

Contents

Preface vii

- 1 The Roles of Signals and Boundaries 1
- 2 Theory and Models: General Principles 35
- 3 Agents and Signal Processing 57
- 4 Networks and Flows 85
- 5 Adaptation 99
- 6 Recombination and Reproduction 117
- 7 Urn Models of Boundaries 131
- 8 Boundary Hierarchies 145
- 9 The Evolution of Niches—A First Look 159
- 10 Language: Grammars and Niches 181
- 11 Grammars as Finitely Generated Systems 205
- 12 An Overarching Signal/Boundary Framework 217
- 13 A Dynamic Generated System Model of Ontogeny 229

14	A Complete Dynamic Generated System for Signal/ Boundary Studies	245
15	Mathematical Models of Generated Structures	265
16	A Short Version of the Whole	281
	References	297
	Index	303
