Table of Contents

1. Background and introduction 1
1.1. The relevance of clean water and sanitation 1
1.2. India's National Rural Drinking Water Program and its pilot project 2
1.3. Relevance of the topic and literature context 2
1.4. Research question and approach 3
1.5. Reflections on the CBA approach 5
2. Method 10
2.1. Relevant costs and benefits 10
2.1.1. Selection of locations 10
2.1.2. Selection of unit of analysis 12
2.1.3. Selection of time period 13
2.2. Cataloging the impacts and select the indicators 13
2.2.1. The feasibility of the MUS approach for NRDWSPP 13
2.2.2. Impacts and indicators from the MUS literature 15
2.3. Monetization of impacts and indicators 20
2.3.1. Monetizing health effects 20
2.3.2. Monetizing economic effects 23
2.3.3. Monetizing environmental effects 24
2.3.4. Monetizing time-saving effects 26
2.4. Computing the value 27
2.4.1. Computing the value of health 30
2.4.2. Computing the value of economy 36
2.4.3. Computing the value of environment 39
2.4.4. Computing the value of time-savings 41
3. Study results 45
3.1. Study results as separate benefits and costs 45
3.2. Study results as BCR 46
3.3. Study results as net benefit 47
