

Detailed Contents

Preface vii
Dedication xiv

UNIT ONE Introduction to Motor Skills and Abilities 1

- 1 The Classification of Motor Skills, 2**
Application, 2
Discussion, 3
Skills, Actions, and Movements, 4
One-Dimension Classification Systems, 7
Gentile's Two-Dimensions Taxonomy, 11
- Error Measures, 28*
Kinematic Measures, 33
Kinetics, 36
EMG, 38
Brain Activity Measures, 39
Measuring Coordination, 42
- 2 The Measurement of Motor Performance, 22**
Application, 22
Discussion, 23
Reaction Time, 24
- 3 Motor Abilities, 48**
Application, 48
Discussion, 48
Ability and Motor Ability, 49

UNIT TWO Introduction to Motor Control 63

- 4 Neuromotor Basis for Motor Control, 64**
Application, 64
Discussion, 65
The Neuron, 65
The Central Nervous System, 67
The Neural Control of Voluntary Movement, 76
- Two Theories of Motor Control, 90*
The Present State of the Control Theory Issue, 103
- 5 Motor Control Theories, 81**
Application, 81
Discussion, 82
Theory and Professional Practice, 83
Motor Control Theory, 83
Open-Loop and Closed-Loop Control Systems, 88
- 6 Sensory Components of Motor Control, 108**
Application, 108
Discussion, 109
Touch and Motor Control, 109
Proprioception and Motor Control, 111
Vision and Motor Control, 119
Investigating the Role of Vision in Motor Control, 122
The Role of Vision in Motor Control, 125

7 Performance and Motor Control Characteristics of Functional Skills, 135

Application, 135

Discussion, 136

*Speed-Accuracy Skills, 136**Prehension, 142**Handwriting, 146**Bimanual Coordination Skills, 148**Locomotion 150**Catching a Moving Object, 158**Striking a Moving Object, 161***8 Action Preparation, 169**

Application, 169

Discussion, 170

*Action Preparation Requires Time, 170**Task and Situation Characteristics Influencing Preparation, 170**Performer Characteristics Influencing Preparation, 179**What Occurs during Preparation? 181***UNIT THREE Attention and Memory 193**

9 Attention as a Limited Capacity Resource, 194

Application, 194

Discussion, 195

*Attention and Multiple Task Performance, 196**The Dual-Task Procedures for Assessing Attention Demands, 202**Focusing Attention, 203**Attention and Automaticity, 206**Visual Selective Attention, 207**Visual Search and Motor Skill Performance, 210**Training Visual Search Strategies, 215**Working Memory, 223**Long-Term Memory, 227**Remembering and Forgetting, 230**Assessing Remembering and Forgetting, 230**The Causes of Forgetting, 233**Movement Characteristics Related to Memory Performance, 236**Strategies that Enhance Memory Performance, 238**Practice-Test Context Effects, 242***10 Memory Components, Forgetting, and Strategies, 221**

Application, 221

Discussion, 222

*Memory Structure, 222***UNIT FOUR Introduction to Motor Skill Learning 247**

11 Defining and Assessing Learning, 248

Application, 248

Discussion, 248

*Performance Distinguished from Learning, 249**General Performance Characteristics of Skill Learning, 249**Assessing Learning by Observing Practice Performance, 250**Assessing Learning by Retention Tests, 254**Assessing Learning by Transfer Tests, 256**Assessing Learning from Coordination Dynamics, 257**Practice Performance May Misrepresent Learning, 258***12 The Stages of Learning, 265**

Application, 265

Discussion, 266

*The Fitts and Posner Three-Stage Model, 266**Gentile's Two-Stage Model, 267**Performer and Performance Changes across the Stages of Learning, 271**A Performer Characteristic that Does Not Change across the Stages of Learning, 282**Expertise, 283*

- 13 Transfer of Learning, 289**
 Application, 289
 Discussion, 290
 What Is Transfer of Learning? 290
 Why Is Transfer of Learning Important? 290

Why Does Positive Transfer of Learning Occur? 292
Negative Transfer, 296
Bilateral Transfer, 298

UNIT FIVE **Instruction and Augmented Feedback 307**

- 14 Demonstration and Verbal Instructions, 308**
 Application, 308
 Discussion, 309
 Demonstration, 309
 The Neural Basis for Observational Learning:
 Mirror Neurons in the Brain 314
 Verbal Instructions and Cues, 320

The Roles of Augmented Feedback in Skill Acquisition, 336
How Essential is Augmented Feedback for Skill Acquisition? 337
The Content of Augmented Feedback, 340
Types of Knowledge of Performance, 346
Timing Issues Related to Augmented Feedback, 352
The KR-Delay and Post-KR Intervals, 355
Frequency of Presenting Augmented Feedback, 359
Techniques that Reduce Augmented Feedback Frequency, 361

- 15 Augmented Feedback, 332**
 Application, 332
 Discussion, 333
 The Feedback Family, 334
 Types of Augmented Feedback, 334

UNIT SIX **Practice Conditions 369**

- 16 Practice Variability and Specificity, 370**
 Application, 370
 Discussion, 371
 The Future Performance Benefit of Practice Variability, 371
 Implementing Practice Variability, 372
 Organizing Variable Practice, 375
 Accounting for the Contextual Interference Effect, 384
 Practice Specificity, 385
- 17 The Amount and Distribution of Practice, 393**
 Application, 393
 Discussion, 394
 Overlearning and Learning Motor Skills, 395
 The Overlearning Strategy Can Lead to Poor Test Performance, 397
 Overlearning and Other Practice Variables, 398
 The Distribution of Practice, 399
 Defining Massed and Distributed Practice, 399
 The Length and Distribution of Practice Sessions, 399
 The Intertrial Interval and Practice Distribution, 404

- 18 Whole and Part Practice, 409**
 Application, 409
 Discussion, 410
 Skill Complexity and Organization, 410
 Practicing Parts of a Skill, 412
 An Attention Approach to Involving Part Practice in Whole Practice, 422
- 19 Mental Practice, 427**
 Application, 427
 Discussion, 428
 Two Roles for Mental Practice, 428
 Mental Practice Aids Skill Acquisition, 429
 Mental Practice Aids Performance Preparation, 434
 Why Is Mental Practice Effective? 435
 Mental Practice and Imagery Ability, 436

Glossary 441
 Name Index 450
 Subject Index 458
