

Preface xxv

About the Authors xxxi

Acknowledgments xxxiii

PART 1 WHAT YOU NEED TO KNOW BEFORE CHOOSING AN ACTIVITY 1

1 INTRODUCTION TO USER EXPERIENCE 2

What Is User Experience? 4

Who Does User Experience? 5

User-Centered Design 7

Principles of User-Centered Design 7

Incorporating UCD Principles into the Product Development
Life Cycle 9

Design Thinking 11

A Variety of Requirements 12

The Product Team's Perspective 12

User Requirements 15

Getting Stakeholder Buy-In for Your Activity 16

Arguments and Counterarguments 16

Preventing Resistance 19

What Is Next? 20

2

BEFORE YOU CHOOSE AN ACTIVITY: LEARNING ABOUT YOUR PRODUCT USERS 22

Introduction 24

Existing Research 24

Learn About Your Product 25

Use Your Product 26

Networking 26

Customer Support Comments 27

Social Sentiment Analysis 27

Log Files and Web Analytics 28

Your Marketing Department 31

Competitors 32

Early Adopter or Partner Feedback 35

Learn About Your Users 35

Step 1: User Profile 37

Step 2: Personas 40

Step 3: Guiding Principles/Antiprinciples 44

Step 4: Scenarios 46

Special Populations 48

International Users 48

Accessibility 50

Children 51

Older Users 52

Pulling It All Together 53

Case Study: *There Is "Cultural" Method in the Madness* 54

3

ETHICAL AND LEGAL CONSIDERATIONS 64

Introduction 66

Policies vs. Laws vs. Ethics 66

Ethical Considerations 67

Do No Harm 70

The Right to Be Informed 70

Permission to Record 71

Create a Comfortable Experience 72

Appropriate Language 72

Anonymity vs. Confidentiality 73

The Right to Withdraw 73

Appropriate Incentives 73

Valid and Reliable Data 74

Acknowledge Your True Capabilities 75

Data Retention, Documentation, and Security 75

Debrief 76

Legal Considerations 76

Pulling It All Together 78

4 SETTING UP RESEARCH FACILITIES 80

Introduction 82

Using Your Company's Existing Facilities 82

Renting a Marketing or Hotel Facility 85

Building a Permanent Facility 85

 Components of a Devoted User Research Facility 86

 Lab Layout 87

Pulling It All Together 95

Introduction 98

What It Takes to Choose a Method 98

 Get the Right People Involved 98

 Ask the Right Questions 98

 Know the Limits 99

The Methods 99

 Diary Studies 100

 Interviews 100

 Surveys 100

 Card Sort 101

 Focus Groups 101

 Field Studies 101

 Evaluation Methods 102

Differences Among the Methods 102

Behavioral vs. Attitudinal 103

Research and Participant Roles 103

Lab vs. Contextual 103

Qualitative vs. Quantitative 104

Formative vs. Summative 104

Number of Users 104

Choosing the Right Method 109

PART 2 GET UP AND RUNNING 113

Introduction 116

Creating a Proposal 116

Why Create a Proposal? 117

Sections of the Proposal 117

Sample Proposal 120

Getting Commitment 124

Deciding the Duration and Timing of Your
Session 125

Recruiting Participants 126

Determining Participant Incentives 127

Developing a Recruiting Screener 129

Sample Screener 132

Creating a Recruitment Advertisement 135

- Sample Posting 138
- Recruitment Methods 139
- Preventing No-Shows 146
- Recruiting International Participants 147
- Recruiting Special Populations 148
- Online Services 149
- Crowd Sourcing 149
- Tracking Participants 150
 - Tax Implications 151
 - The Professional Participant 151
 - Create a Watch List 151
- Creating a Protocol 153
 - Sample Protocol 153
- Piloting Your Activity 155
 - Is the Audiovisual Equipment Working? 155
 - Clarity of Instructions and Questions 155
 - Find Bugs or Glitches 155
 - Practice 155
 - Who Should Attend? 156
- Pulling It All Together 156

7

DURING YOUR USER RESEARCH ACTIVITY 158

Introduction 160

Inviting Observers 161

- Who Should NOT Observe? 162

Welcoming Your Participants 163

Welcoming Participants to a Lab Session 163

Welcoming Participants in the Field 163

Introducing the Session 163

Consenting Participants 164

Providing Incentives 164

Developing Rapport 164

Warm-Up Exercises 165

Moderating Your Activity 165

Moderation Strategies 167

Using a Think-Aloud Protocol 169

Debrief Participants 171

Recording and Notetaking 171

Take Notes 171

Use Video or Audio Recording 174

Use Screen-Recording Software 175

Combine Video/Audio/Screen Recording and Notetaking 176

Dealing with Late and Absent Participants 176

The Late Participant 176

You Cannot Wait Any Longer 177

Including a Late Participant 178

The No-Show 179

Dealing with Awkward Situations 179

Participant Issues 181

Product Team/Observer Issues 187

Concluding Your Activity 189

Pulling It All Together 189

PART 3 THE METHODS 191

8

DIARY STUDIES 192

Introduction 194

Things to Be Aware of When Conducting Diary Studies 194

Diary Study Formats to Choose from 195

Paper 195

E-mail 196

Voice 197

Video Diary Study 197

SMS (Text Message) 198

Social Media 199

Online Diary Study Services or Mobile Apps 199

Sampling Frequency 200

End of Day 200

Incident Diaries 200

Set Intervals 201

Random or Experiential Sampling 202

Preparing to Conduct a Diary Study 202

Identify the Type of Study to Conduct 202

Recruiting Participants 203

Diary Materials 203

Length and Frequency 203

Incentives 204

Conducting a Diary Study 204

Train the Participants 204

Monitor Data Collection 205

Data Analysis and Interpretation 205

Data Cleaning 205

Affinity Diagram 206

Qualitative Analysis Tools 206

Crowd Sourcing 207

Quantitative Analysis 207

Communicating the Findings 208

Pulling It All Together 210

Case Study: *Exploring People's Daily Information Needs* 210

9

INTERVIEWS 218

Introduction 220

Preparing to Conduct an Interview 220

Identify the Objectives of the Study 221

Select the Type of Interview 222

Decide Now How You Will Analyze the Data 225

Identify the Questions 225

Test Your Questions 233

Players in Your Activity 234

Inviting Observers 235

Activity Materials 236

Conducting an Interview 236

Things to Be Aware of When Conducting Interviews 237

The Five Phases of an Interview 238

Your Role as the Interviewer 240

Monitoring the Relationship with the Interviewee 249

Dos and Don'ts 251

Data Analysis and Interpretation 252

Transcription 252

Structured Data 253

Unstructured Data 253

Categorizing and Counting 253

Affinity Diagram 253

Qualitative Content/Thematic Analysis 253

Communicating the Findings 256

Over Time 256

By Topic 256

By Participant 257

Pulling It All Together 257

Interview Tips 257

Case Study: *Connecting Families: Importance of Including Children as Stakeholders* 258

10 SURVEYS 264

Introduction 266

When Should You Use a Survey? 266

Things to Be Aware of When Using a Survey 267

Selection Bias 267

Nonresponse Bias 268

Satisficing 268

Acquiescence Bias 269

Creating and Distributing Your Survey	269
Identify the Objectives of Your Study	270
Players in Your Activity	270
Number of Respondents	270
Probability Versus Nonprobability Sampling	271
Compose Your Questions	272
Determine Now How You Will Analyze Your Data	280
Building the Survey	280
Considerations When Choosing a Survey Distribution Method	283
Pilot Test Your Survey and Iterate	289
Data Analysis and Interpretation	290
Initial Assessment	290
Types of Calculation	291
Communicating the Findings	295
Pulling It All Together	296
Case Study: <i>Google Drive's Happiness Tracking Survey (HaTS)</i>	296

11

CARD SORTING 302

Introduction 304

Things to Be Aware of When Conducting a Card Sort 304

 Open vs. Closed Sort 305

 Physical Cards or Computerized Sort? 305

Remote (Online) or In-Person Sort?	305
Individual or Simultaneous Card Sort?	306
Preparing to Conduct a Card Sort	307
Identify or Create Objects and Definitions for Sorting	307
Activity Materials	309
Primary Data Collected in a Card Sort	310
Additional Data That May Be Collected in an Open Card Sort	310
Players in Your Activity	311
Inviting Observers	313
Conducting a Card Sort	313
Activity Timeline	313
In-Person Card Sort Using Physical Cards	314
Computerized Card Sort	317
Data Analysis and Interpretation	318
Simple Summary	318
Similarity Matrix	320
Cluster Analysis	321
Analysis with a Statistics Package	324
Analysis with a Spreadsheet Package	325
Data That Computer Programs Cannot Handle	325
Interpreting the Results	326
Communicating the Findings	327
Pulling It All Together	328
Case Study: <i>Card Sorting with Colleagues: How We Adapted Best Practices to Fit Our Needs</i>	328
Appendix	337

12

FOCUS GROUPS 338

Introduction 340

Preparing to Conduct a Focus Group 340

 Create a Topic/Discussion Guide 341

 Players in Your Activity 346

 Inviting Observers 350

 Activity Materials 350

Conducting a Focus Group 351

 Activity Timeline 351

 Welcome the Participants 352

 Introduce the Activity and Discussion Rules 352

 The Focus Group Discussion 352

Modifications 353

 Including Individual Activities 353

 Task-Based Focus Groups 354

 Day-in-the-Life 355

 Iterative Focus Groups 355

 The Focus Troupe 356

 Online or Phone-Based Focus Groups 356

 Brainstorming/Wants and Needs Analysis 357

 Introduce the Activity and Brainstorming Rules 358

 Prioritization 359

Data Analysis and Interpretation 363

 Debrief 363

 Types of Focus Group Data 363

 Affinity Diagram 363

Communicating the Findings 368

Lessons Learned 368

Mixing User Types 369

Removing the Difficult Participant 370

Pulling It All Together 371

Case Study: *Design Concepts Focus Groups* 371

13

FIELD STUDIES 378

Introduction 380

Things to Be Aware of When Conducting Field Research 381

Gaining Stakeholder Support 381

Other Things to Keep in Mind 381

Field Study Methods 382

Observation Only 387

Interacting with the User 392

Method Supplements 397

Preparing for a Field Study 400

Identify the Type of Study to Conduct 400

Players in Your Activity 400

Train the Players 404

Develop Your Protocol 405

Schedule the Visits 405

Activity Materials 407

Summary 411

Conducting a Field Study 411

Get Organized 412

Meet the Participant	412
Begin Data Collection	413
Wrap-Up	414
Organize Your Data	414
Summary	415
Data Analysis and Interpretation	415
Select Your Analysis Method	417
Affinity Diagram	417
Analyzing Deep Hanging Out Data	417
Analyzing Contextual Inquiry/Design Data	418
Grounded Theory	418
Qualitative Analysis Tools	418
Communicating the Findings	418
Lessons Learned	420
Surprise Guests	420
Missing Users	421
Pulling It All Together	421
Case Study: <i>Into the Wild: Uncovering Holistic Mobile Insights</i>	422

14 EVALUATION METHODS 430

Introduction	432
Things to Be Aware of When Conducting Evaluations	433
Evaluation Methods to Choose from	433
Usability Inspection Methods	433

Usability Testing 436

Live Experiments 441

Data Analysis and Interpretation 442

Communicating the Findings 443

Pulling It All Together 443

Case Study: *Applying Cognitive Walkthroughs in Medical Device User Interface Design* 443

PART 4 WRAPPING UP 447

Introduction 450

Prioritization of Findings 450

First Prioritization: Usability Perspective 451

Second Prioritization: Merging Usability and Product Development Priorities 453

Presenting Your Findings 455

Why the Verbal Presentation Is Essential 456

Presentation Attendees 457

Creating a Successful Presentation 457

Delivering a Successful Presentation 461

Reporting Your Findings 463

Report Format 464

The Complete Report 464

The Recommendations Report 468

The Executive Summary Report 468

Report Supplements 469

Ensuring the Incorporation of Your Findings 469

Stakeholder Involvement 469

Be a Virtual Member of the Team 470

Obtain a Status for Each Recommendation 470

Ensure the Product Team Documents Your Findings 471

Track Outcomes 471

Pulling It All Together 472

PART 5 APPENDICES 473

A Requirements for Creating a Participant Recruitment Database 474

B Report Template 482

C Glossary 492

D References 510

Index 521
