## Part I. A Survey of the Use of Incomes Policy Since World War II

|          |   |          |
|----------|---|----------|
| <b>1</b> | <b>What Incomes Policy Is and When It Has Been Used</b>                       | <b>3</b> |
| <b>2</b> | <b>Incomes Policy Under Full Employment Policies and Fixed Exchange Rates</b> | <b>8</b> |
|          | Policies of the Late 1940s and Early 1950s                                    | 8        |
|          | Policies of the Early 1960s   | 11       |
|          | Productivity Guidelines   | 11       |
|          | Exceptional Conditions Favoring Price Stability                               | 12       |
|          | Purpose of Incomes Policies   | 13       |
|          | Policies of the Late 1960s and Early 1970s                                    | 14       |
|          | Increased Resort to Direct Intervention                                       | 15       |
|          | Changed Context for Incomes Policy  | 15       |
|          | Shift of Wage Bargaining Power  | 18       |
|          | Disillusion with Incomes Policy   | 18       |
|          | Strengthening International Transmission of Inflation from 1945 to 1973       | 19       |
|          | Increasing Openness of Industrial Countries                                   | 19       |
|          | Declining Effectiveness of Demand Management                                  | 21       |
|          | Scandinavian Model of Wage Determination                                      | 23       |
|          | Causes of Strong Wage Pressure in Late 1960s and Early 1970s                  | 24       |
|          | Case for Exchange Rate Adjustments  | 25       |
|          | Opposing Views of the Need for Incomes Policy                                 | 26       |
|          | Context for Incomes Policies in Early 1970s                                   | 26       |

|   |    |
|---|----|
| Use of Incomes Policies                                       | 27 |
| Results of Incomes Policies Under Fixed Exchange Rates        | 28 |
| <b>3 Incomes Policy After the Inflationary Crisis of 1973</b> | 34 |
| New Setting for Incomes Policy                                | 34 |
| Consequences of Widespread Indexation                         | 36 |
| Fiscal Drag   | 39 |
| Demand Policies and Recourse to Incomes Policy Measures       | 41 |
| Results Achieved by Mid-1970s                                 | 43 |
| The Problem of Stabilization in an Open Economy               | 49 |
| Need for Dual Objective for Prices and the Real Exchange Rate | 50 |
| The Case for a Gradualist Approach Utilizing Incomes Policy   | 51 |
| The Role of Incomes Policy                                    | 55 |

## Part II. The Scope for Incomes Policy in Theory and Practice

|   |    |
|---|----|
| <b>4 Incomes Policy Under Fixed Exchange Rates in the 1960s</b>       | 61 |
| The Process of Cost Inflation   | 62 |
| The Nature of Wage Bargaining by Unions                               | 62 |
| Negotiated Wage Increases in a Particular Industry                    | 65 |
| <i>Influence of Degree of Unionization</i>                            | 66 |
| <i>Influence of Extent of "Organization" Among Employers</i>          | 67 |
| <i>Influence of Openness of the Economy</i>                           | 70 |
| Wage Drift  | 71 |
| How the Spread of Wage Increases Influences Business Expectations     | 74 |
| Effectiveness of Aggregate Demand Policy in Countering Cost Inflation | 77 |
| Problem of Generalized Cost Inflation                                 | 77 |
| Interpretation of the Phillips Curve                                  | 79 |

|  |     |
|--|-----|
| Feasibility of Countering Cost Inflation by Demand Policy        | 80  |
| Factors Influencing Cost Inflation in Particular Countries       | 82  |
| Differing Exposure to Cost Pressure                              | 82  |
| Elements of Flexibility in the Labor Market                      | 83  |
| Organization of Product and Labor Markets                        | 86  |
| Productivity Growth  | 91  |
| Level of Unemployment Maintained                                 | 92  |
| Tendencies to Cost Inflation in Different Countries              | 92  |
| The Scope for Incomes Policy in the Mid-1960s                    | 95  |
| <b>5 The Changed Context for Incomes Policy in the 1970s</b>     | 99  |
| Strengthening Tendencies to Inflation During the 1960s           | 99  |
| Ending of Exceptional Supply Situation of the 1950s              | 100 |
| Loosening of Constraint Imposed by U.S. Policies                 | 102 |
| Diminishing Scope for Independent National Policies              | 103 |
| Growing Divergence of National Policy Goals                      | 105 |
| Enforced Coordination of the Realized Policy Stance              | 107 |
| The Industrial Countries as a Closed Economy                     | 108 |
| The Aggregate Experience of 1965-74                              | 110 |
| Anomalous Developments of the Early 1970s                        | 115 |
| Acceleration of Inflation Outside the United States in 1968-70   | 115 |
| National Experience of Increasing Inflationary Pressure, 1968-70 | 119 |
| External and Domestic Causes of the 1968-70 Wage Explosions      | 123 |
| Consequences of Delayed Adjustment of Exchange Rates             | 125 |
| Breakdown of the Fixed Exchange Rate System                      | 126 |
| Legacy of the Early 1970s  | 127 |

|          |  |            |
|----------|--|------------|
| <b>6</b> | <b>Incomes Policy and Economic Theory</b>  | <b>130</b> |
|          | The Monetarist Counterrevolution and Theory of Unemployment                            | 130        |
|          | Role of Incomes Policy Under Keynesian Demand Management                               | 131        |
|          | Metamorphosis of the Phillips Curve  | 132        |
|          | The Phillips-Lipsey Version  | 132        |
|          | The "Expectations-Augmented" Phillips Curve  | 134        |
|          | The Natural Rate of Unemployment   | 135        |
|          | The Phillips Curve as an Aggregate Supply Curve Under "Rational Expectations"          | 136        |
|          | The Empirical Phillips Curve as a Cyclical Phenomenon                                  | 137        |
|          | The Monetarist View of the Economy   | 139        |
|          | Basic Postulates of the General Equilibrium Model                                      | 141        |
|          | Efforts to Justify the General Equilibrium Approach                                    | 143        |
|          | An Alternative View: Discontinuous Adjustment Under Imperfect Competition              | 146        |
|          | "Rational" Decisions Under Uncertainty   | 146        |
|          | Influence of "Ephemeral" Monopoly in a Dynamic World                                   | 146        |
|          | The Nature of Wage Determination in the Large Enterprise Sector                        | 147        |
|          | The Keynesian Concept of "Involuntary Unemployment"                                    | 149        |
|          | Nominal Versus Real Wage Bargaining  | 149        |
|          | "Rational" Resistance to Wage Reductions   | 151        |
|          | Response of the Economy to Deflation   | 153        |
|          | Need for a More Realistic Theoretical Framework  | 154        |
|          | Relation Between Unemployment and Inflation in a Closed Economy                        | 156        |
| <b>7</b> | <b>Demand Expansion, Inflation, and Real Output Growth Under Imperfect Competition</b> | <b>159</b> |
|          | Unsymmetrical Response to Acceleration or Deceleration of Demand                       | 159        |

|   |     |
|---|-----|
| Differing Response to Marked or Gradual Changes in Demand                                   | 162 |
| Price Behavior in "Auction" and "Administered" Markets                                      | 162 |
| Role of the Consumer and Wholesale Price Indices  | 165 |
| Influence of the Rate of Acceleration of Demand   | 166 |
| "Secular" Versus "Structural" Potential Real Output Growth                                  | 166 |
| Productivity Growth and the Level of Employment   | 169 |
| A Crucial Problem   | 169 |
| Minimum Nominal Demand Expansion to Avoid Rising Unemployment and/or Losses in Productivity | 170 |
| Influence of the Rate of Deceleration of Demand   | 172 |
| <b>8 Indexation of Wages: A Monetarist Prescription</b>                                     | 176 |
| Wage Bargaining and Indexation  | 177 |
| Price Expectations in Wage Bargaining   | 178 |
| The Rate of Monetary Expansion and Relative Price Flexibility                               | 179 |
| Effect of Indexation  | 182 |
| Incidence of Indexation   | 185 |
| Case for Indexation in the Early 1970s  | 186 |
| United States   | 188 |
| Federal Republic of Germany   | 190 |
| United Kingdom  | 191 |
| Australia   | 192 |
| Characteristics of Wages Indexation in Practice   | 193 |
| Experience with Indexation in Selected Countries  | 195 |
| Threshold Agreements in the United Kingdom, 1973-74   | 195 |
| Indexation Under Centralized Agreements in Scandinavian Countries                           | 197 |
| Indexation-Based Wages Policy in Australia, 1983-85   | 200 |
| Escalator Clauses in the United States in the 1950s   | 203 |

## Part IV. Conclusions

|  |     |
|--|-----|
| <b>11</b> On the Nature of Price and Wage<br>Determination in Open Industrial<br>Economies | 317 |
| Three Main Conclusions   | 317 |
| Need for Historical Perspective  | 318 |
| Changing Relationship of National Economies  | 320 |
| Need for a More Realistic Model of the<br>National Economy                                 | 321 |

|   |     |
|---|-----|
| Open Economies with Sectors of Easy and<br>Difficult Entry                  | 322 |
| Implications of this Division   | 324 |
| Two Subeconomies of the Open National<br>Economy                            | 326 |
| Pricing in the Large Enterprise Sector                                      | 328 |
| <i>Implications for Neoclassical Empirical Studies</i>                      | 330 |
| Relative Price Movements in the World<br>LETE and the National GLMEs        | 332 |
| Wage Bargaining Characteristics of Industrial<br>Economies                  | 334 |
| Pervasive or Limited Labor Organization                                     | 335 |
| Nature of Collective Bargaining System                                      | 335 |
| Policy Implications of Structural Differences<br>Between National Economies | 338 |
| Recent Development of Employment and<br>Productivity                        | 341 |
| Current Problems of Industrial Countries                                    | 346 |
| <b>Bibliography</b>   | 351 |
