Introduction 3

A: Context of discovery

1 Social inequality in (religious) education: A theological problem 7
1.1 The theological significance of social inequality 7
1.2 Theological perspectives on social inequality in (religious) education 22
1.3 Summary and discussion 43

2 Social inequality and education: insights from the social sciences 47
2.1 A clarification of the concept 'social inequality' 47
2.2 Social inequality in the educational system: empirical findings 53
2.3 Explaining social inequality in education: the contributions of Bourdieu and Boudon 62
2.4 Summary and discussion 80

3. The field of interreligious learning: exploring the demands on students 85
3.1. Aim and method of the analysis 85
3.2. An analysis of interreligious learning 88
3.3. Social inequalities in interreligious learning: preliminary hypotheses 121
3.4. Summary and discussion 125

4. Students as agents in interreligious learning: Towards an action-theoretical model 131
4.1. The initial problem: Determinism and the relationship between agency and structure 131
4.2. A conceptualisation of agency 136

Bibliografische Informationen
http://d-nb.info/1181871670

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.3. The development of agency through socialisation and the problem of social inequality 145
4.4. Coping with school: How agency becomes action 154
4.5. Summary and discussion 163

B: Context of justification

5. Design of the study 169
5.1. The conceptual model and research questions 169
5.2. Pre-tests 173
5.3. Sample 173

6. How students cope with interreligious learning tasks 177
6.1. Theoretical background of the instrument to survey students' coping strategies 177
6.2. Method: Validation of the instrument to measure students' strategies to cope with interreligious learning tasks 182
6.3. Results: Students' strategies to cope with interreligious learning tasks 198
6.4. Summary and discussion 206

7. Students' religiosity and coping strategies 209
7.1. Theory: The influence of students' religiosity on their coping with interreligious learning tasks 209
7.2. Method 215
7.2. Results: How religiosity influences the probability of an affiliation to a type of coping action 220
7.3. Summary and discussion 229

8. The impact of cultural capital and/or religiosity on coping strategies 233
8.1. Theory: The influence cultural capital on coping with interreligious learning tasks 233
8.2. Method 238
8.3. Results: How cultural capital and religiosity influence the probability of an affiliation to a type of coping action 240
8.4. Summary and discussion 247

9. The family background's impact on habitual resources and coping 251
9.1. Theory: The influence of the family background on habitual resources and coping with interreligious learning tasks 251
9.2. Method 258
9.3. Results: How different family backgrounds cause unequal opportunities in interreligious learning 260
9.4. Summary and discussion 272

10. Habitual resources, intention, and practical evaluation: Examination of the full action-theoretical model 275
10.1. Theory: The relevance of intentions and practical evaluations to understand students' coping with interreligious learning tasks 275
10.2. Method 285
10.3. Results: The explanatory power of the action-theoretical model 289
10.4. Summary and discussion 307

C: Context of application

11. Social inequality in interreligious learning: Evidence and consequences 315
11.1. A summary of the main findings 315
11.2. Theological conclusions 322
11.3. Pedagogical recommendations 325
