Résumé	5
Abstract	13
Introduction	21
1 The Bell Beaker... a phenomenon... an enigma	23
1.1 The situation preceding the Bell Beaker culture	23
1.2 Data	23
1.2.1 The Bell Beaker material culture	23
1.2.2 Funerary structures	25
1.2.3 Domestic structures	28
1.2.4 The chronology	29
1.3 The Bell Beaker of yesteryear	29
1.4 The Bell Beaker today	31
1.5 And when the individual associated with the Bell Beaker culture is expressed... ..	32
1.6 An interdisciplinary program... a common objective	34
1.7 Research objectives	35
2 From cultural group to the individual	37
2.1 Selected regions	37
2.2 The eastern domain: Bohemia	38
2.2.1 The Bell Beaker in Bohemia: its cultural, spatial and temporal position	38
2.2.2 The Bell Beaker in Bohemia: archaeological data	38
2.2.3 The Bell Beaker in Bohemia: anthropological data	39
2.2.4 The Bell Beaker in Bohemia: the samples studied	39
2.3 The eastern domain: Hungary	40
2.3.1 The Bell Beaker in Hungary: its cultural, spatial and temporal position	40
2.3.2 The Bell Beaker in Hungary: archaeological data	41
2.3.3 The Bell Beaker in Hungary: anthropological data	41
2.3.4 The Bell Beaker in Hungary: the samples studied	42
2.4 The southern domain: Southern France	43
2.4.1 The Bell Beaker in Southern France: its cultural, spatial and temporal position	43
2.4.2 The Bell Beaker in Southern France: archaeological data	43
2.4.3 The Bell Beaker in Southern France: anthropological data	44
2.4.4 The Bell Beaker in Southern France: the samples studied	44

2.5 The southern domain: Northern Spain	45
2.5.1 The Bell Beaker in Northern Spain: its cultural, spatial and temporal position	46
2.5.2 The Bell Beaker in Northern Spain: archaeological data	46
2.5.3 The Bell Beaker in Northern Spain: anthropological data	46
2.5.4 The Bell Beaker in Northern Spain: the samples studied	47
2.6 At the articulation between two domains: Switzerland	48
2.6.1 The Bell Beaker in Switzerland: its cultural, spatial and temporal position	48
2.6.2 The Bell Beaker in Switzerland: archaeological data	48
2.6.3 The Bell Beaker in Switzerland: anthropological data	48
2.6.4 The Bell Beaker in Switzerland: the samples studied	49
3 Dental terminology	51
3.1 Anatomy of a tooth	51
3.2 The dentition	51
3.2.1 Positioning terms	52
3.2.2 Descriptive morphological terms	53
3.2.3 Terms reserved for the anterior teeth	53
3.2.4 Terms reserved for the posterior teeth	53
3.3 Systems of dental notation	54
3.4 Supplementary definitions	55
4 Non-metric dental traits: indicators of distance between populations	57
4.1 A short history of research	57
4.2 Non-metric dental traits	58
4.2.1 Dental ontogeny	58
4.2.1.1 Dental development	59
4.2.1.2 Molecular aspects	60
4.2.1.3 Biological aspects	62
4.2.2 The mode of inheritance of non-metric dental traits	63
4.2.3 Environmental effects	64
4.2.4 Heritability of non-metric dental traits	65
4.3. Reliability of the recording system	66
4.4 The potential of these variables in comparative population studies	68
5 From tooth to trait	71
5.1 Non-metric dental traits	71
5.1.1 Trait selection	71
5.1.2 The different types of dental data	77
5.2 Data acquisition	77
5.2.1 Creation of the manual data recording form	77
5.2.2 Creation of a database	78
5.3 Evaluation of intra- and interobserver concordance	78
5.3.1 Evaluation of the concordance in the determination of the dentition	78

5.3.2 Evaluation of agreement in modes of observation of non-metric dental traits	80
5.3.2.1 Evaluation of absolute discrepancy	81
5.3.2.2 Evaluation of agreement in trait observation	81
5.3.2.3 Evaluation of discrepancy in recorded gradations	82
5.3.2.4 Percentage of attribution of more than one stage of difference between two sessions	83
5.3.2.5 Raw mean error	83
5.3.2.6 The degree of similarity in distributions	84
5.3.2.7 Agreement in the recording of dental traits: summary	85
6 Preliminary data treatment	87
6.1 Descriptive statistics	87
6.1.1 Treatment of non-numeric data	87
6.1.2 Total observation counts	87
6.1.3 Verification of data transcription	88
6.1.4 Relevance of observed variables	88
6.1.4.1 Status of the variables observed for Bohemia	90
6.1.4.2 Status of the variables observed for Hungary	91
6.1.4.3 Status of the variables observed for Southern France	92
6.1.4.4 Status of the variables observed for Northern Spain	93
6.1.4.5 Status of the variables observed for Switzerland	93
6.1.4.6 Status of the variables observed: summary	94
6.2 Asymmetry of the antimeres	94
6.2.1 The similarity degree of antimeres	95
6.2.1.1 Results of correlations between antimeres for Bohemia	96
6.2.1.2 Results of correlations between antimeres for Hungary	97
6.2.1.3 Results of correlations between antimeres for Southern France	98
6.2.1.4 Results of correlations between antimeres for Northern Spain	99
6.2.1.5 Results of correlations between antimeres for Switzerland	100
6.2.1.6 Results of correlations between antimeres: summary	101
6.2.2 Treatment of antimeres	101
6.2.2.1 Treatment of antimeres for Bohemia	103
6.2.2.2 Treatment of antimeres for Hungary	103
6.2.2.3 Treatment of antimeres for Southern France	103
6.2.2.4 Treatment of antimeres for Northern Spain	103
6.2.2.5 Treatment of antimeres for Switzerland	103
6.2.2.6 Treatment of antimeres: summary	104
6.3 Correlations between traits	104
6.3.1 Intradistrict correlations	105
6.3.1.1 Intradistrict correlations for Bohemia	106
6.3.1.2 Intradistrict correlations for Hungary	107
6.3.1.3 Intradistrict correlations for Southern France	107
6.3.1.4 Intradistrict correlations for Northern Spain	107
6.3.1.5 Intradistrict correlations for Switzerland	107
6.3.1.6 Intradistrict correlations: summary	107
6.3.2 Interdistrict correlations	107

6.3.2.1 Interdistrict correlations for Bohemia	108
6.3.2.2 Interdistrict correlations for Hungary	109
6.3.2.3 Interdistrict correlations for Southern France	109
6.3.2.4 Interdistrict correlations for Northern Spain	109
6.3.2.5 Interdistrict correlations Switzerland	109
6.3.2.6 Interdistrict correlations: summary	109
6.3.3 Intertrait correlations: Carabelli's trait (T24)-protostylid (T54)	109
6.3.3.1 Intertrait correlations for Bohemia	109
6.3.3.2 Intertrait correlations for Hungary	109
6.3.3.3 Intertrait correlations for Southern France	110
6.3.3.4 Intertrait correlations for Northern Spain	110
6.3.3.5 Intertrait correlations for Switzerland	110
6.3.3.6 Intertrait correlations: summary	110
6.4 Sexual dimorphism	110
6.4.1 Test of independence of sex in the expression of traits	111
6.4.1.1 Results for sexual dimorphism of traits for Bohemia	112
6.4.1.2 Results for sexual dimorphism of traits for Switzerland	112
6.4.1.3 Results for sexual dimorphism of traits: summary	112
7 Data analysis	115
7.1 The procedure applied	115
7.1.1 Calculation of population frequencies	115
7.1.2 Calculation of adjusted frequencies	115
7.1.3 Selection of variables for inclusion in the analyses	117
7.1.4 Analyses used	117
7.2 Analysis of assemblages	118
7.2.1 The eastern domain	119
7.2.1.1 Bohemia	119
7.2.1.1.1 Composition of the groups tested	119
7.2.1.1.2 Population frequencies	120
7.2.1.1.3 Variables used in the analyses	120
7.2.1.1.4 Analyses	120
7.2.1.2 Hungary	124
7.2.1.2.1 Composition of the groups tested	124
7.2.1.2.2 Population frequencies	124
7.2.1.2.3 Variables used in the analyses	125
7.2.1.2.4 Analyses	125
7.2.1.3 Relationships between assemblages in the eastern domain	126
7.2.1.3.1 Composition of the groups tested	126
7.2.1.3.2 Variables used in the analyses	127
7.2.1.3.3 Analyses	127
7.2.2 The southern domain	129
7.2.2.1 Southern France	129
7.2.2.1.1 Composition of the groups tested	129
7.2.2.1.2 Population frequencies	129

7.2.2.1.3 Variables used in the analyses	130
7.2.2.1.4 Analyses	132
7.2.2.2 Northern Spain	133
7.2.2.2.1 Composition of the groups tested	133
7.2.2.2.2 Population frequencies	134
7.2.2.2.3 Variables used in the analyses	134
7.2.2.2.4 Analyses	136
7.2.2.3 Relationships between assemblages of the southern domain	136
7.2.2.3.1 Composition of the groups tested	136
7.2.2.3.2 Variables used in the analyses	137
7.2.2.3.3 Analyses	137
7.2.3 At the interface between the two domains: Switzerland	138
7.2.3.1 Switzerland	138
7.2.3.1.1 Composition of the groups tested	138
7.2.3.1.2 Population frequencies	139
7.2.3.1.3 Variables used in the analyses	139
7.2.3.1.4 Analyses	140
7.2.3.2 Relationships between Switzerland and the eastern domain	143
7.2.3.2.1 Composition of the groups tested	143
7.2.3.2.2 Variables used in the analyses	144
7.2.3.2.3 Analyses	144
7.2.3.3 Relationships between Switzerland and the southern domain	145
7.2.3.3.1 Composition of the groups tested	145
7.2.3.3.2 Variables used in the analyses	146
7.2.3.3.3 Analyses	146
7.2.4 Relationships between the Bell Beaker populations	147
7.2.4.1 Composition of the groups tested	147
7.2.4.2 Variables used in the analyses	147
7.2.4.3 Analyses	148
7.2.5 Bohemia: unmixed gender analysis	152
7.2.5.1 Composition of the groups tested	152
7.2.5.2 Population frequencies	153
7.2.5.3 Variables used in the analyses	153
7.2.5.4 Analyses	153
8 From discussion to interpretation	159
8.1 Discussion at the regional scale	159
8.1.1 Bohemia	159
8.1.2 Hungary	160
8.1.3 Southern France	161
8.1.4 Northern Spain	162
8.1.5 Switzerland	162
8.2 Discussion on a broad scale	163
8.3 Hypothesis for Bell Beaker population dynamics	165
Conclusions	169
