originally published in French as “La Genèse d’un Naturaliste: Desmarest, la Lecture et la Nature”, <i>De la Géologie à son Histoire. Ouvrage Édité en Hommage à François Ellenberger</i> , eds. G. Gohau and J. Gaudant. Paris: Comité des Travaux Historiques et Scientifiques, 1997, pp. 61–74	1–24
III	Nicolas Desmarest and Italian geology <i>Rocks, Fossils and History</i> , eds. G. Giglia, C. Maccagni and N. Morello. Florence: Edizioni Festina Lente, 1995, pp. 95–109	1–18
IV	New light on geological mapping in Auvergne during the eighteenth century: the Pasumot-Desmarest collaboration <i>Revue d’Histoire des Sciences</i> 47. Paris, 1994	129–136

- V Buffon, Desmarest and the ordering of geological events in *Époques* 1–20
The Age of the Earth: From 4004 BC to AD 2002, eds. C.L.E. Lewis and S.J. Knell. London: Geological Society, 2001, pp. 39–49

INVESTIGATING AND UNDERSTANDING TERRESTRIAL PHENOMENA

- VI Natural law in eighteenth-century geology: the case of Louis Bourguet 1–7
XIIIth International Congress of the History of Science, Proceedings VIII. Moscow: Editions "Nauka", 1974, pp. 72–80
- VII Reflections on natural laws in eighteenth-century geology 1–36
Originally published in French as "Les Lois naturelles dans la géologie du XVIIIème siècle: Recherches préliminaires," Travaux du Comité Français d'Histoire de la Géologie, 3ème série, vol. II, no. 1. Paris, 1988, pp. 1–28
- VIII The historical rehabilitation of theories of the earth 1–17
The Compass 69. Norman, OK, 1992, pp. 334–345
- IX Volcanoes as accidents: how 'natural' were volcanoes to 18th-century naturalists? 595–618
Volcanoes and History, ed. N. Morello. Genoa: Brigati, 1998
- X Two ways of imagining the earth at the close of the 18th century: descriptive and theoretical traditions in early geology 369–378
Abraham Gottlob Werner and the Foundation of the Geological Sciences: Selected Papers of the International Werner Symposium in Freiberg 19th to 24th September 1999, eds. H. Albrecht and R. Ladwig. Freiberg: Technische Universität Bergakademie Freiberg, 2002

THE EMERGING NEW GEOLOGICAL SCIENCE

- XI Early geoscience mapping, 1700–1830 1–44
Proceedings of the Geoscience Information Society 15. Alexandria, VA, 1985, pp. 15–49

- XII Geology in 1776: some notes on the character of an incipient science 75–90
Two Hundred Years of Geology in America: Proceedings of the New Hampshire Bicentennial Conference on the History of Geology, ed. C.J. Schnee. Hanover, NH: The University Press of New England, 1979
- XIII The beginnings of a French geological identity 65–82
Histoire et Nature 19–20. Paris, 1981–1982
- XIV The *Époques de la Nature* and geology during Buffon's later years 371–385
Buffon 88: Actes du Colloque International pour le Bicentenaire de la Mort de Buffon, ed. J. Gayon. Paris: Librairie Philosophique Vrin, 1992
- XV Earth and heaven, 1750–1800: Enlightenment ideas about the relevance to geology of extraterrestrial operations and events 1–15
Earth Sciences History 17. Morgantown, WV, 1998, pp. 84–91
- Index 1–6
