VOLUME 1

ABS Indices	1	Basket Options	164
Accumulated Claims	4	Bates Model	166
Actuarial Premium Principles	7	Behavioral Portfolio Selection	168
Adverse Selection	13	Bermudan Options	175
Affine Models	16	Bermudan Swaptions and Callable Libor Exotics	177
Algorithmic Trading	20	Bernoulli, Jacob	181
Alternating Direction Implicit (ADI) Method	30	Bid-Ask Spreads	184
Altiplano Option	37	Binomial Tree	190
Ambiguity	39	Black, Fischer	194
American Options	44	Black-Litterman Approach	196
Arbitrage Bounds	53	Black-Scholes Formula	199
Arbitrage: Historical Perspectives	61	Bond	207
Arbitrage Pricing Theory	71	Bond Options	212
Arbitrage Strategy	74	Bubbles and Crashes	216
Arrow, Kenneth	76	Butterfly	230
Arrow-Debreu Prices	82	Call Auction Markets	233
Asian Options	87	Call Options	236
Asset-Liability Management	91	Call Spread	239
Atlas Option	107	Capital Asset Pricing Model	241
Autocall	108	Caps and Floors	250
Automated Trading	111	Catastrophe Bonds	253
Autoregressive Moving Average (ARMA) Processes	114	CDO Square	255
Average Strike Options	120	CDO Tranches: Impact on Economic Capital	257
Bachelier, Louis (1870-1946)	123	Change of Numeraire	264
Backtesting	127	Cliquet Options	268
Backward Stochastic Differential Equations	134	CMS Spread Products	269
Backward Stochastic Differential Equations: Numerical Methods	145	Collateralized Debt Obligation (CDO) Options	273
Barndorff-Nielsen and Shephard (BNS) Models	152	Collateralized Debt Obligations (CDO)	278
Barrier Options	155	Commodities and Numéraire	284
Base Correlation	158	Commodity Forward Curve Modeling	291
Basket Default Swaps	161	Commodity Price Models	298
		Commodity Risk	303
		Commodity Trading	308
		Compensators	314
		Complete Markets	317

xii *Contents*

Conjugate Gradient Methods	324
Constant Elasticity of Variance (CEV)	
Diffusion Model	328
Constant Maturity Credit Default	
Swap	334
Constant Maturity Swap	338
Constant Proportion Portfolio	
Insurance	344
Convertible Bonds	347
Convex Duality	350
Convex Risk Measures	355
Convexity Adjustments	363
Copulas: Estimation	368
Copulas in Econometrics	375
Copulas in Insurance	379
Correlation Risk	382
Correlation Swap	386
Corridor Options	387
Corridor Variance Swap	392
Counterparty Credit Risk	393
Cox–Ingersoll–Ross (CIR) Model	401
Cramér–Lundberg Estimates	404
Cramér’s Theorem	407
Crank–Nicolson Scheme	410
Credibility Theory	414
Credit Default Swap (CDS) Indices	420
Credit Default Swap Index Options	422
Credit Default Swaps	424
Credit Default Swaption	431
Credit Migration Models	434
Credit Portfolio Insurance	441
Credit Portfolio Simulation	447
Credit Rating	450
Credit Risk	456
CreditRisk+	459
Credit Scoring	462
Currency Forward Contracts	467
Default Barrier Models	475
Default Time Copulas	479
Delta Hedging	482
Discretely Monitored Options	484
Dispersion Trading	486
Diversification	487
Dividend Modeling	489
Doob–Meyer Decomposition	493
Drawdown Minimization	495
Duffie–Singleton Model	499
Dupire Equation	501
Duration Models	504
