Foreword ix

Will Richardson

Introduction 1

Nancy Walser

PART I: TECHNOLOGY IN THE CLASSROOM

1 Internet Research 101 9

How to help middle school students avoid getting tangled up in the Web

Colleen Gillard

2 Better Teaching with Web Tools 17

How blogs, wikis, and podcasts are changing the classroom

Colleen Gillard

3 “Dumb” Phones, Smart Lessons 31

Schools answer student calls for mobile computing

Colleen Gillard

4 Teaching 21st Century Skills 37

What does it look like in practice?

Nancy Walser

- 5 The Classroom of Popular Culture** 47
What video games can teach us about making students
want to learn
James Paul Gee

PART II: TECHNOLOGY AND ASSESSMENT

- 6 Online Testing, Version 1.0** 57
Oregon's adaptive computer-based accountability
test offers a peek at a brave new future
Robert Rothman
- 7 Video Games Take Testing to the Next Level** 65
Researchers see promise in game-like assessments
that measure complex skills
Robert Rothman
- 8 The Promise of New State Tests** 73
Two consortia plan better tests, but will they lead
to better instruction?
Robert Rothman

PART III: TECHNOLOGY AND SCHOOL IMPROVEMENT

- 9 "Equity, Access, and Opportunity"** 81
Despite challenges, more districts adopt one-to-one
laptop programs
Colleen Gillard
- 10 Learning Across Distance** 91
Virtual-instruction programs are growing rapidly,
but the impact on "brick-and-mortar" classrooms
is still up in the air
Kristina Cowan

11	Hybrid Schools for the iGeneration	101
	New schools combine “bricks” and “clicks”	
	<i>Brigid Schulte</i>	
12	Like Teacher, Like Student	113
	Online PD helps teachers learn to collaborate so their students will, too	
	<i>Dave Saltman</i>
