

Contents

Preface	vii
Opening Lectures	
Tools for the Analysis of Chaotic Data HENRY D. I. ABARBANEL	1
Some Comments on Nonlinear Time Series Analysis HOWELL TONG	17
Embeddings, Dimension, and System Reconstruction	
A General Approach to Predictive and Fractal Scaling Dimensions in Discrete-Index Time Series COLLEEN D. CUTLER	29
Statistics for Continuity and Differentiability: An Application to Attractor Reconstruction from Time Series LOUIS M. PECORA, THOMAS L. CARROLL and JAMES F. HEAGY	49
Reconstruction of Integrate-and-Fire Dynamics TIM SAUER	63
Surrogate Data Methodology	
On the Validity of the Method of Surrogate Data KUNG-SIK CHAN	77
Using "Surrogate Surrogate Data" to Calibrate the Actual Rate of False Positives in Tests for Nonlinearity in Time Series JAMES THEILER and DEAN PRICHARD	99

Local Lyapunov Exponents

- Chaos with Confidence: Asymptotics and Applications of
Local Lyapunov Exponents 115
BARBARA A. BAILEY, STEPHEN ELLNER
and DOUGLAS W. NYCHKA
- Estimating Local Lyapunov Exponents 135
ZHAN-QIAN LU and RICHARD L. SMITH

Long-Range Dependence

- Defining and Measuring Long-Range Dependence 153
PETER HALL
- Modelling Nonlinearity and Long Memory in Time Series 161
PETER M. ROBINSON and PAOLO ZAFFARONI

Data Analysis and Applications

- Ergodic Distributions of Random Dynamical Systems 171
L. MARK BERLINER, STEVEN N. MACEACHERN
and CATHERINE SCIPIONE FORBES
- Detecting Structure in Noise 187
LISA BORLAND
- Characterizing Nonlinearity in Weather and Epilepsy Data:
A Personal View 201
MARTIN C. CASDAGLI
- Assessment of Linear and Nonlinear Correlations Between
Neural Firing Events 223
ANDRÉ LONGTIN and DANIEL M. RACICOT
- Markov Chain Methods in the Analysis of Heart Rate Variability 241
STEPHEN J. MERRILL and JOHN R. COCHRAN
