<i>About the Authors</i>	v
<i>List of Contributors</i>	vii
<i>Abbreviations, Symbols and Definitions</i>	xix
<i>Introduction</i>	xxiii
CHAPTER 1 <i>The Fireflies and Luminous Insects</i>	1
<i>Osamu Shimomura, Yuichi Oba,</i>	
<i>Alexey A. Kotlobay and Aleksandra S. Tsarkova</i>	
1.1 <i>The Fireflies</i>	3
1.1.1 <i>An overview of the firefly</i>	
<i>luminescence reaction</i>	3
1.1.2 <i>Firefly luciferin and oxyluciferin</i>	5
1.1.3 <i>Firefly luciferase</i>	9
1.1.4 <i>Assays of luciferase activity, ATP,</i>	
<i>and luciferin</i>	11
1.1.5 <i>General characteristics of the</i>	
<i>bioluminescence of fireflies</i>	12
1.1.6 <i>Mechanism of firefly bioluminescence</i>	15
1.1.7 <i>Identification of light emitter</i>	17
1.1.8 <i>A note on the dioxetanone pathway</i>	
<i>and the <sup>18</sup>O-incorporation experiment</i>	21

1.2	Phengodidae and Elateridae	25
1.2.1	Phengodidae	25
1.2.2	Elateridae	26
1.3	Diptera	27
1.3.1	The glow-worm <i>Arachnocampa</i>	28
1.3.2	The American glow-worm <i>Orfelia</i>	30
	Acknowledgment	31
CHAPTER 2	Luminous Bacteria	33
	<i>Osamu Shimomura</i>	
2.1	Factors Required for Bioluminescence	34
2.2	Bacterial Luciferase	36
2.2.1	Cultivation of luminous bacteria	36
2.2.2	Extraction and purification	36
2.2.3	Properties of luciferase	37
2.3	Long-chain Aldehyde	38
2.4	Mechanism of Luminescence Reaction	40
2.5	Assay of Luciferase Activity	42
2.6	Quantum Yield of Long-chain Aldehydes	43
2.7	<i>In vivo</i> Luminescence of Luminous Bacteria	44
CHAPTER 3	The Ostracod <i>Cypridina</i> ( <i>Vargula</i> ) and Other Luminous Crustaceans	51
	<i>Osamu Shimomura and Ludmila A. Frank</i>	
3.1	The Ostracod <i>Cypridina</i>	53
3.1.1	Overview of Ostracoda	53
3.1.2	<i>Cypridina hilgendorfii</i> Müller	54
3.1.3	Research on <i>Cypridina</i> luminescence before 1955	57
3.1.4	Purification and crystallization of <i>Cypridina</i> luciferin	58
3.1.5	Properties of <i>Cypridina</i> luciferin	62
3.1.6	Oxyluciferin and etioluciferin	65
3.1.7	Purification and molecular properties of <i>Cypridina</i> luciferase	66

3.1.8	Luciferin–luciferase luminescence reaction	67
3.1.9	Quantum yield	73
3.2	Euphausiids <i>Euphausia pacifica</i> and <i>Meganyctiphanes norvegica</i>	75
3.2.1	Involvement of the fluorescent compound F and protein P	76
3.2.2	Fluorescent compound F	77
3.2.3	Protein P	82
3.2.4	Luminescence reaction	83
3.3	The Decapod Shrimp <i>Oplophorus gracilirostris</i>	85
3.3.1	<i>Oplophorus</i> luciferase	86
3.3.2	Coelenterazine–luciferase reaction	87
3.3.3	Engineering of a stable and super active <i>Oplophorus</i> luciferase catalytic subunit	91
3.4	Copepoda	92
CHAPTER 4	The Jellyfish <i>Aequorea</i> and Other Luminous Coelenterates	95
	<i>Osamu Shimomura and Konstantin A. Lukyanov</i>	
4.1	The Hydrozoan <i>Medusa Aequorea aequorea</i>	97
4.1.1	History of the biochemical study of <i>Aequorea</i> bioluminescence	99
4.1.2	Extraction and purification of aequorin	100
4.1.3	Properties of aequorin	105
4.1.4	Discovery of the coelenterazine moiety in aequorin	115
4.1.5	Regeneration of aequorin from apoaequorin	117
4.1.6	Recombinant aequorin	120
4.1.7	Semisynthetic aequorins	122
4.1.8	The <i>in vivo</i> luminescence of <i>Aequorea</i>	134
4.2	The Hydroid <i>Obelia</i> (Hydrozoan)	136
4.2.1	Natural obelins	137
4.2.2	Recombinant obelin	137

4.3	The Hydrozoan Medusa <i>Phialidium gregarium</i>	140
4.4	Other Bioluminescent Hydrozoans	142
4.5	The Scyphozoans <i>Pelagia</i> and <i>Periphylla</i>	143
	4.5.1 <i>Pelagia noctiluca</i>	143
	4.5.2 <i>Periphylla periphylla</i>	144
4.6	The Anthozoan <i>Renilla</i> (Sea Pansy)	150
4.7	The Ctenophores	154
4.8	The Green Fluorescent Protein (GFP)	159
	4.8.1 Properties of <i>Aequorea</i> GFP	161
	4.8.2 Chromophore of <i>Aequorea</i> GFP	163
	4.8.3 Various natural GFPs	165
	4.8.4 Various improved forms of GFP	167
	4.8.5 Photoconversions of fluorescent proteins	171
	4.8.6 Combined applications of bioluminescence and fluorescence	174
	Acknowledgment	175
CHAPTER 5	The Coelenterazines <i>Osamu Shimomura</i>	177
	5.1 Discovery of Coelenterazine	177
	5.2 Occurrence of Coelenterazine	178
	5.3 Properties of Coelenterazine and Its Derivatives	183
	5.4 Chemi- and Bioluminescence Reactions of Coelenterazine	186
	5.5 Various Chemical Reactions of Coelenterazine	192
	5.6 Synthesis of Coelenterazines	195
	5.7 Coelenterazine Luciferases	196
CHAPTER 6	Luminous Mollusca <i>Osamu Shimomura</i>	199
	6.1 The Limpet <i>Latia</i>	200
	6.2 The Clam <i>Pholas dactylus</i>	211

6.3	Luminous Squids (Cephalopoda)	217
6.3.1	The firefly squid <i>Watasenia scintillans</i>	219
6.3.2	The purpleback flying squid <i>Symplectoteuthis oualaniensis</i> (Tobi-ika)	224
6.3.3	The luminous flying squid <i>Symplectoteuthis luminosa</i> (Suji-ika)	228
CHAPTER 7	Annelida	235
	<i>Osamu Shimomura and Aleksandra S. Tsarkova</i>	
7.1	The Tubeworm <i>Chaetopterus variopedatus</i>	235
7.1.1	Biochemistry of the luminescence of <i>Chaetopterus variopedatus</i>	238
7.1.2	Properties of the <i>Chaetopterus</i> photoprotein and its luminescence reaction	241
7.2	The Bermuda Fireworm <i>Odontosyllis</i>	244
7.3	Luminous Earthworms (Clitellata)	254
7.3.1	Bioluminescent system of earthworms <i>D. longa</i>	256
7.3.2	Bioluminescent system of potworms <i>Fridericia heliota</i>	262
7.4	Polynoid Scaleworm <i>Harmothoë lunulata</i>	278
7.5	The Polychaete <i>Tomopteris</i>	282
	Acknowledgment	282
CHAPTER 8	Dinoflagellates and Other Protozoa	283
	<i>Osamu Shimomura</i>	
8.1	Radiolarians	283
8.2	Dinoflagellates	284
8.2.1	Cultivation and harvesting of dinoflagellates	286
8.2.2	Scintillons	286
8.2.3	The luciferase of <i>Gonyaulax polyedra</i>	287

8.2.4	Extraction and purification of dinoflagellate luciferin	290
8.2.5	Properties of dinoflagellate luciferin	292
8.2.6	Chemical structures of dinoflagellate luciferin and its oxidation products	295
8.2.7	Chemical mechanism of dinoflagellate bioluminescence	297
8.2.8	Luciferin binding protein of dinoflagellates	299
CHAPTER 9	Luminous Fungi	301
	<i>Osamu Shimomura, Cassius V. Stevani, Zinaida M. Kaskova, Aleksandra S. Tsarkova and Ilia V. Yampolsky</i>	
9.1	Early Studies on the Biochemistry of Luminous Fungi	303
9.2	Role of Superoxide in Fungal Luminescence	305
9.3	Studies on <i>P. stipticus</i>	310
9.3.1	Panal	311
9.3.2	Activation products of panal	314
9.3.3	PS-A and PS-B	316
9.3.4	Activation of PS-A and PS-B	318
9.3.5	Mechanism of the <i>in vivo</i> bioluminescence of <i>P. stipticus</i>	324
9.3.6	Synthetic studies of <i>Panellus</i> luciferin	325
9.4	Studies on <i>Mycena citricolor</i>	328
9.4.1	Luciferin obtained by Kuwabara and Wassink	328
9.4.2	Studies on the <i>Mycena citricolor</i> luminescence by Shimomura	329
9.5	Summary on the Chemistry of Fungal Luminescence	332
9.6	Report on Recent Studies	333
	Acknowledgment	348

CHAPTER 10	Other Luminous Organisms	349
	<i>Osamu Shimomura, Yuichi Oba,</i>	
	<i>Cassius V. Stevani, Aleksandra S. Tsarkova</i>	
	<i>and Zinaida M. Kaskova</i>	
10.1	Echinodermata: Ophiuroidea — Brittle Stars	349
10.1.1	The brittle star <i>O. californica</i>	350
10.1.2	The brittle star <i>Amphiura filiformis</i>	355
10.2	Arthropoda: Diplopoda — Millipede <i>Motyxia sequoiae</i>	355
10.2.1	Extraction and purification of the <i>Motyxia</i> photoprotein	357
10.2.2	Assay of <i>Motyxia</i> photoprotein	358
10.2.3	Properties of Luminodesmus photoprotein	358
10.2.4	Porphyrin as a possible chromophore of <i>Motyxia</i> photoprotein	360
10.3	Arthropoda: Chilopoda. Centipede <i>Orphnaeus brevilabiatus</i>	362
10.4	Hemicordata	363
10.4.1	The acorn worm <i>Balanoglossus biminiensis</i>	363
10.4.2	The luciferin of <i>Ptychodera flava</i>	366
10.5	Chordata: Urochordata (Tunicates)	367
10.6	Chordata: The Luminous Fishes	370
10.6.1	Coastal and shallow-water fishes that utilize Cypridina luciferin	372
10.6.2	Oceanic deep-sea luminous fishes	375
10.6.3	Future research on fish bioluminescence	378
	Acknowledgment	379
	<i>Appendices</i>	381
	<i>References</i>	425
	<i>Index</i>	505
