Contents

1	**Introduction**	1
	1.1 The physics of the LHC era	1
	1.2 About this book	7
2	**Hard Scattering Formalism**	12
	2.1 Physical picture of hadronic interactions	12
	2.2 Developing the formalism: W boson production at fixed order	48
	2.3 Beyond fixed order: W boson production to all orders	80
	2.4 Summary	96
3	**QCD at Fixed Order: Technology**	99
	3.1 Orders in perturbation theory	99
	3.2 Technology of leading-order calculations	101
	3.3 Technology of next-to-leading-order calculations	117
	3.4 Beyond next-to-leading order in QCD	170
	3.5 Summary	179
4	**QCD at Fixed Order: Processes**	182
	4.1 Production of jets	182
	4.2 Production of photons and jets	197
	4.3 Production of V+jets	205
	4.4 Diboson production	215
	4.5 Top-pair production	224
	4.6 Single-top production	236
	4.7 Rare processes	241
	4.8 Higgs bosons at hadron colliders	243
	4.9 Summary	268
5	**QCD to All Orders**	270
	5.1 The QCD radiation pattern and some implications	271
	5.2 Analytic resummation techniques	284
	5.3 Parton shower simulations	329
	5.4 Matching parton showers and fixed-order calculations	358
	5.5 Multijet merging of parton showers and matrix elements	375
	5.6 NNLO and parton showers	393
6	**Parton Distribution Functions**	400
	6.1 PDF evolution: the DGLAP equation revisited	402
	6.2 Fitting parton distribution functions	411
	6.3 PDF uncertainties	424
	6.4 Resulting parton distribution functions	441

6.5 CT14 and parton luminosities 444
6.6 LHAPDF and other tools 450
6.7 Summary 451

7 Soft QCD 453
7.1 Total cross-sections and all that 454
7.2 Multiple parton interactions and the underlying event 468
7.3 Hadronization 481
7.4 Hadron decays 500

8 Data at the TEVATRON 510
8.1 Minimum bias and underlying event physics 510
8.2 Drell-Yan production 515
8.3 Inclusive jet production 517
8.4 Inclusive photon and diphoton production 526
8.5 Vector boson plus jet physics 530
8.6 $t\bar{t}$ production at the TEVATRON 531
8.7 Higgs boson searches 542
8.8 Summary 543

9 Data at the LHC 546
9.1 Total cross-sections, minimum bias and the underlying event 548
9.2 Jets 561
9.3 Drell-Yan type production 575
9.4 Vector boson pairs 594
9.5 Tops 600
9.6 Higgs boson 606
9.7 Outlook 624

10 Summary 628
10.1 Successes and failures at the LHC 628
10.2 Lessons for future colliders 630

Appendix A Mathematical background 637
A.1 Special functions 637
A.2 Spinors and spinor products 642
A.3 Kinematics 647

Appendix B The Standard Model 651
B.1 Standard Model Lagrangian 651
B.2 Feynman rules of the Standard Model 663

Appendix C Catani–Seymour subtraction 669
C.1 Catani–Seymour subtraction for NLO calculations 669
C.2 Catani–Seymour subtraction for parton showers 678
