Contents

Preface		v
Chapter 1:	Introduction	1
Chapter 2:	Basics of Computability	15
Chapter 3:	Hierarchies of Computability	33
Chapter 4:	Constructive Proof Theory	55
Chapter 5:	Computational Mathematics and Digital Information Systems	79
Chapter 6:	Intuitionistic Mathematics and Human Creativity	87
Chapter 7:	Proof Mining Bridging Logic, Mathematics, and Computer Science	101
Chapter 8:	Reverse Mathematics Bridging Logic, Mathematics, and Computer Science	163
Chapter 9:	From Intuitionistic to Homotopy Type Theory — Bridging Logic, Mathematics, and Computer Science	179
Chapter 10:	Real Computability and Real Analysis	201
Chapter 11:	Complexity Theory of Real Computing	229

Chapter 12: Real Computing and Neural Networks 241

Chapter 13: Complexity of Algorithmic Information 283

Chapter 14: Complexity of Information Dynamics 295

Chapter 15: Digital and Real Physics 321

Chapter 16: Digital and Real Computing in the Social World 361

Chapter 17: Philosophical Outlook 417
