

Contents

Preface	xxi
Chapter 1: Introduction	1
1.1 Problems with Assuming Normality	2
1.2 Transformations	6
1.3 The Influence Curve	7
1.4 The Central Limit Theorem	8
1.5 Is the ANOVA F Robust?	9
1.6 Regression	11
1.7 More Remarks	11
1.8 R Software	12
1.9 Some Data Management Issues	15
1.9.1 Eliminating Missing Values	23
1.10 Data Sets	23
Chapter 2: A Foundation for Robust Methods	25
2.1 Basic Tools for Judging Robustness	25
2.1.1 Qualitative Robustness	26
2.1.2 Infinitesimal Robustness	29
2.1.3 Quantitative Robustness	30
2.2 Some Measures of Location and Their Influence Function	31
2.2.1 Quantiles	31
2.2.2 The Winsorized Mean	32
2.2.3 The Trimmed Mean	34
2.2.4 M-Measures of Location	34
2.2.5 R-Measures of Location	37
2.3 Measures of Scale	38
2.4 Scale Equivariant M-Measures of Location	40
2.5 Winsorized Expected Values	41

Chapter 3: Estimating Measures of Location and Scale	45
3.1 A Bootstrap Estimate of a Standard Error	45
3.1.1 R Function bootse	47
3.2 Density Estimators	48
3.2.1 Silverman's Rule of Thumb	49
3.2.2 Rosenblatt's Shifted Histogram	49
3.2.3 The Expected Frequency Curve	50
3.2.4 An Adaptive Kernel Estimator	51
3.2.5 R Functions skerd, kerSORT, kerdn, kdplot, rdplot, akerd and splot	52
3.3 The Sample Trimmed Mean	57
3.3.1 R Functions mean, tmean and lloc	59
3.3.2 Estimating the Standard Error of the Trimmed Mean	60
3.3.3 Estimating the Standard Error of the Sample Winsorized Mean	64
3.3.4 R Functions winmean, winvar, trimse and winse	65
3.3.5 Estimating the Standard Error of the Sample Median	65
3.3.6 R Function msmedse	66
3.4 The Finite Sample Breakdown Point	66
3.5 Estimating Quantiles	67
3.5.1 Estimating the Standard Error of the Sample Quantile	68
3.5.2 R Function qse	69
3.5.3 The Maritz–Jarrett Estimate of the Standard Error of \hat{x}_q	70
3.5.4 R Function mjse	71
3.5.5 The Harrell–Davis Estimator	71
3.5.6 R Functions qest and hd	72
3.5.7 A Bootstrap Estimate of the Standard Error of $\hat{\theta}_q$	73
3.5.8 R Function hdseb	73
3.6 An M-Estimator of Location	73
3.6.1 R Function mad	78
3.6.2 Computing an M-Estimator of Location	79
3.6.3 R Functions mest	80
3.6.4 Estimating the Standard Error of the M-Estimator	81
3.6.5 R Function mestse	83
3.6.6 A Bootstrap Estimate of the Standard Error of $\hat{\mu}_m$	84
3.6.7 R Function mestseb	84
3.7 One-Step M-Estimator	85
3.7.1 R Function onestep	86
3.8 W-Estimators	86
3.8.1 Tau Measure of Location	87
3.8.2 R Function tauloc	88
3.8.3 Zuo's Weighted Estimator	88

3.9	The Hodges–Lehmann Estimator	89
3.10	Skipped Estimators.....	89
3.10.1	R Functions mom and bmean	90
3.11	Some Comparisons of the Location Estimators	90
3.12	More Measures of Scale	93
3.12.1	The Biweight Midvariance	94
3.12.2	R Function bivar	96
3.12.3	The Percentage Bend Midvariance and Tau Measure of Variation ...	96
3.12.4	R Functions pbvar, tauvar	98
3.12.5	The Interquartile Range	99
3.12.6	R Functions idealf and idrange	99
3.13	Some Outlier Detection Methods	100
3.13.1	Rules Based on Means and Variances	100
3.13.2	A Method Based on the Interquartile Range	101
3.13.3	Carling’s Modification	101
3.13.4	A MAD-Median Rule	101
3.13.5	R Functions outbox, out and boxplot	102
3.13.6	R Functions adjboxout and adjbox	104
3.14	Exercises.....	105
 Chapter 4: Confidence Intervals in the One-Sample Case		 107
4.1	Problems when Working with Means	107
4.2	The g-and-h Distribution.....	111
4.2.1	R Functions ghdist, rmul, rng and ghtrim	114
4.3	Inferences About the Trimmed and Winsorized Means	115
4.3.1	R Functions trimci, winci and D.akp.effect	120
4.4	Basic Bootstrap Methods	120
4.4.1	The Percentile Bootstrap Method	121
4.4.2	R Functions onesampb and hdpb	122
4.4.3	Bootstrap-t Method	123
4.4.4	Bootstrap Methods when Using a Trimmed Mean.....	125
4.4.5	Singh’s Modification	129
4.4.6	R Functions trimpb and trimcibt	130
4.5	Inferences About M-Estimators	130
4.5.1	R Functions mestci and momci	132
4.6	Confidence Intervals for Quantiles	133
4.6.1	Beware of Tied Values when Making Inferences About Quantiles ..	136
4.6.2	A Modification of the Distribution-Free Method for the Median	137
4.6.3	R Functions qmjci, hdc, sint, sintv2, qci, qcipb and qint	138
4.7	Empirical Likelihood	140

4.7.1	Bartlett Corrected Empirical Likelihood	140
4.8	Concluding Remarks	142
4.9	Exercises	143
Chapter 5: Comparing Two Groups		145
5.1	The Shift Function	146
5.1.1	The Kolmogorov–Smirnov Test	149
5.1.2	R Functions ks, kssig, kswwsig, and kstiesig	152
5.1.3	The B and W Band for the Shift Function	153
5.1.4	R Functions sband and wband	155
5.1.5	Confidence Band for Specified Quantiles	158
5.1.6	R Functions shiftd, qcomhd, qcomhdMC and q2gci	160
5.1.7	R Functions g2plot and g5plot	161
5.2	Student’s t Test	162
5.3	Comparing Medians and Other Trimmed Means	166
5.3.1	R Functions yuen and msmed	169
5.3.2	A Bootstrap-t Method for Comparing Trimmed Means	170
5.3.3	R Functions yuenbt and yhbt	173
5.3.4	Measuring Effect Size	176
5.3.5	R Functions akp.effect, yuenv2, ees.ci, med.effect and qhat	180
5.4	Inferences Based on a Percentile Bootstrap Method	182
5.4.1	Comparing M-Estimators	183
5.4.2	Comparing Trimmed Means and Medians	184
5.4.3	R Functions trimpb2, pb2gen, m2ci, medpb2 and M2gbt	185
5.5	Comparing Measures of Scale	187
5.5.1	Comparing Variances	187
5.5.2	R Function comvar2	188
5.5.3	Comparing Biweight Midvariances	188
5.5.4	R Function b2ci	189
5.6	Permutation Tests	189
5.6.1	R Function permg	190
5.7	Rank-Based Methods and a Probabilistic Measure of Effect Size	190
5.7.1	The Cliff and Brunner–Munzel Methods	192
5.7.2	R Functions cid, cidv2, bmp, wmwloc, wmwpb and loc2plot	195
5.8	Comparing Two Independent Binomial and Multinomial Distributions	198
5.8.1	Storer–Kim Method	200
5.8.2	Beal’s Method	200
5.8.3	KMS Method	201
5.8.4	R Functions twobinom, twobici, bi2KMS, bi2KMSv2 and bi2CR ..	201
5.8.5	Comparing Discrete (Multinomial) Distributions	202

5.8.6	R Functions binband, splotg2, cumrelf	203
5.9	Comparing Dependent Groups	205
5.9.1	A Shift Function for Dependent Groups.....	206
5.9.2	R Function lband	207
5.9.3	Comparing Specified Quantiles	207
5.9.4	R Functions shiftdhd, Dqcomhd, qdec2, Dqdif and difQpci	210
5.9.5	Comparing Trimmed Means	212
5.9.6	R Functions yuend, yuendv2 and D.akp.effect.....	215
5.9.7	A Bootstrap-t Method for Marginal Trimmed Means	217
5.9.8	R Function ydbt.....	217
5.9.9	Inferences About the Distribution of Difference Scores.....	217
5.9.10	R Functions loc2dif and l2drnci.....	219
5.9.11	Percentile Bootstrap: Comparing Medians, M-Estimators and Other Measures of Location and Scale	220
5.9.12	R Function bootdpci	221
5.9.13	Handling Missing Values.....	222
5.9.14	R Functions rm2miss and rmmismcp.....	226
5.9.15	Comparing Variances.....	227
5.9.16	R Function comdvar	228
5.9.17	The Sign Test and Inferences About the Binomial Distribution.....	228
5.9.18	R Functions binomci, acbinomci and binomLCO	231
5.10	Exercises.....	232
Chapter 6: Some Multivariate Methods.....		235
6.1	Generalized Variance	235
6.2	Depth	236
6.2.1	Mahalanobis Depth.....	236
6.2.2	Halfspace Depth	236
6.2.3	Computing Halfspace Depth	239
6.2.4	R Functions depth2, depth, fdepth, fdepthv2, unidepth.....	241
6.2.5	Projection Depth.....	242
6.2.6	R Functions pdis, pdisMC, and pdepth	243
6.2.7	Other Measures of Depth.....	244
6.2.8	R Functions zdist, zoudepth and prodepth	245
6.3	Some Affine Equivariant Estimators	245
6.3.1	Minimum Volume Ellipsoid Estimator	247
6.3.2	The Minimum Covariance Determinant Estimator	247
6.3.3	S-Estimators and Constrained M-Estimators.....	248
6.3.4	R Function tbs	249
6.3.5	Donoho–Gasko Generalization of a Trimmed Mean	249

6.3.6	R Functions <code>dmean</code> and <code>dcov</code>	250
6.3.7	The Stahel–Donoho W-Estimator	252
6.3.8	R Function <code>sdwe</code>	253
6.3.9	Median Ball Algorithm.....	253
6.3.10	R Function <code>rmba</code>	253
6.3.11	OGK Estimator	254
6.3.12	R Function <code>ogk</code>	255
6.3.13	An M-Estimator	255
6.3.14	R Functions <code>MARest</code> and <code>dmedian</code>	256
6.4	Multivariate Outlier Detection Methods	257
6.4.1	A <code>Relplot</code>	258
6.4.2	R Function <code>relplot</code>	260
6.4.3	The MVE Method	260
6.4.4	The MCD Method	261
6.4.5	R Functions <code>covmve</code> and <code>covmcd</code>	261
6.4.6	R Function <code>out</code>	262
6.4.7	The MG _V Method.....	263
6.4.8	R Function <code>outmgv</code>	265
6.4.9	A Projection Method	266
6.4.10	R Functions <code>outpro</code> and <code>out3d</code>	268
6.4.11	Outlier Identification in High Dimensions	269
6.4.12	R Functions <code>outproad</code> and <code>outmgvad</code>	270
6.4.13	Methods Designed for Functional Data	270
6.4.14	R Functions <code>FBplot</code> , <code>Flplot</code> , <code>medcurve</code> , <code>func.out</code> , <code>spag.plot</code> , <code>funloc</code> and <code>funlocpb</code>	272
6.4.15	Comments on Choosing a Method.....	275
6.5	A Skipped Estimator of Location and Scatter	277
6.5.1	R Functions <code>smean</code> , <code>wmcd</code> , <code>wmve</code> , <code>mgvmean</code> , <code>L1medcen</code> , <code>spat</code> , <code>mgvcov</code> , <code>skip</code> , <code>skipcov</code>	278
6.6	Robust Generalized Variance	280
6.6.1	R Function <code>gvarg</code>	280
6.7	Multivariate Location: Inference in the One-Sample Case	281
6.7.1	Inferences Based on the OP Measure of Location	281
6.7.2	Extension of Hotelling’s T^2 to Trimmed Means.....	282
6.7.3	R Functions <code>smeancrv2</code> and <code>hotell.tr</code>	283
6.7.4	Inferences Based on the MG _V Estimator	284
6.7.5	R Function <code>smgvcr</code>	285
6.8	Comparing OP Measures of Location	285
6.8.1	R Functions <code>smean2</code> , <code>matsplit</code> and <code>mat2grp</code>	286
6.8.2	Comparing Robust Generalized Variances	287

	6.8.3 R Function <code>gvar2g</code>	287
6.9	Multivariate Density Estimators	288
6.10	A Two-Sample, Projection-Type Extension of the Wilcoxon–Mann–Whitney Test	289
	6.10.1 R Functions <code>mulwmw</code> and <code>mulwmwv2</code>	291
6.11	A Relative Depth Analog of the Wilcoxon–Mann–Whitney Test	292
	6.11.1 R Function <code>mwmw</code>	294
6.12	Comparisons Based on Depth	296
	6.12.1 R Functions <code>lsqs3</code> and <code>depthg2</code>	298
6.13	Comparing Dependent Groups Based on All Pairwise Differences	300
	6.13.1 R Function <code>dfried</code>	302
6.14	Robust Principal Components Analysis.....	302
	6.14.1 R Functions <code>prcomp</code> and <code>regpca</code>	304
	6.14.2 Maronna’s Method	305
	6.14.3 The SPCA Method	305
	6.14.4 Method HRVB	306
	6.14.5 Method OP	306
	6.14.6 Method PPCA	307
	6.14.7 R Functions <code>outpca</code> , <code>robpca</code> , <code>robpcaS</code> , <code>SPCA</code> , <code>Ppca</code> , <code>Ppca.summary</code> .	308
	6.14.8 Comments on Choosing the Number of Components	309
6.15	Cluster Analysis	313
	6.15.1 R Functions <code>Kmeans</code> , <code>kmeans.grp</code> , <code>TKmeans</code> , <code>TKmeans.grp</code>	314
6.16	Multivariate Discriminate Analysis	315
	6.16.1 R Function <code>KNNdist</code>	316
6.17	Exercises.....	317
 Chapter 7: One-Way and Higher Designs for Independent Groups		319
7.1	Trimmed Means and a One-Way Design.....	320
	7.1.1 A Welch-Type Procedure and a Robust Measure of Effect Size	321
	7.1.2 R Functions <code>t1way</code> , <code>t1wayv2</code> , <code>esmc</code> , <code>fac2list</code> , <code>t1wayF</code>	323
	7.1.3 A Generalization of Box’s Method	327
	7.1.4 R Function <code>box1way</code>	328
	7.1.5 Comparing Medians and Other Quantiles	328
	7.1.6 R Functions <code>med1way</code> and <code>Qanova</code>	330
	7.1.7 A Bootstrap-t Method	330
	7.1.8 R Functions <code>t1waybt</code> and <code>btrim</code>	331
7.2	Two-Way Designs and Trimmed Means	333
	7.2.1 R Function <code>t2way</code>	337
	7.2.2 Comparing Medians	339
	7.2.3 R Functions <code>med2way</code> and <code>Q2anova</code>	341

7.3	Three-Way Designs and Trimmed Means Including Medians	341
7.3.1	R Functions t3way, fac2list and Q3anova	343
7.4	Multiple Comparisons Based on Medians and Other Trimmed Means.....	346
7.4.1	Basic Methods Based on Trimmed Means	347
7.4.2	R Functions lincon, conCON and stepmcp	349
7.4.3	Multiple Comparisons for Two-Way and Three-Way Designs	354
7.4.4	R Functions bbmcp, mcp2med, bbbmcp, mcp3med, con2way and con3way	355
7.4.5	A Bootstrap-t Procedure.....	357
7.4.6	R Functions linconb, bbtrim and bbbtrim	359
7.4.7	Controlling the Familywise Error Rate: Improvements on the Bonferroni Method	361
7.4.8	R Functions p.adjust and mcpKadjp	364
7.4.9	Percentile Bootstrap Methods for Comparing Medians, Other Trimmed Means and Quantiles	365
7.4.10	R Functions linconpb, bbmcppb, bbbmcppb, medpb, Qmcp, med2mcp, med3mcp and q2by2	365
7.4.11	Judging Sample Sizes	368
7.4.12	R Function hochberg	369
7.4.13	Explanatory Measure of Effect Size	370
7.4.14	R Functions ESmainMCP and esImcp	370
7.4.15	Comparing Curves (Functional Data)	371
7.4.16	R Functions funyuenpb and Flplot2g	372
7.5	A Random Effects Model for Trimmed Means	372
7.5.1	A Winsorized Intraclass Correlation.....	373
7.5.2	R Function rananova	376
7.6	Global Tests Based on M-Measures of Location	376
7.6.1	R Functions blway and pbadept.....	380
7.6.2	M-Estimators and Multiple Comparisons	381
7.6.3	R Functions linconm and pbmcp	384
7.6.4	M-Estimators and the Random Effects Model	385
7.6.5	Other Methods for One-Way Designs	385
7.7	M-Measures of Location and a Two-Way Design	385
7.7.1	R Functions pbad2way and mcp2a	388
7.8	Ranked-Based Methods for a One-Way Design	389
7.8.1	The Rust-Fligner Method	389
7.8.2	R Function rfanova	391
7.8.3	A Heteroscedastic Rank-Based Method That Allows Tied Values...	391
7.8.4	R Function bdm.....	391
7.8.5	Inferences About a Probabilistic Measure of Effect Size	393

	7.8.6 R Functions cidmulv2, wmwaov and cidM	395
7.9	A Rank-Based Method for a Two-Way Design	396
	7.9.1 R Function bdm2way	397
	7.9.2 The Patel–Hoel Approach to Interactions	398
	7.9.3 R Function rimul	400
7.10	MANOVA Based on Trimmed Means	400
	7.10.1 R Functions MULtr.anova, MULAOPv, bw2list and YYmanova ...	403
	7.10.2 Linear Contrasts	405
	7.10.3 R Functions linconMpb, linconSpb, YYmcp, fac2Mlist and fac2BBMlist	407
7.11	Nested Designs	409
	7.11.1 R Functions anova.nestA, mcp.nestA and anova.nestAP	412
7.12	Exercises	413
 Chapter 8: Comparing Multiple Dependent Groups		417
8.1	Comparing Trimmed Means	417
	8.1.1 Omnibus Test Based on the Trimmed Means of the Marginal Distributions	418
	8.1.2 R Function rmanova	418
	8.1.3 Pairwise Comparisons and Linear Contrasts Based on Trimmed Means	420
	8.1.4 Linear Contrasts Based on the Marginal Random Variables	423
	8.1.5 R Functions rmmcp, rmmismcp and trimcimul	424
	8.1.6 Judging the Sample Size	424
	8.1.7 R Functions stein1.tr and stein2.tr	426
8.2	Bootstrap Methods Based on Marginal Distributions	426
	8.2.1 Comparing Trimmed Means	427
	8.2.2 R Function rmanovab	427
	8.2.3 Multiple Comparisons Based on Trimmed Means	428
	8.2.4 R Functions pairdepb and bptd	429
	8.2.5 Percentile Bootstrap Methods	431
	8.2.6 R Functions bd1way, ddep and ddepGMC_C	434
	8.2.7 Multiple Comparisons Using M-Estimators or Skipped Estimators .	436
	8.2.8 R Functions lindm and mcpOV	437
8.3	Bootstrap Methods Based on Difference Scores	439
	8.3.1 R Function rmdzero	440
	8.3.2 Multiple Comparisons	442
	8.3.3 R Functions rmmcppb, wmcppb, dmedpb, lindepbt and qdmcpdif ..	443
8.4	Comments on Which Method to Use	445
8.5	Some Rank-Based Methods	447

8.5.1	R Functions <code>apanova</code> and <code>bprm</code>	449
8.6	Between-by-Within and Within-by-Within Designs.....	449
8.6.1	Analyzing a Between-by-Within Design Based on Trimmed Means	449
8.6.2	R Functions <code>bwtrim</code> and <code>tsplit</code>	451
8.6.3	Data Management: R Function <code>bw2list</code>	454
8.6.4	Bootstrap-t Method for a Between-by-Within Design	455
8.6.5	R Functions <code>bwtrimbt</code> and <code>tsplitbt</code>	456
8.6.6	Percentile Bootstrap Methods for a Between-by-Within Design.....	456
8.6.7	R Functions <code>sppba</code> , <code>sppbb</code> and <code>sppbi</code>	458
8.6.8	Multiple Comparisons	459
8.6.9	R Functions <code>bwmcp</code> , <code>bwamcp</code> , <code>bwbmcp</code> , <code>bwimcp</code> , <code>bwimcpES</code> , <code>spmcpa</code> , <code>spmcpb</code> and <code>spmcp</code>	463
8.6.10	Within-by-Within Designs	465
8.6.11	R Functions <code>wwtrim</code> , <code>wwtrimbt</code> , <code>wwmcp</code> , <code>wwmcppb</code> and <code>wwmcpbt</code>	466
8.6.12	A Rank-Based Approach	467
8.6.13	R Function <code>bwrnk</code>	470
8.6.14	Rank-Based Multiple Comparisons.....	472
8.6.15	R Function <code>bwrncp</code>	472
8.6.16	Multiple Comparisons when Using a Patel–Hoel Approach to Interactions.....	473
8.6.17	R Function <code>sisplit</code>	474
8.7	Some Rank-Based Multivariate Methods	474
8.7.1	The Munzel–Brunner Method	475
8.7.2	R Function <code>mulrank</code>	476
8.7.3	The Choi–Marden Multivariate Rank Test	477
8.7.4	R Function <code>cmanova</code>	479
8.8	Three-Way Designs	479
8.8.1	Global Tests Based on Trimmed Means	480
8.8.2	R Functions <code>bbwtrim</code> , <code>bwtrim</code> , <code>wwwtrim</code> , <code>bbwtrimbt</code> , <code>bwtrimbt</code> and <code>wwwtrimbt</code>	481
8.8.3	Data Management: R Functions <code>bw2list</code> and <code>bbw2list</code>	481
8.8.4	Multiple Comparisons	482
8.8.5	R Function <code>wwwmcp</code>	483
8.8.6	R Functions <code>bbwmcp</code> , <code>bwwmcp</code> , <code>bbwmcppb</code> , <code>bwwmcppb</code> and <code>wwwmcppb</code>	483
8.9	Exercises.....	484
Chapter 9: Correlation and Tests of Independence		485
9.1	Problems with Pearson’s Correlation	485
9.1.1	Features of Data That Affect r and T	488

	9.1.2 Heteroscedasticity and the Classic Test that $\rho = 0$	489
9.2	Two Types of Robust Correlations	490
9.3	Some Type M Measures of Correlation	490
	9.3.1 The Percentage Bend Correlation.....	490
	9.3.2 A Test of Independence Based on ρ_{pb}	491
	9.3.3 R Function pbcor	493
	9.3.4 A Test of Zero Correlation Among p Random Variables	493
	9.3.5 R Function pball	495
	9.3.6 The Winsorized Correlation.....	496
	9.3.7 R Functions wincor and winall	497
	9.3.8 The Biweight Midcovariance and Correlation	498
	9.3.9 R Functions bicov and bicovm.....	499
	9.3.10 Kendall's tau	500
	9.3.11 Spearman's rho	501
	9.3.12 R Functions tau, spear, cor and taureg.....	502
	9.3.13 Heteroscedastic Tests of Zero Correlation	503
	9.3.14 R Functions corb, pcorb and pcorhc4.....	504
9.4	Some Type O Correlations.....	504
	9.4.1 MVE and MCD Correlations	505
	9.4.2 Skipped Measures of Correlation	505
	9.4.3 The OP Correlation.....	505
	9.4.4 Inferences Based on Multiple Skipped Correlations.....	506
	9.4.5 R Functions scor, mscor and scori	508
9.5	A Test of Independence Sensitive to Curvature.....	509
	9.5.1 R Functions indt, indtall and medind	512
9.6	Comparing Correlations: Independent Case	513
	9.6.1 Comparing Pearson Correlations	513
	9.6.2 Comparing Robust Correlations	514
	9.6.3 R Functions twopcor, twohc4cor and twocor	514
9.7	Exercises.....	515
Chapter 10: Robust Regression		517
10.1	Problems with Ordinary Least Squares	518
	10.1.1 Computing Confidence Intervals Under Heteroscedasticity.....	521
	10.1.2 An Omnibus Test	526
	10.1.3 R Functions lsfitci, olshc4, hc4test and hc4wtest	527
	10.1.4 Comments on Comparing Means via Dummy Coding	529
	10.1.5 Salvaging the Homoscedasticity Assumption	529
10.2	Theil–Sen Estimator	530
	10.2.1 R Functions tsreg, tshdreg, correg, regplot and regp2plot	533

10.3	Least Median of Squares.....	535
10.3.1	R Function <code>lmsreg</code>	535
10.4	Least Trimmed Squares Estimator	535
10.4.1	R Functions <code>ltsreg</code> and <code>ltsgreg</code>	536
10.5	Least Trimmed Absolute Value Estimator	536
10.5.1	R Function <code>ltareg</code>	537
10.6	M-Estimators	537
10.7	The Hat Matrix	538
10.8	Generalized M-Estimators	541
10.8.1	R Function <code>bmreg</code>	545
10.9	The Coakley–Hettmansperger and Yohai Estimators.....	545
10.9.1	MM-Estimator	547
10.9.2	R Functions <code>chreg</code> and <code>MMreg</code>	548
10.10	Skipped Estimators.....	549
10.10.1	R Functions <code>mgvreg</code> and <code>opreg</code>	549
10.11	Deepest Regression Line.....	550
10.11.1	R Functions <code>rdepth</code> and <code>mdepreg</code>	551
10.12	A Criticism of Methods with a High Breakdown Point	551
10.13	Some Additional Estimators	551
10.13.1	S-Estimators and τ -Estimators.....	552
10.13.2	R Functions <code>snmreg</code> and <code>stsreg</code>	553
10.13.3	E-Type Skipped Estimators	553
10.13.4	R Functions <code>mbmreg</code> , <code>tstsreg</code> , <code>tssnmreg</code> and <code>gyreg</code>	555
10.13.5	Methods Based on Robust Covariances	556
10.13.6	R Functions <code>bireg</code> , <code>winreg</code> and <code>COVreg</code>	558
10.13.7	L-Estimators	559
10.13.8	L_1 and Quantile Regression.....	559
10.13.9	R Functions <code>qreg</code> , <code>rqfit</code> , <code>qplotreg</code>	560
10.13.10	Methods Based on Estimates of the Optimal Weights	561
10.13.11	Projection Estimators.....	562
10.13.12	Methods Based on Ranks	562
10.13.13	R Functions <code>Rfit</code> and <code>Rfit.est</code>	564
10.13.14	Empirical Likelihood Type and Distance-Constrained Maximum Likelihood Estimators	565
10.14	Comments About Various Estimators	565
10.14.1	Contamination Bias.....	567
10.15	Outlier Detection Based on a Robust Fit.....	571
10.15.1	Detecting Regression Outliers	571
10.15.2	R Functions <code>reglev</code> and <code>rmblo</code>	571
10.16	Logistic Regression and the General Linear Model	573

10.16.1	R Functions glm, logreg, wlogreg, logreg.plot	575
10.16.2	The General Linear Model	576
10.16.3	R Function glmrob.....	576
10.17	Multivariate Regression.....	577
10.17.1	The RADA Estimator	578
10.17.2	The Least Distance Estimator.....	579
10.17.3	R Functions MULMreg, mlrreg and Mreglde.....	579
10.17.4	Multivariate Least Trimmed Squares Estimator.....	581
10.17.5	R Function MULtsreg	581
10.17.6	Other Robust Estimators	582
10.18	Exercises.....	582
Chapter 11: More Regression Methods		585
11.1	Inferences About Robust Regression Parameters.....	585
11.1.1	Omnibus Tests for Regression Parameters	586
11.1.2	R Function regtest	590
11.1.3	Inferences About Individual Parameters	591
11.1.4	R Functions regci, regciMC and wlogregci	593
11.1.5	Methods Based on the Quantile Regression Estimator	595
11.1.6	R Functions rqtest, qregci and qrchk	597
11.1.7	Inferences Based on the OP Estimator	598
11.1.8	R Functions opregpb and opregpbMC.....	600
11.1.9	Hypothesis Testing when Using a Multivariate Regression Estimator RADA	600
11.1.10	R Function mlrGtest.....	601
11.1.11	Robust ANOVA via Dummy Coding	601
11.1.12	Confidence Bands for the Typical Value of y Given x	602
11.1.13	R Functions regYhat, regYci, and regYband.....	604
11.1.14	R Function regse.....	606
11.2	Comparing the Regression Parameters of $J \geq 2$ Groups.....	606
11.2.1	Methods for Comparing Independent Groups.....	606
11.2.2	R Functions reg2ci, reg1way, reg1wayISO, ancGpar, ols1way, ols1wayISO, olsJmcp, olsJ2, reg1mcp and olsWmcp	612
11.2.3	Methods for Comparing Two Dependent Groups.....	616
11.2.4	R Functions DregG, difreg, DregGOLS	618
11.3	Detecting Heteroscedasticity	618
11.3.1	A Quantile Regression Approach.....	619
11.3.2	Koenker–Bassett Method	620
11.3.3	R Functions qhomt and khomreg	620

11.4	Curvature and Half-Slope Ratios	621
11.4.1	R Function hratio	622
11.5	Curvature and Nonparametric Regression	623
11.5.1	Smoothers	624
11.5.2	Kernel Estimators and Cleveland's LOWESS.....	624
11.5.3	R Functions lplot, lplot.pred and kerreg	626
11.5.4	The Running-Interval Smoother	628
11.5.5	R Functions rplot and runYhat	633
11.5.6	Smoothers for Estimating Quantiles	635
11.5.7	R Function qhdsm	636
11.5.8	Special Methods for Binary Outcomes	637
11.5.9	R Functions logSM, logSMpred, bkreg and rplot.bin.....	638
11.5.10	Smoothing with More than One Predictor.....	639
11.5.11	R Functions rplot, runYhat, rplotsm and runpd	640
11.5.12	LOESS	644
11.5.13	Other Approaches	647
11.5.14	R Functions adrun, adrunl, gamplot, gamplotINT	648
11.6	Checking the Specification of a Regression Model.....	649
11.6.1	Testing the Hypothesis of a Linear Association.....	650
11.6.2	R Function lintest	651
11.6.3	Testing the Hypothesis of a Generalized Additive Model	652
11.6.4	R Function adtest	653
11.6.5	Inferences About the Components of a Generalized Additive Model	653
11.6.6	R Function adcom	654
11.6.7	Detecting Heteroscedasticity Based on Residuals	654
11.6.8	R Function rhom.....	655
11.7	Regression Interactions and Moderator Analysis.....	655
11.7.1	R Functions kercon, rplot, runsm2g, ols.plot.inter, olshc4.inter, reg.plot.inter and regci.inter	657
11.7.2	Mediation Analysis	661
11.7.3	R Functions ZYmediate, regmed2 and regmediate	663
11.8	Comparing Parametric, Additive and Nonparametric Fits	664
11.8.1	R Functions adpchk and pmodchk.....	664
11.9	Measuring the Strength of an Association Given a Fit to the Data	666
11.9.1	R Functions RobRsq, qcorp1 and qcor	669
11.9.2	Comparing Two Independent Groups via the LOWESS Version of Explanatory Power	670
11.9.3	R Functions smcorcom and smstcom.....	671
11.10	Comparing Predictors	671
11.10.1	Comparing Correlations.....	672

11.10.2	R Functions TWOpov, TWOpNOV, corCOMmcp, twoDcorR, and twoDNOV	675
11.10.3	Methods Based on Prediction Error	676
11.10.4	R Functions regpre and regpreCV	678
11.10.5	R Function larsR	680
11.10.6	Inferences About Which Predictors Are Best	681
11.10.7	R Functions regIVcom, ts2str and sm2strv7	686
11.11	Marginal Longitudinal Data Analysis: Comments on Comparing Groups ..	687
11.11.1	R Functions long2g, longreg, longreg.plot and xyplot.....	689
11.12	Exercises.....	690
Chapter 12: ANCOVA		693
12.1	Methods Based on Specific Design Points and a Linear Model	695
12.1.1	Method S1	696
12.1.2	Method S2	696
12.1.3	Dealing with Two Covariates	698
12.1.4	R Functions ancJN, ancJNmp, ancJNmpcp, anclin, reg2plot and reg2g.p2plot.....	699
12.2	Methods when There Is Curvature and a Single Covariate.....	702
12.2.1	Method Y	703
12.2.2	Method BB: Bootstrap Bagging	705
12.2.3	Method UB	706
12.2.4	Method TAP	707
12.2.5	Method G	708
12.2.6	R Functions ancova, ancovaWMW, ancpb, rplot2g, runmean2g, lplot2g, ancdifplot, ancboot, ancbbpb, qhds2g, ancovaUB, ancovaUB.pv, ancdet, ancmg1 and ancGLOB	710
12.3	Dealing with Two Covariates when There Is Curvature.....	719
12.3.1	Method MC1.....	719
12.3.2	Method MC2.....	720
12.3.3	Method MC3.....	722
12.3.4	R Functions ancovamp, ancovampG, ancmppb, ancmg, ancov2COV, ancdes and ancdet2C.....	723
12.4	Some Global Tests	731
12.4.1	Method TG.....	731
12.4.2	R Functions ancm and Qancsm	734
12.5	Methods for Dependent Groups	735
12.5.1	Methods Based on a Linear Model	735
12.5.2	R Functions Dancts and Dancols	736
12.5.3	Dealing with Curvature: Methods DY, DUB and DTAP.....	736

Contents

12.5.4	R Functions Dancova, Dancovapb, DancovaUB and Dancdet	737
12.6	Exercises.....	740
