## INTRODUCTION: An Introduction to Exercise and Sport Physiology

	1
Focus of Exercise and Sport Physiology	3
Acute and Chronic Responses to Exercise	3
The Evolution of Exercise Physiology	3
Exercise Physiology in the 21st Century	14
Research: The Foundation for Understanding	17

## PART I Exercising Muscle

---

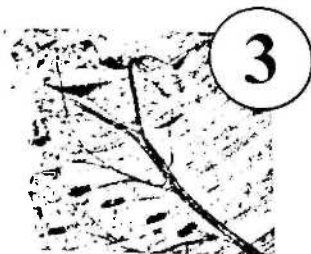

### 1 Structure and Function of Exercising Muscle 29

Anatomy of Skeletal Muscle	31
Muscle Fiber Contraction	36
Muscle Fiber Types	41
Skeletal Muscle and Exercise	45

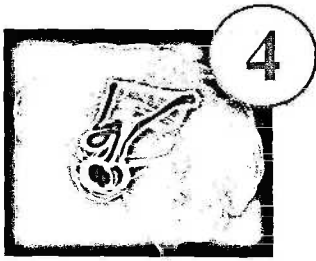

### 2 Fuel for Exercise: Bioenergetics and Muscle Metabolism 53

Energy Substrates	54
Controlling the Rate of Energy Production	56
Storing Energy: High-Energy Phosphates	58
The Basic Energy Systems	58
Interaction of the Energy Systems	69
The Crossover Concept	70
The Oxidative Capacity of Muscle	70

### 3 Neural Control of Exercising Muscle 75

Structure and Function of the Nervous System	76
Central Nervous System	84
Peripheral Nervous System	87
Sensory-Motor Integration	88

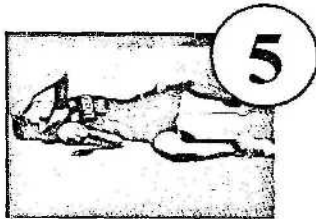

4

## Hormonal Control During Exercise

97

The Endocrine System	98
Endocrine Glands and Their Hormones: An Overview	102
Hormonal Regulation of Metabolism During Exercise	105
Hormonal Regulation of Fluid and Electrolytes During Exercise	111
Hormonal Regulation of Caloric Intake	116

5

## Energy Expenditure, Fatigue, and Muscle Soreness

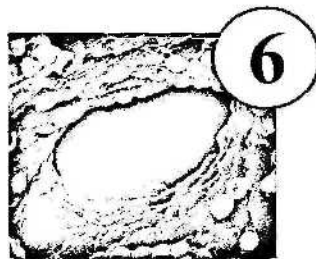

121

Measuring Energy Expenditure	122
Energy Expenditure at Rest and During Exercise	127
Fatigue and Its Causes	134
Critical Power: The Link Between Energy Expenditure and Fatigue	143
Muscle Soreness and Muscle Cramps	143

---

## PART II Cardiovascular and Respiratory Function

---

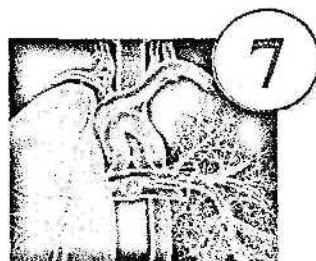

6

## The Cardiovascular System and Its Control

153

The Heart	154
Vascular System	166
Blood	173

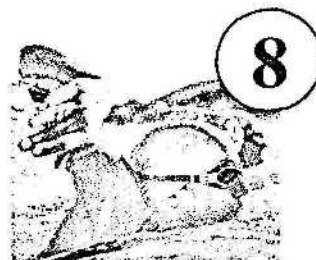

7

## The Respiratory System and Its Regulation

177

Pulmonary Ventilation	178
Pulmonary Volumes	180
Pulmonary Diffusion	181
Transport of Oxygen and Carbon Dioxide in the Blood	188
Gas Exchange at the Muscles	191
Regulation of Pulmonary Ventilation	193
Afferent Feedback From Exercising Limbs	195

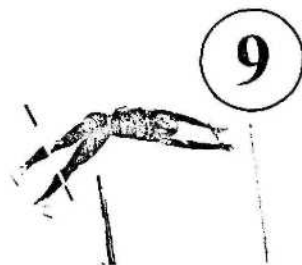

8

## Cardiorespiratory Responses to Acute Exercise

199

Cardiovascular Responses to Acute Exercise	200
Respiratory Responses to Acute Exercise	216

## PART III Exercise Training

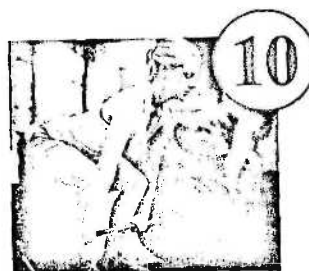

9

### Principles of Exercise Training

227

Terminology	228
General Principles of Training	230
Resistance Training Programs	232
Anaerobic and Aerobic Power Training Programs	237

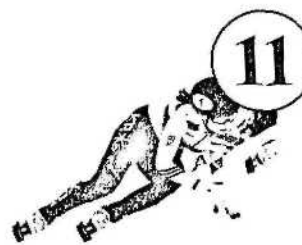

10

### Adaptations to Resistance Training

247

Resistance Training and Gains in Muscular Fitness	248
Mechanisms of Gains in Muscle Strength	248
Interaction Between Resistance Training and Diet	258
Resistance Training for Special Populations	261

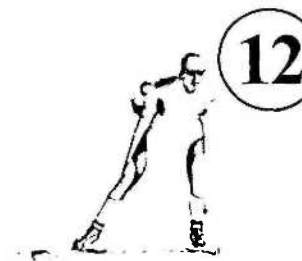

11

### Adaptations to Aerobic and Anaerobic Training

267

Adaptations to Aerobic Training	268
Adaptations to Anaerobic Training	291
Adaptations to High-Intensity Interval Training	293
Specificity of Training and Cross-Training	295

## PART IV Environmental Influences on Performance

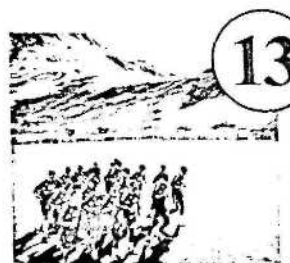

12

### Exercise in Hot and Cold Environments

301

Body Temperature Regulation	302
Physiological Responses to Exercise in the Heat	308
Health Risks During Exercise in the Heat	313
Acclimation to Exercise in the Heat	318
Exercise in the Cold	320
Physiological Responses to Exercise in the Cold	324
Health Risks During Exercise in the Cold	326

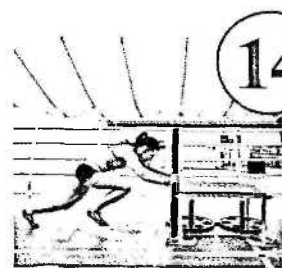

13

### Exercise at Altitude

331

Environmental Conditions at Altitude	332
Physiological Responses to Acute Altitude Exposure	334
Exercise and Sport Performance at Altitude	339
Acclimation: Chronic Exposure to Altitude	341
Altitude: Optimizing Training and Performance	344
Health Risks of Acute Exposure to Altitude	349

## PART V Optimizing Performance in Sport

14

### Training for Sport

355

Optimizing Training	356
Periodization of Training	358
Overtraining	361
Tapering for Peak Performance	368
Detraining	370

15

### Body Composition and Nutrition for Sport

377

Assessing Body Composition	378
Body Composition, Weight, and Sport Performance	382
Classification of Nutrients	386
Water and Electrolyte Balance	400
Nutrition and Athletic Performance	406

16

### Ergogenic Aids in Sport

413

Researching Ergogenic Aids	414
Ergogenic Nutrition Aids	418
Anti-Doping Codes and Drug Testing	425
Prohibited Substances and Techniques	428

## PART VI Age and Sex Considerations in Sport and Exercise

17

### Children and Adolescents in Sport and Exercise

441

Growth, Development, and Maturation	442
Physiological Responses to Acute Exercise	445
Physiological Adaptations to Exercise Training	451
Physical Activity Patterns Among Youth	453
Sport Performance and Specialization	455
Special Issues	457

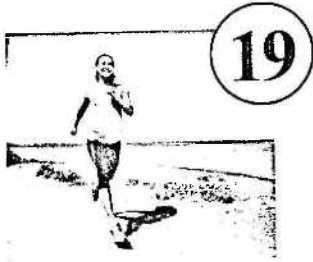

18

### Aging in Sport and Exercise

461

Height, Weight, and Body Composition	462
Physiological Responses to Acute Exercise	464
Physiological Adaptations to Exercise Training	475
Sport Performance	478
Special Issues	480

<b>19</b>	<b>Sex Differences in Sport and Exercise</b>	<b>485</b>
	Sex Versus Gender in Exercise Physiology	486
	Body Size and Composition	487
	Physiological Responses to Acute Exercise	488
	Physiological Adaptations to Exercise Training	493
	Sport Performance	494
	Special Issues	496

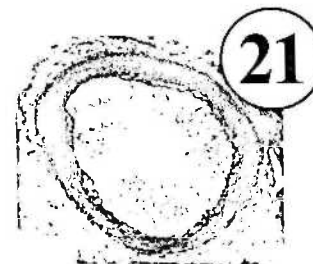

---

**PART VII Physical Activity for Health and Fitness**

---

<b>20</b>	<b>Prescription of Exercise for Health and Fitness</b>	<b>509</b>
	Health Benefits of Regular Physical Activity and Exercise	510
	Physical Activity Recommendations	510
	Health Screening	512
	Exercise Prescription	517
	Monitoring Exercise Intensity	519
	Exercise Programming	524
	Exercise and Rehabilitation of People with Diseases	526

<b>21</b>	<b>Cardiovascular Disease and Physical Activity</b>	<b>529</b>
	Prevalence of Cardiovascular Disease	530
	Forms of Cardiovascular Disease	531
	Understanding the Disease Process	535
	Cardiovascular Disease Risk	538
	Reducing Risk Through Physical Activity	541
	Risk of Heart Attack and Death During Exercise	546
	Exercise Training and Rehabilitation of Patients with Heart Disease	547

<b>22</b>	<b>Obesity, Diabetes, and Physical Activity</b>	<b>551</b>
	Understanding Obesity	552
	Weight Loss	561
	Management Guidelines for Overweight and Obesity	563
	Role of Physical Activity in Weight Management and Risk Reduction	564
	Understanding Diabetes	568
	Treatment of Diabetes	570
	Role of Physical Activity in Diabetes	571

Glossary	575
References	589
Index	611
About the Authors	626
