

VOLUME 2

Early Exercise Options: Upper Bounds	507
Econometrics of Diffusion Models	512
Econometrics of Option Pricing	518
Economic Capital	528
Economic Capital Allocation	531
Econophysics	535
Efficient Market Hypothesis	538
Efficient Markets Theory: Historical Perspectives	542
Electricity Forward Contracts	546
Electricity Markets	549
Emissions Trading	555
Employee Stock Options	561
Entropy-based Estimation	567
Equity–Credit Problem	571
Equity Default Swaps	575
Equity Swaps	577
Equivalence of Probability Measures	580
Equivalent Martingale Measures	583
Esscher Transform	589
Eurodollar Futures and Options	592
Exchange Options	594
Exchange-traded Funds (ETFs)	611
Execution Costs	612
Exercise Boundary Optimization Methods	617
Expectations Hypothesis	621
Expected Shortfall	630
Expected Utility Maximization	634
Expected Utility Maximization: Duality Methods	638
Exponential Lévy Models	646
Exposure to Default and Loss Given Default	651
Extreme Value Theory	657
Factor Models	669
Filtering	674
Filtrations	683
Finite Difference Methods for Barrier Options	687
Finite Difference Methods for Early Exercise Options	695
Finite Element Methods	704
Fisher, Irving	711
Fixed Mix Strategy	714
Foreign Exchange Basket Options	717

Foreign Exchange Markets	722	Implied Volatility: Market Models	916
Foreign Exchange Options	727	Implied Volatility in Stochastic Volatility Models	920
Foreign Exchange Options: Delta- and At-the-money Conventions	731	Implied Volatility Surface	926
Foreign Exchange Smile Interpolation	742	Implied Volatility: Volvol Expansion	931
Foreign Exchange Smiles	745	Infinite Divisibility	935
Foreign Exchange Symmetries	752	Inflation Derivatives	938
Forward and Swap Measures	760	Insurance Derivatives	948
Forward–Backward Stochastic Differential Equations (SDEs)	763	Insurance Risk Models	952
Forward-starting CDO Tranche	770	Integral Equation Methods for Free Boundaries	956
Forwards and Futures	773	Intensity-based Credit Risk Models	963
Fourier Methods in Options Pricing	778	Intensity Gamma Model	966
Fourier Transform	782	Internal-ratings-based Approach	968
Fractional Brownian Motion	787	Intraday Price Efficiency	973
Free Lunch	790	Inventory Effects	976
Fundamental Theorem of Asset Pricing	792	Itô, Kiyosi (1915–2008)	979
		Itô’s Formula	981
Gamma Hedging	803	Jarrow–Lando–Turnbull Model	985
Gamma Swap	807	Jump-diffusion Models	987
GARCH Models	809	Jump Processes	990
Gaussian Copula Model	820		
Gaussian Interest-Rate Models	828	VOLUME 3	
Generalized Hyperbolic Models	833	Kelly Problem	995
Generalized Method of Moments (GMM)	836	Kolmogorov, Andrei Nikolaevich	998
Gerber–Shiu Function	841	Kou Model	999
Glosten–Milgrom Models	842	Kyle Model	1005
Good-deal Bounds	846		
		Large Deviations	1009
Hazard Rate	853	Large Pool Approximations	1017
Heath–Jarrow–Morton Approach	856	Lattice Methods for Path-dependent Options	1022
Heavy Tails	860	Leveraged Super-senior Tranche	1027
Heavy Tails in Insurance	873	LIBOR Market Model	1031
Hedge Funds	875	LIBOR Market Models: Simulation	1036
Hedging	881	LIBOR Rate	1041
Hedging of Interest Rate Derivatives	884	Life Insurance	1042
Heston Model	889	Limit Order Markets	1057
High-frequency Data	898	Liquidity	1062
Himalayan Option	904	Liquidity Premium	1066
Hull–White Stochastic Volatility Model	905	Loan Valuation	1071
		Local Correlation Model	1075
Implied Volatility: Large Strike Asymptotics	909	Local Times	1078
Implied Volatility: Long Maturity Behavior	913	Local Volatility Model	1080
		Lognormal Mixture Diffusion Model	1086
		Long Range Dependence	1088
		Long-Term Capital Management	1091
		Lookback Options	1096

Lévy Copulas	1104	Oil Market	1315
Lévy Processes	1108	Operational Risk	1319
Managed CDO	1113	Optimization Methods	1322
Mandelbrot, Benoit	1115	Option Pricing: General Principles	1327
Margrabe Formula	1118	Option Pricing Theory: Historical Perspectives	1331
Market Microstructure Effects	1120	Options: Basic Definitions	1341
Market Risk	1123	Order Flow	1344
Market Transparency	1131	Order Types	1349
Markov Functional Models	1138	Ornstein–Uhlenbeck Processes	1352
Markov Processes	1142	Parisian Option	1355
Markovian Term Structure Models	1159	Partial Differential Equations	1357
Markowitz, Harry	1164	Partial Integro-differential Equations (PIDEs)	1363
Martingale Representation Theorem	1166	Passport Options	1368
Martingales	1171	Performance Measures	1372
Mean–Variance Hedging	1177	Phase-type Distribution	1375
Measurements Errors	1181	Point Processes	1376
Merton Problem	1184	Poisson Process	1380
Merton, Robert C.	1188	Portfolio Credit Risk: Statistical Methods	1384
Method of Lines	1191	Predictability of Asset Prices	1387
Minimal Entropy Martingale Measure	1195	Price Impact	1402
Minimal Martingale Measure	1200	Pricing Formulae for Foreign Exchange Options	1408
Mixed Data Sampling	1204	Pricing Kernels	1418
Mixture of Distribution Hypothesis	1207	Probability of Informed Trading	1428
Model Calibration	1210	Pseudorandom Number Generators	1431
Model Validation	1219	Put–Call Parity	1437
Modeling Correlation of Structured Instruments in a Portfolio Setting	1220	Quadratic Gaussian Models	1441
Models	1226	Quadrature Methods	1444
Modern Portfolio Theory	1232	Quantization Methods	1451
Modigliani, Franco	1239	Quanto Options	1455
Modigliani–Miller Theorem	1241	Quasi-Monte Carlo Methods	1460
Moment Explosions	1247		
Monotone Schemes	1253		
Monte Carlo Greeks	1263		
Monte Carlo Simulation	1266		
Monte Carlo Simulation for Stochastic Differential Equations	1271		
Multifractals	1278		
Multigrid Methods	1283		
Multiname Reduced Form Models	1288		
Multivariate Distributions	1296		
Municipal Bonds	1300		
Mutual Funds	1304		
Nested Simulation	1307		
Normal Inverse Gaussian Model	1311
