1 Contents

Many, many thanks 7

2 Introduction 15
2.1 A short history of open access 15
2.2 Defining usage 16
2.3 Books versus journals 18
2.4 Central thesis and research questions 19

3 The influence of open access on monograph sales : The experience at Amsterdam University Press 21
3.1 Introduction 21
3.2 The data set 23
3.3 Influences on monograph sales 24
3.3.1 Commercial potential 24
3.3.2 Frontlist and backlist 25
3.3.3 Language 25
3.4 Data and Results 26
3.4.1 Separate influences 27
3.4.2 Combining influences 27
3.4.3 Frontlist: data and results 27
3.4.4 Backlist: data and results 28
3.5 Discussion 31
3.6 Limitations 33
3.7 Acknowledgements 33
3.8 Appendix 1: ANOVA results per influence 34
3.9 Appendix 2: Frontlist results 35
3.10 Appendix 3: Backlist results 36

4 Modes of access : The influence of dissemination channels on the use of open access monographs 39
4.1 Introduction 39
4.2 Dissemination channels 40
4.3 Quantitative analysis 42
4.3.1 The data set 42
4.3.2 Downloads per dissemination channel 45
4.4 Qualitative analysis 46

Snijder, Albert Ronald
The deliverance of open access books

digitalisiert durch:
IDS Basel Bern

4.4.1 Characteristics of users and dissemination channels 46
4.4.2 Type of users and dissemination channels 49
4.4.3 Characteristics of internet infrastructure 50
4.4.4 Characteristics of content and dissemination channels 51
4.4.5 Language and dissemination channels 51
4.4.6 Subject and dissemination channels 53
4.5 Conclusions 54
4.6 Limitations 56
4.7 Acknowledgements 57
4.8 Annex 1: list of countries with a highly-developed internet infrastructure 57
4.9 Annex 2: downloads per language 58
4.10 Annex 3: downloads per subject 59

5 Better sharing through licenses? : Measuring the influence of Creative Commons licenses on the usage of open access monographs 61
5.1 Introduction 61
5.2 The OAPEN Library and the DOAB 63
5.3 Examining the Impact of Licenses on use 63
5.4 Literature review 65
5.4.1 Tensions between the interests of creators and users 65
5.4.2 Balancing interests using Creative Commons licenses 66
5.4.3 Do Creative Commons licenses enhance usage? 67
5.5 Methods and the data set 67
5.6 Analysis 70
5.6.1 Impact of licensing on OAPEN downloads 72
5.6.2 Impact of license-enabled aggregation on OAPEN Downloads 75
5.7 Discussion 78
5.8 Conclusion 79
5.9 Limitations 80
5.10 Acknowledgements 81

6 Patterns of information : Clustering books and readers in open access libraries 83
6.1 Introduction 83
6.2 Background 83
6.2.1 Recommender systems 84
6.2.2 Libraries, privacy and the role of the catalogue 85

6.2.3 Clustering books and readers through social network analysis? 86
6.3 Quantifying the data set 88
6.3.1 The collection 88
6.3.2 The books 89
6.3.3 The providers 91
6.3.4 The influence of the collection 93
6.4 Analysis 93
6.4.1 Examining clusters – the OAPEN collection in 2012 93
6.4.2 Analysis results – 2012 95
6.4.3 Examining clusters – the OAPEN collection in 2014 97
6.4.4 Analysis results – 2014 98
6.5 Creating recommendations based on clusters 100
6.6 Discussion 100
6.7 Conclusion 102
6.8 Acknowledgements 103

7 Measuring monographs:
A quantitative method to assess scientific impact and societal relevance 105
7.1 Monographs under pressure 105
7.2 Scientific impact, societal relevance and monographs 106
7.3 The method 109
7.3.1 Defining stakeholders: scientific impact and societal relevance 110
7.3.2 Selecting a channel to measure usage 112
7.4 The OAPEN Library as dissemination channel 112
7.5 Setup of the research 113
7.5.1 Measuring usage at the level of separate titles 114
7.5.2 Measuring usage at the level of the complete collection 115
7.6 Are all ISPs equal? 116
7.6.1 Internet infrastructure and ISPs 116
7.6.2 A refined categorisation of ISP usage statistics 119
7.7 Possible influences on usage 120
7.7.1 Subject – highest level 120
7.7.2 Language – highest level 123
7.7.3 Subject – book level 127
7.7.4 Language – book level 142
7.8 Conclusion 147
7.8.1 The method as addition to existing assessments 147

7.8.2 Discussion of the results 148
7.8.3 Possible refinements to the method 150
7.8.4 Evaluation of the results 151

8 Do developing countries profit from free books? : Discovery and online usage in developed and developing countries compared 153
8.1 Introduction 153
8.2 Open access monographs and the digital divide 154
8.3 Setup of the experiment 156
8.4 Selection of titles and removal of bias 158
8.5 Research results and documenting the digital divide 159
8.6 Discussion of the results 163
8.7 Conclusions 165

9 Revisiting an open access monograph experiment : Measuring citations and tweets five years later 167
9.1 Introduction 167
9.2 Background 168
9.2.1 Citations and books 169
9.2.2 Altmetrics 171
9.2.3 What is the relation between citations and altmetrics? 172
9.2.4 Twitter as research tool 173
9.2.5 The influence of language 174
9.2.6 The influence of subject 174
9.3 Research setup and the data set 175
9.3.1 Obtaining citations using Google Scholar 178
9.3.2 Finding tweets using Topsy.com 179
9.4 The results 179
9.4.1 Analysis of citations and tweets 182
9.4.2 Statistical analysis within subject 185
9.4.3 Correlating citations and tweets 187
9.5 Conclusions 188
9.6 Further investigation: beyond the OA citation adsvantage? 190
9.7 Limitations 191
9.8 Acknowledgements 191

10 Conclusions 193
10.1 Introduction 193
10.2 Web based data sets and data providers 196

10.3 Economic sustainability 198
10.4 Factors affecting dissemination 200
10.4.1 What works in digital dissemination? 202
10.4.2 Clustering books and readers 206
10.5 Evaluation of results 208
10.5.1 Impact measured 209
10.5.2 Indications of impact 211
10.6 Concluding remarks: factors affecting usage and the impact of open access 215
10.7 Practical implications and further research 217
