

Contents

Prerequisites	1
P.1 Sets and Mappings	1
P.2 Topological Spaces and Groups	2
P.3 Topological Vector Spaces	5
P.4 Riesz Spaces	8
P.5 Measures	10
P.6 Prerequisites for Part III.....	15

Part I Uniform Spaces

1 Uniformities and Topologies	19
1.1 Uniform Structures and Mappings	19
1.2 Cardinal Reflections, Compactness and Completeness.....	22
1.3 Metric Spaces and Real Functions.....	24
1.4 Uniformizable Topological Spaces	27
1.5 Notes for Chap. 1	28
2 Induced Uniform Structures	29
2.1 General Properties.....	29
2.2 Uniform Subspaces.....	33
2.3 Uniform Structures on Products	36
2.4 Notes for Chap. 2	39
3 Uniform Structures on Semigroups.....	41
3.1 Semitopological Semigroups	41
3.2 Topological Groups	43
3.3 Semiuniform Semigroups	44
3.4 Ambitable Groups	46
3.5 Notes for Chap. 3.....	50

4 Some Notable Classes of Uniform Spaces	53
4.1 Inversion-Closed and Alexandroff Spaces	53
4.2 Supercomplete Spaces	57
4.3 Partitions of Unity	59
4.4 Notes for Chap. 4	60
 Part II Uniform Measures	
5 Measures on Complete Metric Spaces	63
5.1 Tight Measures on Uniform Spaces	63
5.2 Point Masses and Molecular Measures	65
5.3 Two Weak Topologies	66
5.4 Tight Measures on Complete Metric Spaces	68
5.5 Topologies on the Positive Cone and on Spheres	73
5.6 Compact Sets and Sequences of Measures	75
5.7 Notes for Chap. 5	78
6 Uniform Measures	81
6.1 Space of Uniform Measures	82
6.2 Image Under a Uniformly Continuous Mapping	84
6.3 Topologies on the Space of Uniform Measures	86
6.4 Uniform Measures on Induced Spaces	88
6.5 Completion and Compactification	93
6.6 Vector-Valued Integrals	95
6.7 Vector-Valued Uniform Measures	96
6.8 Notes for Chap. 6	97
7 Uniform Measures as Measures	99
7.1 Functionals Represented by Measures	99
7.2 Measures on the Compactification	102
7.3 Conditions for Uniform Measures to be Measures	105
7.4 Condition for Measures to be Uniform Measures	108
7.5 Measure-Fine Uniform Spaces	109
7.6 Notes for Chap. 7	114
8 Instances of Uniform Measures	117
8.1 Sequentially Uniform Measures	117
8.2 Measures on Abstract σ -Algebras	119
8.3 Baire Measures on Completely Regular Spaces	121
8.4 Separable Measures	123
8.5 Tight Measures on Locally Compact Groups	125
8.6 Cylindrical Measures	126
8.7 Notes for Chap. 8	126
9 Direct Product and Convolution	129
9.1 Direct Product	129
9.2 Convolution for Semimetric Semigroups	135

9.3	Topological Centres in Convolution Semigroups	138
9.4	Case of Topological Groups	141
9.5	Notes for Chap. 9	145
Part III Topics from Farther Afield		
10	Free Uniform Measures	151
10.1	Basic Properties	151
10.2	Universal Property	159
10.3	Measures with Compact Support	161
10.4	Instances of Free Uniform Measures	164
10.5	Measures on Abstract σ -Algebras	164
10.6	Riesz Measures on Completely Regular Spaces	165
10.7	Cylindrical Measures of Type 1	167
10.8	Notes for Chap. 10	168
11	Approximation of Probability Distributions	171
11.1	The Kantorovich–Rubinshtein Theorem	171
11.2	Asymptotic Approximation of Probability Distributions	174
11.3	Notes for Chap. 11	177
12	Measurable Functionals	179
12.1	Saturated Spaces	179
12.2	Functionals of Baire Class 1	181
12.3	Generalized Centres in Convolution Semigroups	183
12.4	Notes for Chap. 12	184
