

Contents

Part I Fundamental Issues in Science Education

- 1 Constructing Your Self in School Science** 3
Kathrin Otrek-Cass
- 2 Learning Science in a Collaborative and Technological Environment**..... 11
Éric Durocher
- 3 Tracing Computer Assisted Assessment for Learning Capability in Greek Teachers** 19
Zacharoula Smyrniou, Kathrin Otrek-Cass, Evangelia Petropoulou, and Eleni Spinou
- 4 Brain Activity and Visual Scientific Content: A Study on Earthquake Precaution** 31
Georgios K. Zacharis, Angeliki Tsiara, Panagiota Chalki, Ioannis Vrellis, and Tassos A. Mikropoulos
- 5 Interest and Disinterest from College Students for Higher Education in Sciences** 41
Michel Pronovost, Caroline Cormier, Patrice Potvin, and Martin Riopel

Part II New Technologies in Science and Technology Education

- 6 Improvement of Inquiry in a Complex Technology-Enhanced Learning Environment**..... 55
Margus Pedaste, Külli Kori, Mario Mäeots, and Ton de Jong

7	Five Powerful Ideas About Technology and Education	63
	Andrea A. diSessa	
8	Analysis of an Inquiry-Based Design Process for the Construction of Computer-Based Educational Tools: The Paradigm of a Secondary Development Tool Negotiating Scientific Concepts	73
	Zacharoula Smyrniou, Evangelia Petropoulou, Maria Margoudi, and Ioannis Kostikas	
9	Scaffolding for Inquiry Learning in Computer-Based Learning Environments	87
	Emily B. Moore, Mario Mäeots, and Zacharoula Smyrniou	
10	Multimedia Applications by Using Video-Recorded Experiments for Teaching Biology in Secondary Education	97
	Maria Dokopoulou, Evangelos Bozas, and Evangelia A. Pavlatou	
11	Inquiry and Meaning Generation in Science While Learning to Learn Together: How Can Digital Media Provide Support?	109
	Zacharoula Smyrniou, Foteini Moustaki, and Chronis Kynigos	
12	Using Physical and Virtual Manipulatives to Improve Primary School Students' Understanding of Concepts of Electric Circuits	125
	Zacharias C. Zacharia and Marios Michael	
13	Impact of Educational Video Game on Students' Conceptions Related to Newtonian Mechanics	141
	Martin Riopel, Patrice Potvin, François Boucher-Genesse, and Geneviève Allaire-Duquette	
Part III Teaching and Learning in the Light of Inquiry-Learning Methods		
14	New Competences to Develop in Students to Help Them Get Involved in Sustainable Development While They Learn Through Inquiry Methods	153
	Diane Pruneau, Jackie Kerry, and Joanne Langis	

15	CREAT-IT: Implementing Creative Strategies into Science Teaching	163
	Anna Craft, Oded Ben Horin, Menelaos Sotiriou, Petros Stergiopoulos, Sofoklis Sotiriou, Sarah Hennessy, Kerry Chappell, Charlotte Slade, Margo Greenwood, Alison Black, Erić Lale Dobrivoje, Đurđa Timotijević, Aleksandra Drecun, Ana Brajović, Cinzia Belmontecinzia, and Giovanna Conforto	
16	The PATHWAY to Inquiry-Based Teaching – European Perspective to Shift Science Classroom Realities	181
	Sofoklis Sotiriou, Agueda Gras-Velázquez, and Franz X. Bogner	
17	Pedagogy as an Inquiry Approach to Teaching: Inspiring Science Educators Through CPD Webinars	193
	Yvonne Crotty, Margaret Farren, and Martin Owen	
	Conclusion	201
