Preface	page ix		
Introduction	xi		
CHAPTER 1 Weather Variables	1		
1.1 Temperature	1	2.3 Upper-Level Maps	25
1.1.1 Heat and Temperature	2	2.4 Radar	28
1.1.2 Thermometers	3	2.5 Satellites	29
1.1.3 Temperature Measurements	3	2.5.1 Visible Satellite Images	30
1.1.4 Temperature Scales	3	2.5.2 Infrared Satellite Images	31
1.1.5 Radiosonde Profiles	4	2.5.3 Water Vapor Images	32
		2.5.4 Geostationary Satellites	33
		2.5.5 Polar-Orbiting Satellites	35
		Summary	38
1.2 Pressure	5	Appendix 2.1 Important Satellite	
1.2.1 Force and Pressure	6	Cloud Signatures	39
1.2.2 Atmospheric Pressure	7	Appendix 2.2 Contiguous	
1.2.3 Vertical Distribution of Pressure	7	USA Reference Map	41
1.2.4 Barometers	8	CHAPTER 3 Our Atmosphere: Origin,	
1.2.5 Pressure Units	9	Composition, and Structure	42
1.2.6 Some Useful Numbers	9	3.1 Aspect	42
1.3 Wind	10	3.2 Composition	42
1.3.1 Measuring Wind	10	3.3 Origin and Evolution	43
1.3.2 Reporting Wind	12	3.4 Future Evolution	45
1.3.3 Additional Sources of		3.5 Vertical Structure	47
Wind Information	13	Summary	49
1.4 Precipitation	13	Appendix 3.1 Dynamic Equilibrium	50
1.5 Weather Stations	14	CHAPTER 4 Heat and Energy Transfer	51
Summary	16	4.1 Conduction	51
CHAPTER 2 Spatial Representations of	17	4.2 Convection	52
Weather Data		4.3 Radiation	53
2.1 The Station Model	17		
2.2 Surface Maps	20		
2.2.1 Isotherms and Temperature Maps	20		
2.2.2 Temperature Fronts	21		
2.2.3 Isobars and Pressure Maps	22		
2.2.4 Highs, Lows, Ridges, and Troughs	22		

4.3.1 The Nature of Electromagnetic Radiation	54	5.7.5 How to Saturate Summary	88 88
4.3.2 Temperature and Radiation	55		
4.4 Radiative Interactions	55	CHAPTER 6 Cloud Formation	90
4.4.1 Absorption	57	6.1 Adiabatic Processes	92
4.4.2 Reflection	57	6.2 Adiabatic Processes in the Atmosphere	93
4.4.3 Scattering	58	6.3 Dry Adiabatic Lapse Rate	94
4.4.4 Radiative Equilibrium	58	6.4 Relative Humidity	95
4.4.5 Selective Absorbers	60	6.5 Moist Adiabatic Lapse Rate	96
4.4.6 A Window to the Sky	60	6.6 Orographic Lifting	97
4.4.7 The Greenhouse Effect	61	6.7 Lifting by Convergence	101
4.5 Radiation and Weather	66	6.8 Frontal Lifting	101
4.5.1 Heat Imbalance	66	6.9 Convection	102
4.5.2 Seasonal Variations	68	6.9.1 Stable Air	102
4.5.3 Diurnal Variations	68	6.9.2 Unstable Air and Thermals	104
4.5.4 The Influence of Clouds	71	6.9.3 Stable vs. Unstable	104
4.5.5 Land–Ocean Contrasts	72	6.9.4 Fair-Weather Cumulus Clouds	106
Summary	73	6.9.5 Conditional Instability and Cumulonimbus	109
CHAPTER 5 Water	75	Summary	112
5.1 The Water Cycle	75	Appendix 6.1 A Cloud Family Album	113
5.2 Saturation	76	CHAPTER 7 Precipitation	117
5.3 Humidity	77	7.1 Warm vs. Cold Clouds	117
5.4 Relative Humidity	78	7.2 Collision and Coalescence	118
5.5 Humidity and Temperature	79	7.3 Ice-Crystal Growth	119
5.5.1 Relative vs. Absolute Humidity	80	7.4 Precipitation Types	121
5.5.2 Condensation	80	Summary	123
5.6 Dew Point Temperature	82		
5.7 Applications of the Dew point Temperature	83		
5.7.1 Surface Weather Maps	83		
5.7.2 Meteograms	85		
5.7.3 Radiosonde Profiles	87		
5.7.4 Back to Relative Humidity	87		

Appendix 7.1	Some Optical Phenomena	124	Summary	165	
CHAPTER 8	Wind	126	CHAPTER 10	Air Masses, Fronts, and Midlatitude Cyclones	167
8.1	Force and Acceleration	126	10.1	Air Masses	167
8.2	Pressure Gradient Force	127	10.2	Fronts	168
8.3	Sea Breeze and Land Breeze	128	10.2.1	Stationary Fronts	169
8.4	Coriolis Force	130	10.2.2	Cold Fronts	169
8.5	Geostrophic Wind	131	10.2.3	Warm Fronts	169
8.6	Gradient Wind	134	10.2.4	Occluded Fronts	170
8.7	Surface Winds	135	10.2.5	Large-Scale Influences on Cyclone Structure, and the T-bone Model	171
8.8	Friction	138	10.3	Midlatitude Cyclone Development	172
8.9	Topography	140	10.3.1	The Life Cycle of a Midlatitude Cyclone	172
8.9.1	Mountain Breeze and Valley Breeze	140	10.3.2	Vertical Structure of Cyclones	174
8.9.2	Katabatic Winds	143	10.3.3	The February 2014 Cyclone	177
Summary		143	10.3.4	Where do Cyclones Form?	184
CHAPTER 9	Global Wind Systems	145	Summary		185
9.1	The Averaged Atmosphere	146	Appendix 10.1	Southern Hemisphere Midlatitude Cyclones	186
9.1.1	Surface Temperature	146	Appendix 10.2	The Bergen School of Meteorology	187
9.1.2	Upper-Level Heights	148	CHAPTER 11	Thunderstorms and Tornadoes	188
9.1.3	Surface Pressure	151	11.1	Ordinary Thunderstorm	188
9.1.4	Precipitation	151	11.2	Severe Thunderstorm	190
9.2	The Single-Cell Model	152	11.3	Lightning and Thunder	192
9.3	The Three-Cell Model	154	11.4	Supercells	193
9.4	Some Large-Scale Circulations	155	11.5	Tornadoes	196
9.4.1	West Coast vs. East Coast	155	11.5.1	Description	196
9.4.2	Antarctica	157	11.5.2	Tornado Development	196
9.4.3	The Sahel	157			
9.4.4	The Indian Monsoon	158			
9.4.5	El Niño	159			

11.5.3 Tornado Alley	198	CHAPTER 14 Air Pollution	227
Summary	199	14.1 Pollutants	227
CHAPTER 12 Tropical Cyclones	201	14.1.1 Gases and Compounds	228
12.1 Facts and Figures	201	14.1.2 Particulates	228
12.2 Tropical Cyclone Structure	204	14.1.3 Photochemical Smog	228
12.3 Tropical Cyclone Development	208	14.2 Wind and Stability	229
12.3.1 Tropical Easterly Wave	208	14.3 Large-Scale Patterns	232
12.3.2 Tropical Depression	208	14.4 Topography	232
12.3.3 Tropical Storm	209	Summary	233
12.3.4 Tropical Cyclone (Hurricane)	210	CHAPTER 15 Climate Change and	
12.3.5 Tropical Cyclone Decay	210	Weather	234
12.4 Conditions for Tropical		15.1 Past and Future	235
Cyclone Development	211	15.2 Changing Composition	236
Summary	211	15.3 A Warmer World	237
CHAPTER 13 Weather Forecasting	213	15.4 An Altered Water Cycle	237
13.1 Weather Forecasts and Uncertainty	214	15.5 Changing Global Wind Systems	239
13.2 Prognostic Equations	214	15.6 Midlatitude and Tropical	
13.3 Ensemble Forecasting	217	Cyclones in a Warmer World	240
13.4 Chaos and Weather Prediction	220	15.7 Beyond Weather	241
13.5 From Forecast Grids to		15.8 The Forecast	241
Reliable Forecast Values	222	Summary	242
13.6 Making a Forecast	223	Glossary	244
13.6.1 Medium to Long-Range		References	256
Forecasting	224	Credits	257
13.6.2 Seasonal Outlook	226	Index	260
Summary	226
